

SENATE COMMITTEE SUBSTITUTE FOR  
**SENATE, No. 2605**

---

**STATE OF NEW JERSEY**  
**219th LEGISLATURE**

---

ADOPTED MAY 11, 2021

**Sponsored by:**

**Senator BOB SMITH**

**District 17 (Middlesex and Somerset)**

**Senator CHRISTOPHER "KIP" BATEMAN**

**District 16 (Hunterdon, Mercer, Middlesex and Somerset)**

**Co-Sponsored by:**

**Senators Diegnan and Lagana**

**SYNOPSIS**

Establishes successor program to solar renewable energy certificate program in BPU, including solicitation process for certain solar power generation facilities.

**CURRENT VERSION OF TEXT**

Substitute as adopted by the Senate Environment and Energy Committee.

1   **AN ACT** concerning certain solar energy projects, amending and  
2       supplementing P.L.1999, c.23, amending P.L.2016, c.12, and  
3       supplementing Title 13 of the Revised Statutes.

4  
5       **BE IT ENACTED** *by the Senate and General Assembly of the State*  
6 *of New Jersey:*

7  
8       1. (New section) The Legislature hereby finds and declares  
9 that:

10       a. In order to achieve the State's goal of securing 50 percent of  
11 its electricity supply from renewable energy by 2030 with the least  
12 cost and the greatest benefit to consumers, it is critical to promote  
13 investment in new solar electric power generation facilities,  
14 including grid supply solar facilities, community solar facilities,  
15 and net metered solar facilities;

16       b. The New Jersey 2019 Energy Master Plan, prepared pursuant  
17 to section 12 of P.L.1977, c.146 (C.52:27F-14), found that: (1) the  
18 State can achieve its 100 percent clean energy and 80 percent  
19 greenhouse gas reduction goals, which will likely lead to net  
20 savings when health benefits and climate change mitigation benefits  
21 are taken into account, in part by maximizing the development of  
22 renewable energy generation, including 17 gigawatts of solar power  
23 by 2035 and 32 gigawatts by 2050; and (2) under the least cost path  
24 identified by the plan, solar energy could meet 34 percent of the  
25 State's clean energy needs by 2050;

26       c. The development of grid supply solar should be directed  
27 toward marginal land and the built environment and away from  
28 open space, flood zones, and other areas especially vulnerable to  
29 climate change, and a coordinated land use policy for grid supply  
30 solar siting is needed to affordably expand New Jersey's  
31 commitment to renewable energy while not compromising the  
32 State's commitment to preserving and protecting open space and  
33 farmland;

34       d. New Jersey has the market potential to host thousands of  
35 megawatts of solar power generation facilities from grid supply,  
36 community solar, and net-metered solar installations, which will  
37 create solar jobs and improve the environment; and

38       e. It is therefore in the public interest to develop a new solar  
39 program that incentivizes new solar electric power generation  
40 facilities, including net metered solar facilities, community solar  
41 facilities, and grid supply solar facilities, which are capable of  
42 ensuring that clean and reliable solar energy is supplied to New  
43 Jersey consumers, and which contribute to meeting the State's  
44 energy goals.

**EXPLANATION** – Matter enclosed in bold-faced brackets **[thus]** in the above bill is  
not enacted and is intended to be omitted in the law.

Matter underlined thus is new matter.

- 1        2. (New section) a. There is established in the Board of Public  
2 Utilities a program to be known as the SREC-II program, which  
3 shall serve as the successor program to the SREC program  
4 established pursuant to section 38 of P.L.1999, c.23 (C.48:3-87).  
5 The goal of the program shall be to provide incentives for the  
6 development of at least 3,750 megawatts of new solar power  
7 generation by 2026, although this goal may be extended or revised  
8 by the board as necessary to conform to the State's solar energy  
9 policies.
- 10        b. The board shall develop, as part of the SREC-II program, a  
11 process for the creation and distribution of renewable energy  
12 certificates, to be known as "SREC-IIs," for each megawatt hour of  
13 energy produced by a qualifying solar electric power generation  
14 facility for a duration established by the board. The board shall also  
15 establish a system by which to distribute a renewable energy  
16 incentive payment, to be known as the "SREC-II value per  
17 megawatt-hour," to the owner of an eligible solar electric power  
18 generation facility, which shall be measured in dollars-per-  
19 megawatt-hour of solar power generation, and which shall represent  
20 the value of the environmental attribute produced by the solar  
21 electric power generation facility. SREC-IIs shall be transferable  
22 and capable of being used by an electric power supplier or basic  
23 generation service provider to satisfy the State's renewable portfolio  
24 standards established pursuant to section 38 of P.L.1999, c.23  
25 (C.48:3-87). SREC-IIs shall be eligible for use in renewable energy  
26 portfolio standards compliance in the energy year in which they are  
27 generated, and for the following energy year.
- 28        c. No later than one year after the effective date of P.L. ,  
29 c. (C. ) (pending before the Legislature as this bill), the  
30 board shall adopt, pursuant to the "Administrative Procedure Act,"  
31 P.L.1968, c.410 (C.52:14B-1 et seq.), rules and regulations  
32 establishing the SREC-II program in accordance with the provisions  
33 of P.L. , c. (C. ) (pending before the Legislature as this  
34 bill).
- 35        d. The board is authorized to establish, impose, and collect fees,  
36 escrows, and other charges the board deems necessary and proper to  
37 implement the provisions of P.L. , c. (C. ) (pending before  
38 the Legislature as this bill).
- 39        e. The costs of the SREC-II program shall be apportioned to  
40 ratepayers using a methodology approved by the board. Except as  
41 provided in subsection h. of section 4 of P.L. , c. (C. )  
42 (pending before the Legislature as this bill), the methodology shall  
43 be similar to that by which the board apportions the costs of SRECs  
44 and other renewable energy certificates pursuant to section 38 of  
45 P.L.1999, c.23 (C.48:3-87) and consistent with the competitive  
46 retail market established by the "Energy Discount and Energy  
47 Competition Act," P.L.1999, c.23 (C.48:3-49 et al.).

1       3. (New section) a. The board shall develop, as part of the  
2 SREC-II program, a small solar facilities incentive program to  
3 award SREC-IIs to the owners of community solar facilities and net  
4 metered solar facilities less than five megawatts in size, as  
5 measured in direct current, or another size specified by the board.  
6 The small solar facilities incentive program shall aim to provide  
7 SREC-IIs for the generation of at least 300 megawatts of net-  
8 metered solar facilities per year and 150 megawatts of community  
9 solar facilities per year, for each of the five years after the  
10 establishment of the SREC-II program.

11       b. The board shall establish eligibility criteria and an application  
12 process by which an owner of a solar electric power generation  
13 facility may apply to receive SREC-IIs pursuant to this section,  
14 until the program reaches the energy generation target established  
15 by subsection a. of this section, as determined by the board. Only  
16 solar electric power generation facilities that receive permission to  
17 operate from the appropriate regional grid operator after the  
18 effective date of P.L. , c. (C. ) (pending before the  
19 Legislature as this bill), shall be eligible to receive SREC-IIs  
20 pursuant to this section, unless otherwise specified by the board. A  
21 facility shall be eligible to receive SREC-IIs pursuant to this section  
22 for a duration established by the board if it is connected to the  
23 distribution or transmission system owned or operated by a New  
24 Jersey public utility or local government unit.

25       c. The small solar facilities incentive program shall include  
26 criteria by which to assign an SREC-II value per megawatt-hour to a  
27 solar electric power generation facility. The criteria shall be designed  
28 by the board to incentivize the development of new solar power  
29 projects sufficiently so that the goals for solar power development in  
30 the State's Energy Master Plan are met, to further other State goals,  
31 and to incentivize projects that are especially in the public interest.  
32 The SREC-II value per megawatt-hour may include the value of the  
33 environmental and other benefits to the State provided by the  
34 facility, as determined by the board. The criteria may include, but is  
35 not limited to, consideration of the following factors:

36       (1) the size of the facility;

37       (2) the costs and revenues associated with representative facilities;

38       (3) for community solar facilities, the economic and demographic  
39 characteristics of the area served by the facility, including whether it is  
40 located in an overburdened community, as that term is defined in  
41 section 2 of P.L.2020, c.92 (C.13:1D-158);

42       (4) whether the facility is located on already developed land or the  
43 built environment;

44       (5) the facility's eligibility for net metering pursuant to subsection e.  
45 of section 38 of P.L.1999, c.23 (C.48:3-87) or participation in the  
46 community solar program established pursuant to subsection f. of  
47 section 5 of P.L.2018, c.17 (C.48:3-87.11); and

1 (6) the rate class of the facility, as determined by the appropriate  
2 New Jersey electric public utility or local government unit.

3  
4 4. (New section) a. The board shall develop and administer, as  
5 part of the SREC-II program, a transparent, fair, and competitive  
6 solicitation process for awarding SREC-II contracts to promote the  
7 construction of solar electric power generation facilities.

8 (1) In order to be eligible to participate in the solicitation process, a  
9 solar electric power generation facility shall be:

10 (a) a grid supply solar facility or net metered solar facility  
11 greater than five megawatts in size, as measured in direct current, or  
12 another size specified by the board;

13 (b) constructed after the effective date of P.L. , c. (C. )  
14 (pending before the Legislature as this bill);

15 (c) interconnected to a distribution or transmission system  
16 operated by a New Jersey electric public utility or local government  
17 unit; and

18 (d) sited in conformance with the siting criteria established by  
19 the board pursuant to section 6 of P.L. , c. (C. ) (pending  
20 before the Legislature as this bill).

21 (2) The board shall develop additional eligibility criteria and  
22 application processes for participation in the solicitation process.

23 b. The board may establish a system of distinct bidding  
24 categories within the competitive solicitation process set forth in  
25 this section, such that only bids from the same category compete  
26 with one another. The category system may take into account the  
27 size of the facility, location of the facility on a contaminated site or  
28 landfill, as determined by the board in consultation with the  
29 Department of Environmental Protection, or any other feature of a  
30 facility, provided that the category system enhances the continued  
31 diversification of the energy resources used to meet consumer  
32 demand in this State and results in environmental and public health  
33 benefits to New Jersey residents, as determined by the board. The  
34 board may revise the category system as it deems appropriate after  
35 each solicitation round.

36 c. Solicitation rounds shall occur at least as frequently as once  
37 every 18 months, beginning on the effective date of P.L. ,  
38 c. (C. ) (pending before the Legislature as this bill) and  
39 ending no earlier than January 1, 2026. The solicitation process  
40 shall:

41 (1) be open on a non-discriminatory basis to any entity seeking  
42 to construct a solar electric power generation facility that complies  
43 with the provisions of subsection a. of this section;

44 (2) be carried out in accordance with criteria developed by the  
45 board and applied equally to all responses to the solicitation;

46 (3) award contracts for SREC-IIs to promote the construction of  
47 solar electric power generation facilities for no less than an average  
48 of 300 megawatts per year, for five years, with the first awards

1 made no later than 18 months after the effective date P.L. ,  
2 c. (C. ) (pending before the Legislature as this bill);  
3 (4) award projects selected as part of the competitive solicitation  
4 process the right to receive a renewable energy incentive payment,  
5 in the form of an SREC-II value per megawatt-hour established by  
6 the board, for the environmental attribute produced by the solar  
7 electric power generation facility, for a duration to be established  
8 by the board. The SREC-II value per megawatt-hour may include  
9 the value of the environmental and other benefits to the State  
10 provided by the facility, as determined by the board;  
11 (5) ensure that the length of any award is sufficient to encourage  
12 low financing rates, reasonable risks to ratepayers, and to enable the  
13 development of affordable renewable energy resources;  
14 (6) mitigate price and delivery risks for consumers;  
15 (7) include requirements designed to ensure successful  
16 completion of projects, including, but not limited to, the imposition  
17 of appropriate escrow fees, bid maturity requirements, required  
18 interconnection milestones, and conditions on when a project must  
19 achieve commercial operation; and  
20 (8) ensure that the environmental and public health benefits of  
21 solar electric power generation facilities on contaminated sites or  
22 landfills are recognized, including accommodating the long  
23 development timescale for these projects.  
24 d. The board may establish confidential high and low bid  
25 thresholds prior to conducting a competitive solicitation pursuant to  
26 this section, provided that the thresholds promote fiscal  
27 responsibility for the State and the likelihood of successful bids, as  
28 determined by the board. The thresholds may include a cap on the  
29 renewable energy incentive payments required pursuant to  
30 paragraph (4) of subsection c. of this section. The board may also  
31 procure more than the minimum quantity of solar power required by  
32 this section if bids are below the predetermined bid threshold.  
33 e. The board shall determine, in consultation with the  
34 Department of Environmental Protection, if a solar electric power  
35 generation facility may be sited on a contaminated site or landfill  
36 for the purposes of this section. If the board authorizes a facility to  
37 be sited on a contaminated site or landfill, the facility shall be  
38 afforded the protections provided in paragraph (2) of subsection t.  
39 of section 38 of P.L.1999, c.23 (C.48:3-87).  
40 f. At the end of each bidding round, the board shall:  
41 (1) rank all bids received based on the bid price, or, pursuant to  
42 subsection b. of this section, based on the bid price within each  
43 category;  
44 (2) select bids in ranked order, up to the procurement budget set  
45 by the board, or, pursuant to subsection b. of this section, the  
46 procurement budget of each category; and

1 (3) adjust quantities awarded if prices are above or below any  
2 confidential pre-determined thresholds established pursuant to  
3 subsection d. of this section.

4 g. Any moneys placed in escrow by an applicant as part of the  
5 competitive solicitation process shall be reimbursed to the applicant  
6 in full or in part upon meeting the conditions set forth by the board  
7 when the board established the escrow requirement, including, but  
8 not limited to, selection in the competitive solicitation or  
9 commencement of commercial operation of the solar electric power  
10 generation facility. The escrow amount shall be forfeited to the  
11 General Fund if the facility does not meet the conditions set forth  
12 by the board when the board established the escrow requirement,  
13 including, but not limited to, commencing commercial operation  
14 within the term specified by the board's requirements established  
15 pursuant to paragraph (7) of subsection c. of this section, including  
16 any extensions as may be granted pursuant to procedures  
17 established by the board.

18 h. The costs of the competitive solicitation process, including  
19 the issuance of renewable energy incentive payments pursuant to  
20 paragraph (4) of subsection c. of this section, shall not be subject to  
21 the Class I renewable energy requirement cost cap established by  
22 paragraph (2) of subsection d. of section 38 of P.L.1999, c.23  
23 (C.48:3-87).

24  
25 5. (New section) a. No solar electric power generation facility  
26 shall simultaneously receive SREC-IIs pursuant to P.L. ,  
27 c. (C. ) (pending before the Legislature as this bill) and  
28 Class I RECs, SRECs, or any other comparable certificates,  
29 including those issued under a program developed by the board  
30 pursuant to P.L.2018, c.17 (C.48:3-87.8 et al.).

31 b. A solar electric power generation facility that receives an  
32 SREC-II pursuant to P.L. , c. (C. ) (pending before the  
33 Legislature as this bill) for a unit of energy produced shall not  
34 otherwise sell, alienate, or dispose of any of the environmental  
35 benefits or attributes associated with that energy.

36 c. A solar electric power generation facility that is selected by  
37 the board pursuant to section 4 of P.L. , c. (C. ) (pending  
38 before the Legislature as this bill) shall be responsible for the  
39 payment of:

40 (1) an annual remuneration of one percent of the renewable  
41 energy incentive payments pursuant to paragraph (4) of subsection  
42 c. of section 4 of P.L. , c. (C. ) (pending before the  
43 Legislature as this bill), to be submitted to the State Treasurer for  
44 deposit into the "Preserve New Jersey Fund Account," established  
45 pursuant to section 4 of P.L.2016, c.12 (C.13:8C-46); and

46 (2) an annual administrative fee, in an amount to be determined  
47 by the board in the rules and regulations adopted by the board

1 pursuant to section 2 of P.L. , c. (C. ) (pending before the  
2 Legislature as this bill).

3 d. Each worker employed in the State during the construction of  
4 a solar electric power generation facility greater than one megawatt  
5 in size, as measured in direct current, that participates in the SREC-  
6 II program shall be paid not less than the prevailing wage rate for  
7 the worker's craft or trade, as determined by the Commissioner of  
8 Labor and Workforce Development pursuant to P.L.1963, c.150  
9 (C.34:11-56.25 et seq.).

10 e. The issuance of SREC-IIs pursuant to P.L. , c. (C. )  
11 (pending before the Legislature as this bill) shall be deemed "Board  
12 of Public Utilities financial assistance" as provided under section 1  
13 of P.L.2009, c.89 (C.48:2-29.47).

14 f. The owner of a solar electric power generation facility that  
15 participates in the SREC-II program shall obtain all necessary  
16 permits and other approvals as may be required pursuant to federal,  
17 State, or local law, rule, regulation, or ordinance.

18 g. A solar electric power generation facility that is selected  
19 pursuant to section 4 of P.L. , c. (C. ) (pending before the  
20 Legislature as this bill) shall comply with the standards concerning  
21 vegetation adopted by the Department of Environmental Protection  
22 pursuant to section 8 of P.L. , c. (C. ) (pending before the  
23 Legislature as this bill).

24

25 6. (New section) a. The board shall not authorize a grid  
26 supply solar facility or a net metered solar facility greater than five  
27 megawatts in size to commence operation, or to interconnect to an  
28 electric distribution or transmission system, unless it meets the  
29 siting criteria developed pursuant to this section.

30 b. The board shall develop, in consultation with the Department  
31 of Environmental Protection and the Secretary of Agriculture, siting  
32 criteria for grid supply solar facilities and net metered solar  
33 facilities greater than five megawatts in size. In addition to  
34 implementing the provisions of subsections c. through e. of this  
35 section, the siting criteria shall:

36 (1) facilitate the State's commitment to affordable, clean, and  
37 renewable energy, and the carbon dioxide emissions reduction goals  
38 established by P.L.2007, c.112 (C.26:2C-37 et al.);

39 (2) minimize, as much as is practicable, potential adverse  
40 environmental impacts; and

41 (3) where appropriate, include consideration of:

42 (a) existing and prior land uses of the property;

43 (b) whether the property contains a contaminated site or landfill;

44 (c) any conservation or agricultural designations associated with  
45 the property;

46 (d) the amount of soil disturbance, impervious surface, and tree  
47 cover on the property; and

48 (e) other site-specific criteria.

- 1       c. Unless authorized pursuant to subsection e. of this section, a  
2 grid supply solar facility shall not be sited on:
- 3       (1) land preserved under the Green Acres Program;
- 4       (2) land located within the preservation area of the pinelands  
5 area, as designated in subsection b. of section 10 of P.L.1979, c.111  
6 (C.13:18A-11);
- 7       (3) land designated as forest area in the pinelands comprehensive  
8 management plan adopted pursuant to P.L.1979, c.111 (C.13:18A-1  
9 et seq.);
- 10       (4) land designated as freshwater wetlands as defined pursuant to  
11 P.L.1987, c.156 (C.13:9B-1 et seq.), or coastal wetlands as defined  
12 pursuant to P.L.1970, c.272 (C.13:9A-1 et seq.);
- 13       (5) lands located within the Highlands preservation area as  
14 designated in subsection b. of section 7 of P.L.2004, c.120  
15 (C.13:20-7);
- 16       (6) forested lands, as defined by the board in consultation with  
17 the Department of Environmental Protection; or
- 18       (7) prime agricultural soils and soils of statewide importance, as  
19 identified by the United States Department of Agriculture's Natural  
20 Resources Conservation Service, which are located in Agricultural  
21 Development Areas certified by the State Agriculture Development  
22 Committee.
- 23       d. (1) In no case shall a grid supply solar facility be located on  
24 preserved farmland.
- 25       (2) Nothing in P.L. , c. (C. ) (pending before the  
26 Legislature as this bill) shall be construed to affect the provisions of  
27 P.L.2009, c.213 (C.4:1C-32.4 et al.), including those related to the  
28 construction of solar electric power generation facilities on  
29 preserved farmland.
- 30       e. A developer may petition the board for a waiver to site a  
31 solar power electric generation facility in an area proscribed by  
32 subsection c. of this section. The petition shall set out the unique  
33 factors that make the project consistent with the character of the  
34 specific parcel, including whether the property is a contaminated  
35 site or landfill, otherwise marginal land, or whether the project  
36 utilizes existing development or existing areas of impervious  
37 coverage. The board shall, in consultation with the Department of  
38 Environmental Protection or Secretary of Agriculture, as  
39 appropriate, consider the petition and may grant a waiver to a  
40 project deemed to be in the public interest. However, in no case  
41 shall the projects approved by the board pursuant to this section  
42 occupy more than five percent of the unpreserved land containing  
43 prime agricultural soils and soils of statewide importance, as  
44 identified by the United States Department of Agriculture's Natural  
45 Resources Conservation Service, located within any county's  
46 designated Agricultural Development Area, as determined by the  
47 State Agriculture Development Committee.

1 f. No later than five years after the adoption of rules and  
2 regulations pursuant to section 2 of P.L. , c. (C. ) (pending  
3 before the Legislature as this bill), the board, in consultation with  
4 the Department of Environmental Protection and the Secretary of  
5 Agriculture, shall conduct a review of the rules and regulations to  
6 assess program performance, identify problems, and recommend  
7 changes to the siting criteria to better effectuate the policy goals set  
8 forth in subsection a. of this section. The board shall prepare a  
9 report summarizing this review and submit it to the Governor and to  
10 the Legislature pursuant to section 2 of P.L.1991, c.164 (C.52:14-  
11 19.1).

12  
13 7. (New section) The board shall submit a report on the SREC-  
14 II program to the Governor and, pursuant to section 2 of P.L.1991,  
15 c.164 (C.52:14-19.1), to the Legislature no later than 12 months  
16 after the adoption of rules and regulations pursuant to section 2 of  
17 P.L. , c. (C. ) (pending before the Legislature as this bill),  
18 and annually thereafter. The report shall include, but not be limited  
19 to:

20 a. information about the number and price of SREC-IIIs  
21 distributed;

22 b. information about the progress of the program towards  
23 meeting its solar energy generation goals, including the individual  
24 goals for net-metered solar facilities, community solar facilities,  
25 and grid supply solar facilities;

26 c. an assessment of the competitive solicitation process,  
27 including any recommendations to improve the functioning of the  
28 program; and

29 d. a summary of the siting criteria developed pursuant to  
30 section 6 of P.L. , c. (C. ) (pending before the Legislature  
31 as this bill), including any recommendations to improve the criteria.

32  
33 8. (New section) No later than one year after the effective date  
34 of P.L. , c. (C. ) (pending before the Legislature as this  
35 bill), the Department of Environmental Protection, in consultation  
36 with the board, shall establish standards for the use of pollinator-  
37 friendly native plant species and seed mixes in grid supply solar  
38 facilities, which are designed to reduce stormwater runoff and  
39 erosion, and provide native perennial vegetation and foraging  
40 habitat beneficial to gamebirds, songbirds, and pollinators, and  
41 which consider compatibility with the security and reliability of  
42 grid supply solar facilities.

43  
44 9. Section 3 of P.L.1999, c.23 (C.48:3-51) is amended to read  
45 as follows:

46 3. As used in P.L.1999, c.23 (C.48:3-49 et al.):

47 "Assignee" means a person to which an electric public utility or  
48 another assignee assigns, sells, or transfers, other than as security,

1 all or a portion of its right to or interest in bondable transition  
2 property. Except as specifically provided in P.L.1999, c.23  
3 (C.48:3-49 et al.), an assignee shall not be subject to the public  
4 utility requirements of Title 48 or any rules or regulations adopted  
5 pursuant thereto.

6 "Base load electric power generation facility" means an electric  
7 power generation facility intended to be operated at a greater than  
8 50 percent capacity factor including, but not limited to, a combined  
9 cycle power facility and a combined heat and power facility.

10 "Base residual auction" means the auction conducted by PJM, as  
11 part of PJM's reliability pricing model, three years prior to the start  
12 of the delivery year to secure electrical capacity as necessary to  
13 satisfy the capacity requirements for that delivery year.

14 "Basic gas supply service" means gas supply service that is  
15 provided to any customer that has not chosen an alternative gas  
16 supplier, whether or not the customer has received offers as to  
17 competitive supply options, including, but not limited to, any  
18 customer that cannot obtain such service for any reason, including  
19 non-payment for services. Basic gas supply service is not a  
20 competitive service and shall be fully regulated by the board.

21 "Basic generation service" or "BGS" means electric generation  
22 service that is provided, to any customer that has not chosen an  
23 alternative electric power supplier, whether or not the customer has  
24 received offers for competitive supply options, including, but not  
25 limited to, any customer that cannot obtain such service from an  
26 electric power supplier for any reason, including non-payment for  
27 services. Basic generation service is not a competitive service and  
28 shall be fully regulated by the board.

29 "Basic generation service provider" or "provider" means a  
30 provider of basic generation service.

31 "Basic generation service transition costs" means the amount by  
32 which the payments by an electric public utility for the procurement  
33 of power for basic generation service and related ancillary and  
34 administrative costs exceeds the net revenues from the basic  
35 generation service charge established by the board pursuant to  
36 section 9 of P.L.1999, c.23 (C.48:3-57) during the transition period,  
37 together with interest on the balance at the board-approved rate, that  
38 is reflected in a deferred balance account approved by the board in  
39 an order addressing the electric public utility's unbundled rates,  
40 stranded costs, and restructuring filings pursuant to P.L.1999, c.23  
41 (C.48:3-49 et al.). Basic generation service transition costs shall  
42 include, but are not limited to, costs of purchases from the spot  
43 market, bilateral contracts, contracts with non-utility generators,  
44 parting contracts with the purchaser of the electric public utility's  
45 divested generation assets, short-term advance purchases, and  
46 financial instruments such as hedging, forward contracts, and  
47 options. Basic generation service transition costs shall also include  
48 the payments by an electric public utility pursuant to a competitive

1 procurement process for basic generation service supply during the  
2 transition period, and costs of any such process used to procure the  
3 basic generation service supply.

4 "Board" means the New Jersey Board of Public Utilities or any  
5 successor agency.

6 "Bondable stranded costs" means any stranded costs or basic  
7 generation service transition costs of an electric public utility  
8 approved by the board for recovery pursuant to the provisions of  
9 P.L.1999, c.23 (C.48:3-49 et al.), together with, as approved by the  
10 board: (1) the cost of retiring existing debt or equity capital of the  
11 electric public utility, including accrued interest, premium and other  
12 fees, costs, and charges relating thereto, with the proceeds of the  
13 financing of bondable transition property; (2) if requested by an  
14 electric public utility in its application for a bondable stranded costs  
15 rate order, federal, State, and local tax liabilities associated with  
16 stranded costs recovery, basic generation service transition cost  
17 recovery, or the transfer or financing of the property, or both,  
18 including taxes, whose recovery period is modified by the effect of  
19 a stranded costs recovery order, a bondable stranded costs rate  
20 order, or both; and (3) the costs incurred to issue, service, or  
21 refinance transition bonds, including interest, acquisition, or  
22 redemption premium, and other financing costs, whether paid upon  
23 issuance or over the life of the transition bonds, including, but not  
24 limited to, credit enhancements, service charges,  
25 overcollateralization, interest rate cap, swap or collar, yield  
26 maintenance, maturity guarantee or other hedging agreements,  
27 equity investments, operating costs, and other related fees, costs,  
28 and charges, or to assign, sell, or otherwise transfer bondable  
29 transition property.

30 "Bondable stranded costs rate order" means one or more  
31 irrevocable written orders issued by the board pursuant to P.L.1999,  
32 c.23 (C.48:3-49 et al.) which determines the amount of bondable  
33 stranded costs and the initial amount of transition bond charges  
34 authorized to be imposed to recover the bondable stranded costs,  
35 including the costs to be financed from the proceeds of the  
36 transition bonds, as well as on-going costs associated with servicing  
37 and credit enhancing the transition bonds, and provides the electric  
38 public utility specific authority to issue or cause to be issued,  
39 directly or indirectly, transition bonds through a financing entity  
40 and related matters as provided in P.L.1999, c.23 (C.48:3-49 et al.),  
41 which order shall become effective immediately upon the written  
42 consent of the related electric public utility to the order as provided  
43 in P.L.1999, c.23 (C.48:3-49 et al.).

44 "Bondable transition property" means the property consisting of  
45 the irrevocable right to charge, collect, and receive, and be paid  
46 from collections of, transition bond charges in the amount necessary  
47 to provide for the full recovery of bondable stranded costs which  
48 are determined to be recoverable in a bondable stranded costs rate

1 order, all rights of the related electric public utility under the  
2 bondable stranded costs rate order including, without limitation, all  
3 rights to obtain periodic adjustments of the related transition bond  
4 charges pursuant to subsection b. of section 15 of P.L.1999, c.23  
5 (C.48:3-64), and all revenues, collections, payments, money, and  
6 proceeds arising under, or with respect to, all of the foregoing.

7 "British thermal unit" or "Btu" means the amount of heat  
8 required to increase the temperature of one pound of water by one  
9 degree Fahrenheit.

10 "Broker" means a duly licensed electric power supplier that  
11 assumes the contractual and legal responsibility for the sale of  
12 electric generation service, transmission, or other services to end-  
13 use retail customers, but does not take title to any of the power sold,  
14 or a duly licensed gas supplier that assumes the contractual and  
15 legal obligation to provide gas supply service to end-use retail  
16 customers, but does not take title to the gas.

17 "Brownfield" means any former or current commercial or  
18 industrial site that is currently vacant or underutilized and on which  
19 there has been, or there is suspected to have been, a discharge of a  
20 contaminant.

21 "Buydown" means an arrangement or arrangements involving the  
22 buyer and seller in a given power purchase contract and, in some  
23 cases third parties, for consideration to be given by the buyer in  
24 order to effectuate a reduction in the pricing, or the restructuring of  
25 other terms to reduce the overall cost of the power contract, for the  
26 remaining succeeding period of the purchased power arrangement  
27 or arrangements.

28 "Buyout" means an arrangement or arrangements involving the  
29 buyer and seller in a given power purchase contract and, in some  
30 cases third parties, for consideration to be given by the buyer in  
31 order to effectuate a termination of such power purchase contract.

32 "Class I renewable energy" means electric energy produced from  
33 solar technologies, photovoltaic technologies, wind energy, fuel  
34 cells, geothermal technologies, wave or tidal action, small scale  
35 hydropower facilities with a capacity of three megawatts or less and  
36 put into service after the effective date of P.L.2012, c.24, methane  
37 gas from landfills, methane gas from a biomass facility provided  
38 that the biomass is cultivated and harvested in a sustainable manner,  
39 or methane gas from a composting or anaerobic or aerobic digestion  
40 facility that converts food waste or other organic waste to energy.

41 "Class II renewable energy" means electric energy produced at a  
42 hydropower facility with a capacity of greater than three megawatts,  
43 but less than 30 megawatts, or a resource recovery facility, provided  
44 that the facility is located where retail competition is permitted and  
45 provided further that the Commissioner of Environmental  
46 Protection has determined that the facility meets the highest  
47 environmental standards and minimizes any impacts to the  
48 environment and local communities. Class II renewable energy

1 shall not include electric energy produced at a hydropower facility  
2 with a capacity of greater than 30 megawatts on or after the  
3 effective date of P.L.2015, c.51.

4 "Co-generation" means the sequential production of electricity  
5 and steam or other forms of useful energy used for industrial or  
6 commercial heating and cooling purposes.

7 "Combined cycle power facility" means a generation facility that  
8 combines two or more thermodynamic cycles, by producing electric  
9 power via the combustion of fuel and then routing the resulting  
10 waste heat by-product to a conventional boiler or to a heat recovery  
11 steam generator for use by a steam turbine to produce electric  
12 power, thereby increasing the overall efficiency of the generating  
13 facility.

14 "Combined heat and power facility" or "co-generation facility"  
15 means a generation facility which produces electric energy and  
16 steam or other forms of useful energy such as heat, which are used  
17 for industrial or commercial heating or cooling purposes. A  
18 combined heat and power facility or co-generation facility shall not  
19 be considered a public utility.

20 "Competitive service" means any service offered by an electric  
21 public utility or a gas public utility that the board determines to be  
22 competitive pursuant to section 8 or section 10 of P.L.1999, c.23  
23 (C.48:3-56 or C.48:3-58) or that is not regulated by the board.

24 "Commercial and industrial energy pricing class customer" or  
25 "CIEP class customer" means that group of non-residential  
26 customers with high peak demand, as determined by periodic board  
27 order, which either is eligible or which would be eligible, as  
28 determined by periodic board order, to receive funds from the Retail  
29 Margin Fund established pursuant to section 9 of P.L.1999, c.23  
30 (C.48:3-57) and for which basic generation service is hourly-priced.

31 "Comprehensive resource analysis" means an analysis including,  
32 but not limited to, an assessment of existing market barriers to the  
33 implementation of energy efficiency and renewable technologies  
34 that are not or cannot be delivered to customers through a  
35 competitive marketplace.

36 "Community solar facility" means a solar electric power generation  
37 facility participating in the Community Solar Energy Pilot Program or  
38 the Community Solar Energy Program developed by the board  
39 pursuant to section 5 of P.L.2018, c.17 (C.48:3-87.11).

40 "Connected to the distribution system" means, for a solar electric  
41 power generation facility, that the facility is: (1) connected to a net  
42 metering customer's side of a meter, regardless of the voltage at  
43 which that customer connects to the electric grid; (2) an on-site  
44 generation facility; (3) qualified for net metering aggregation as  
45 provided pursuant to paragraph (4) of subsection e. of section 38 of  
46 P.L.1999, c.23 (C.48:3-87); (4) owned or operated by an electric  
47 public utility and approved by the board pursuant to section 13 of  
48 P.L.2007, c.340 (C.48:3-98.1); (5) directly connected to the electric

1 grid at 69 kilovolts or less, regardless of how an electric public  
2 utility classifies that portion of its electric grid, and is designated as  
3 "connected to the distribution system" by the board pursuant to  
4 subsections q. through s. of section 38 of P.L.1999, c.23 (C.48:3-  
5 87); or (6) is certified by the board, in consultation with the  
6 Department of Environmental Protection, as being located on a  
7 brownfield, on an area of historic fill, or on a properly closed  
8 sanitary landfill facility. Any solar electric power generation  
9 facility, other than that of a net metering customer on the customer's  
10 side of the meter, connected above 69 kilovolts shall not be  
11 considered connected to the distribution system.

12 "Contaminated site or landfill" means: (1) any currently  
13 contaminated portion of a property on which industrial or  
14 commercial operations were conducted and a discharge occurred,  
15 and its associated disturbed areas, where "discharge" means the  
16 same as the term is defined in section 23 of P.L.1993, c.139  
17 (C.58:10B-1); or (2) a properly closed sanitary landfill facility and  
18 its associated disturbed areas.

19 "Customer" means any person that is an end user and is  
20 connected to any part of the transmission and distribution system  
21 within an electric public utility's service territory or a gas public  
22 utility's service territory within this State.

23 "Customer account service" means metering, billing, or such  
24 other administrative activity associated with maintaining a customer  
25 account.

26 "Delivery year" or "DY" means the 12-month period from June  
27 1st through May 31st, numbered according to the calendar year in  
28 which it ends.

29 "Demand side management" means the management of customer  
30 demand for energy service through the implementation of cost-  
31 effective energy efficiency technologies, including, but not limited  
32 to, installed conservation, load management, and energy efficiency  
33 measures on and in the residential, commercial, industrial,  
34 institutional, and governmental premises and facilities in this State.

35 "Electric generation service" means the provision of retail  
36 electric energy and capacity which is generated off-site from the  
37 location at which the consumption of such electric energy and  
38 capacity is metered for retail billing purposes, including agreements  
39 and arrangements related thereto.

40 "Electric power generator" means an entity that proposes to  
41 construct, own, lease, or operate, or currently owns, leases, or  
42 operates, an electric power production facility that will sell or does  
43 sell at least 90 percent of its output, either directly or through a  
44 marketer, to a customer or customers located at sites that are not on  
45 or contiguous to the site on which the facility will be located or is  
46 located. The designation of an entity as an electric power generator  
47 for the purposes of P.L.1999, c.23 (C.48:3-49 et al.) shall not, in  
48 and of itself, affect the entity's status as an exempt wholesale

1 generator under the Public Utility Holding Company Act of 1935,  
2 15 U.S.C. s.79 et seq., or its successor act.

3 "Electric power supplier" means a person or entity that is duly  
4 licensed pursuant to the provisions of P.L.1999, c.23 (C.48:3-49 et  
5 al.) to offer and to assume the contractual and legal responsibility to  
6 provide electric generation service to retail customers, and includes  
7 load serving entities, marketers, and brokers that offer or provide  
8 electric generation service to retail customers. The term excludes  
9 an electric public utility that provides electric generation service  
10 only as a basic generation service pursuant to section 9 of P.L.1999,  
11 c.23 (C.48:3-57).

12 "Electric public utility" means a public utility, as that term is  
13 defined in R.S.48:2-13, that transmits and distributes electricity to  
14 end users within this State.

15 "Electric related service" means a service that is directly related  
16 to the consumption of electricity by an end user, including, but not  
17 limited to, the installation of demand side management measures at  
18 the end user's premises, the maintenance, repair, or replacement of  
19 appliances, lighting, motors, or other energy-consuming devices at  
20 the end user's premises, and the provision of energy consumption  
21 measurement and billing services.

22 "Electronic signature" means an electronic sound, symbol, or  
23 process, attached to, or logically associated with, a contract or other  
24 record, and executed or adopted by a person with the intent to sign  
25 the record.

26 "Eligible generator" means a developer of a base load or mid-  
27 merit electric power generation facility including, but not limited to,  
28 an on-site generation facility that qualifies as a capacity resource  
29 under PJM criteria and that commences construction after the  
30 effective date of P.L.2011, c.9 (C.48:3-98.2 et al.).

31 "Energy agent" means a person that is duly registered pursuant to  
32 the provisions of P.L.1999, c.23 (C.48:3-49 et al.), that arranges the  
33 sale of retail electricity or electric related services, or retail gas  
34 supply or gas related services, between government aggregators or  
35 private aggregators and electric power suppliers or gas suppliers,  
36 but does not take title to the electric or gas sold.

37 "Energy consumer" means a business or residential consumer of  
38 electric generation service or gas supply service located within the  
39 territorial jurisdiction of a government aggregator.

40 "Energy efficiency portfolio standard" means a requirement to  
41 procure a specified amount of energy efficiency or demand side  
42 management resources as a means of managing and reducing energy  
43 usage and demand by customers.

44 "Energy year" or "EY" means the 12-month period from June 1st  
45 through May 31st, numbered according to the calendar year in  
46 which it ends.

47 "Existing business relationship" means a relationship formed by  
48 a voluntary two-way communication between an electric power

1 supplier, gas supplier, broker, energy agent, marketer, private  
2 aggregator, sales representative, or telemarketer and a customer,  
3 regardless of an exchange of consideration, on the basis of an  
4 inquiry, application, purchase, or transaction initiated by the  
5 customer regarding products or services offered by the electric  
6 power supplier, gas supplier, broker, energy agent, marketer,  
7 private aggregator, sales representative, or telemarketer; however, a  
8 consumer's use of electric generation service or gas supply service  
9 through the consumer's electric public utility or gas public utility  
10 shall not constitute or establish an existing business relationship for  
11 the purpose of P.L.2013, c.263.

12 "Farmland" means land actively devoted to agricultural or  
13 horticultural use that is valued, assessed, and taxed pursuant to the  
14 "Farmland Assessment Act of 1964," P.L.1964, c.48 (C.54:4-23.1 et  
15 seq.).

16 "Federal Energy Regulatory Commission" or "FERC" means the  
17 federal agency established pursuant to 42 U.S.C. s.7171 et seq. to  
18 regulate the interstate transmission of electricity, natural gas, and  
19 oil.

20 "Final remediation document" shall have the same meaning as  
21 provided in section 3 of P.L.1976, c.141 (C.58:10-23.11b).

22 "Financing entity" means an electric public utility, a special  
23 purpose entity, or any other assignee of bondable transition  
24 property, which issues transition bonds. Except as specifically  
25 provided in P.L.1999, c.23 (C.48:3-49 et al.), a financing entity  
26 which is not itself an electric public utility shall not be subject to  
27 the public utility requirements of Title 48 of the Revised Statutes or  
28 any rules or regulations adopted pursuant thereto.

29 "Gas public utility" means a public utility, as that term is defined  
30 in R.S.48:2-13, that distributes gas to end users within this State.

31 "Gas related service" means a service that is directly related to  
32 the consumption of gas by an end user, including, but not limited to,  
33 the installation of demand side management measures at the end  
34 user's premises, the maintenance, repair or replacement of  
35 appliances or other energy-consuming devices at the end user's  
36 premises, and the provision of energy consumption measurement  
37 and billing services.

38 "Gas supplier" means a person that is duly licensed pursuant to  
39 the provisions of P.L.1999, c.23 (C.48:3-49 et al.) to offer and  
40 assume the contractual and legal obligation to provide gas supply  
41 service to retail customers, and includes, but is not limited to,  
42 marketers and brokers. A non-public utility affiliate of a public  
43 utility holding company may be a gas supplier, but a gas public  
44 utility or any subsidiary of a gas utility is not a gas supplier. In the  
45 event that a gas public utility is not part of a holding company legal  
46 structure, a related competitive business segment of that gas public  
47 utility may be a gas supplier, provided that related competitive  
48 business segment is structurally separated from the gas public

1 utility, and provided that the interactions between the gas public  
2 utility and the related competitive business segment are subject to  
3 the affiliate relations standards adopted by the board pursuant to  
4 subsection k. of section 10 of P.L.1999, c.23 (C.48:3-58).

5 "Gas supply service" means the provision to customers of the  
6 retail commodity of gas, but does not include any regulated  
7 distribution service.

8 "Government aggregator" means any government entity subject  
9 to the requirements of the "Local Public Contracts Law," P.L.1971,  
10 c.198 (C.40A:11-1 et seq.), the "Public School Contracts Law,"  
11 N.J.S.18A:18A-1 et seq., or the "County College Contracts Law,"  
12 P.L.1982, c.189 (C.18A:64A-25.1 et seq.), that enters into a written  
13 contract with a licensed electric power supplier or a licensed gas  
14 supplier for: (1) the provision of electric generation service, electric  
15 related service, gas supply service, or gas related service for its own  
16 use or the use of other government aggregators; or (2) if a  
17 municipal or county government, the provision of electric  
18 generation service or gas supply service on behalf of business or  
19 residential customers within its territorial jurisdiction.

20 "Government energy aggregation program" means a program and  
21 procedure pursuant to which a government aggregator enters into a  
22 written contract for the provision of electric generation service or  
23 gas supply service on behalf of business or residential customers  
24 within its territorial jurisdiction.

25 "Governmental entity" means any federal, state, municipal, local,  
26 or other governmental department, commission, board, agency,  
27 court, authority, or instrumentality having competent jurisdiction.

28 "Green Acres program" means the program for the acquisition of  
29 lands for recreation and conservation purposes pursuant to  
30 P.L.1961, c.45 (C.13:8A-1 et seq.), P.L.1971, c.419 (C.13:8A-19 et  
31 seq.), P.L.1975, c.155 (C.13:8A-35 et seq.), any Green Acres bond  
32 act, P.L.1999, c.152 (C.13:8C-1 et seq.), and P.L.2016, c.12  
33 (C.13:8C-43 et seq.)

34 "Greenhouse gas emissions portfolio standard" means a  
35 requirement that addresses or limits the amount of carbon dioxide  
36 emissions indirectly resulting from the use of electricity as applied  
37 to any electric power suppliers and basic generation service  
38 providers of electricity.

39 "Grid supply solar facility" means a solar electric power  
40 generation facility that sells electricity at wholesale and is  
41 connected to the State's electric distribution or transmission  
42 systems. "Grid supply solar facility" does not include: (1) a net  
43 metered solar facility; (2) an on-site generation facility; (3) a  
44 facility participating in net metering aggregation pursuant to section  
45 38 of P.L.1999, c.23 (C.48:3-87); (4) a facility participating in  
46 remote net metering; or (5) a community solar facility.

47 "Historic fill" means generally large volumes of non-indigenous  
48 material, no matter what date they were emplaced on the site, used

1 to raise the topographic elevation of a site, which were  
2 contaminated prior to emplacement and are in no way connected  
3 with the operations at the location of emplacement and which  
4 include, but are not limited to, construction debris, dredge spoils,  
5 incinerator residue, demolition debris, fly ash, and non-hazardous  
6 solid waste. "Historic fill" shall not include any material which is  
7 substantially chromate chemical production waste or any other  
8 chemical production waste or waste from processing of metal or  
9 mineral ores, residues, slags, or tailings.

10 "Incremental auction" means an auction conducted by PJM, as  
11 part of PJM's reliability pricing model, prior to the start of the  
12 delivery year to secure electric capacity as necessary to satisfy the  
13 capacity requirements for that delivery year, that is not otherwise  
14 provided for in the base residual auction.

15 "Leakage" means an increase in greenhouse gas emissions  
16 related to generation sources located outside of the State that are not  
17 subject to a state, interstate, or regional greenhouse gas emissions  
18 cap or standard that applies to generation sources located within the  
19 State.

20 "Locational deliverability area" or "LDA" means one or more of  
21 the zones within the PJM region which are used to evaluate area  
22 transmission constraints and reliability issues including electric  
23 public utility company zones, sub-zones, and combinations of  
24 zones.

25 "Long-term capacity agreement pilot program" or "LCAPP"  
26 means a pilot program established by the board that includes  
27 participation by eligible generators, to seek offers for financially-  
28 settled standard offer capacity agreements with eligible generators  
29 pursuant to the provisions of P.L.2011, c.9 (C.48:3-98.2 et al.).

30 "Market transition charge" means a charge imposed pursuant to  
31 section 13 of P.L.1999, c.23 (C.48:3-61) by an electric public  
32 utility, at a level determined by the board, on the electric public  
33 utility customers for a limited duration transition period to recover  
34 stranded costs created as a result of the introduction of electric  
35 power supply competition pursuant to the provisions of P.L.1999,  
36 c.23 (C.48:3-49 et al.).

37 "Marketer" means a duly licensed electric power supplier that  
38 takes title to electric energy and capacity, transmission, and other  
39 services from electric power generators and other wholesale  
40 suppliers and then assumes the contractual and legal obligation to  
41 provide electric generation service, and may include transmission  
42 and other services, to an end-use retail customer or customers, or a  
43 duly licensed gas supplier that takes title to gas and then assumes  
44 the contractual and legal obligation to provide gas supply service to  
45 an end-use customer or customers.

46 "Mid-merit electric power generation facility" means a  
47 generation facility that operates at a capacity factor between  
48 baseload generation facilities and peaker generation facilities.

1     "Net metered solar facility" means a solar electric power generation  
2     facility participating in the net metering program developed by the  
3     board pursuant to subsection e. of section 38 of P.L.1999, c.23  
4     (C.48:3-87) or in a substantially similar program operated by a  
5     utility owned or operated by a local government unit.

6     "Net metering aggregation" means a procedure for calculating  
7     the combination of the annual energy usage for all facilities owned  
8     by a single customer where such customer is a State entity, school  
9     district, county, county agency, county authority, municipality,  
10    municipal agency, or municipal authority, and which are served by  
11    a solar electric power generating facility as provided pursuant to  
12    paragraph (4) of subsection e. of section 38 of P.L.1999, c.23  
13    (C.48:3-87).

14    "Net proceeds" means proceeds less transaction and other related  
15    costs as determined by the board.

16    "Net revenues" means revenues less related expenses, including  
17    applicable taxes, as determined by the board.

18    "Offshore wind energy" means electric energy produced by a  
19    qualified offshore wind project.

20    "Offshore wind renewable energy certificate" or "OREC" means  
21    a certificate, issued by the board or its designee, representing the  
22    environmental attributes of one megawatt hour of electric  
23    generation from a qualified offshore wind project.

24    "Off-site end use thermal energy services customer" means an  
25    end use customer that purchases thermal energy services from an  
26    on-site generation facility, combined heat and power facility, or co-  
27    generation facility, and that is located on property that is separated  
28    from the property on which the on-site generation facility,  
29    combined heat and power facility, or co-generation facility is  
30    located by more than one easement, public thoroughfare, or  
31    transportation or utility-owned right-of-way.

32    "On-site generation facility" means a generation facility,  
33    including, but not limited to, a generation facility that produces  
34    Class I or Class II renewable energy, and equipment and services  
35    appurtenant to electric sales by such facility to the end use customer  
36    located on the property or on property contiguous to the property on  
37    which the end user is located. An on-site generation facility shall  
38    not be considered a public utility. The property of the end use  
39    customer and the property on which the on-site generation facility is  
40    located shall be considered contiguous if they are geographically  
41    located next to each other, but may be otherwise separated by an  
42    easement, public thoroughfare, transportation or utility-owned  
43    right-of-way, or if the end use customer is purchasing thermal  
44    energy services produced by the on-site generation facility, for use  
45    for heating or cooling, or both, regardless of whether the customer  
46    is located on property that is separated from the property on which  
47    the on-site generation facility is located by more than one easement,  
48    public thoroughfare, or transportation or utility-owned right-of-way.

1 "Open access offshore wind transmission facility" means an open  
2 access transmission facility, located either in the Atlantic Ocean or  
3 offshore, used to facilitate the collection of offshore wind energy or  
4 its delivery to the electronic transmission system in this State.

5 "Person" means an individual, partnership, corporation,  
6 association, trust, limited liability company, governmental entity, or  
7 other legal entity.

8 "PJM Interconnection, L.L.C." or "PJM" means the privately-  
9 held, limited liability corporation that serves as a FERC-approved  
10 Regional Transmission Organization, or its successor, that manages  
11 the regional, high-voltage electricity grid serving all or parts of 13  
12 states including New Jersey and the District of Columbia, operates  
13 the regional competitive wholesale electric market, manages the  
14 regional transmission planning process, and establishes systems and  
15 rules to ensure that the regional and in-State energy markets operate  
16 fairly and efficiently.

17 "Preliminary assessment" shall have the same meaning as  
18 provided in section 3 of P.L.1976, c.141 (C.58:10-23.11b).

19 "Preserved farmland" means land on which a development  
20 easement was conveyed to, or retained by, the State Agriculture  
21 Development Committee, a county agriculture development board,  
22 or a qualifying tax exempt nonprofit organization pursuant to the  
23 provisions of section 24 of P.L.1983, c.32 (C.4:1C-31), section 5 of  
24 P.L.1988, c.4 (C.4:1C-31.1), section 1 of P.L.1989, c.28 (C.4:1C-  
25 38), section 1 of P.L.1999, c.180 (C.4:1C-43.1), sections 37 through  
26 40 of P.L.1999, c.152 (C.13:8C-37 through C.13:8C-40), or any  
27 other State law enacted for farmland preservation purposes.

28 "Private aggregator" means a non-government aggregator that is  
29 a duly-organized business or non-profit organization authorized to  
30 do business in this State that enters into a contract with a duly  
31 licensed electric power supplier for the purchase of electric energy  
32 and capacity, or with a duly licensed gas supplier for the purchase  
33 of gas supply service, on behalf of multiple end-use customers by  
34 combining the loads of those customers.

35 "Properly closed sanitary landfill facility" means a sanitary  
36 landfill facility, or a portion of a sanitary landfill facility, for which  
37 performance is complete with respect to all activities associated  
38 with the design, installation, purchase, or construction of all  
39 measures, structures, or equipment required by the Department of  
40 Environmental Protection, pursuant to law, in order to prevent,  
41 minimize, or monitor pollution or health hazards resulting from a  
42 sanitary landfill facility subsequent to the termination of operations  
43 at any portion thereof, including, but not necessarily limited to, the  
44 placement of earthen or vegetative cover, and the installation of  
45 methane gas vents or monitors and leachate monitoring wells or  
46 collection systems at the site of any sanitary landfill facility.

47 "Public utility holding company" means: (1) any company that,  
48 directly or indirectly, owns, controls, or holds with power to vote,

1 10 percent or more of the outstanding voting securities of an  
2 electric public utility or a gas public utility or of a company which  
3 is a public utility holding company by virtue of this definition,  
4 unless the Securities and Exchange Commission, or its successor,  
5 by order declares such company not to be a public utility holding  
6 company under the Public Utility Holding Company Act of 1935,  
7 15 U.S.C. s.79 et seq., or its successor; or (2) any person that the  
8 Securities and Exchange Commission, or its successor, determines,  
9 after notice and opportunity for hearing, directly or indirectly, to  
10 exercise, either alone or pursuant to an arrangement or  
11 understanding with one or more other persons, such a controlling  
12 influence over the management or policies of an electric public  
13 utility or a gas public utility or public utility holding company as to  
14 make it necessary or appropriate in the public interest or for the  
15 protection of investors or consumers that such person be subject to  
16 the obligations, duties, and liabilities imposed in the Public Utility  
17 Holding Company Act of 1935, 15 U.S.C. s.79 et seq., or its  
18 successor act.

19 "Qualified offshore wind project" means a wind turbine  
20 electricity generation facility in the Atlantic Ocean and connected  
21 to the electric transmission system in this State, and includes the  
22 associated transmission-related interconnection facilities and  
23 equipment, and approved by the board pursuant to section 3 of  
24 P.L.2010, c.57 (C.48:3-87.1).

25 "Registration program" means an administrative process  
26 developed by the board pursuant to subsection u. of section 38 of  
27 P.L.1999, c.23 (C.48:3-87) that requires all owners of solar electric  
28 power generation facilities connected to the distribution system that  
29 intend to generate SRECs, to file with the board documents  
30 detailing the size, location, interconnection plan, land use, and other  
31 project information as required by the board.

32 "Regulatory asset" means an asset recorded on the books of an  
33 electric public utility or gas public utility pursuant to the Statement  
34 of Financial Accounting Standards, No. 71, entitled "Accounting for  
35 the Effects of Certain Types of Regulation," or any successor  
36 standard and as deemed recoverable by the board.

37 "Related competitive business segment of an electric public  
38 utility or gas public utility" means any business venture of an  
39 electric public utility or gas public utility including, but not limited  
40 to, functionally separate business units, joint ventures, and  
41 partnerships, that offers to provide or provides competitive services.

42 "Related competitive business segment of a public utility holding  
43 company" means any business venture of a public utility holding  
44 company, including, but not limited to, functionally separate  
45 business units, joint ventures, and partnerships and subsidiaries, that  
46 offers to provide or provides competitive services, but does not  
47 include any related competitive business segments of an electric  
48 public utility or gas public utility.

1 "Reliability pricing model" or "RPM" means PJM's capacity-  
2 market model, and its successors, that secures capacity on behalf of  
3 electric load serving entities to satisfy load obligations not satisfied  
4 through the output of electric generation facilities owned by those  
5 entities, or otherwise secured by those entities through bilateral  
6 contracts.

7 "Renewable energy certificate" or "REC" means a certificate  
8 representing the environmental benefits or attributes of one  
9 megawatt-hour of generation from a generating facility that  
10 produces Class I or Class II renewable energy, but shall not include  
11 a solar renewable energy certificate or an offshore wind renewable  
12 energy certificate.

13 "Resource clearing price" or "RCP" means the clearing price  
14 established for the applicable locational deliverability area by the  
15 base residual auction or incremental auction, as determined by the  
16 optimization algorithm for each auction, conducted by PJM as part  
17 of PJM's reliability pricing model.

18 "Resource recovery facility" means a solid waste facility  
19 constructed and operated for the incineration of solid waste for  
20 energy production and the recovery of metals and other materials  
21 for reuse, which the Department of Environmental Protection has  
22 determined to be in compliance with current environmental  
23 standards, including, but not limited to, all applicable requirements  
24 of the federal "Clean Air Act" (42 U.S.C. s.7401 et seq.).

25 "Restructuring related costs" means reasonably incurred costs  
26 directly related to the restructuring of the electric power industry,  
27 including the closure, sale, functional separation, and divestiture of  
28 generation and other competitive utility assets by a public utility, or  
29 the provision of competitive services as those costs are determined  
30 by the board, and which are not stranded costs as defined in  
31 P.L.1999, c.23 (C.48:3-49 et al.) but may include, but not be limited  
32 to, investments in management information systems, and which  
33 shall include expenses related to employees affected by  
34 restructuring which result in efficiencies and which result in  
35 benefits to ratepayers, such as training or retraining at the level  
36 equivalent to one year's training at a vocational or technical school  
37 or county community college, the provision of severance pay of two  
38 weeks of base pay for each year of full-time employment, and a  
39 maximum of 24 months' continued health care coverage. Except as  
40 to expenses related to employees affected by restructuring,  
41 "restructuring related costs" shall not include going forward costs.

42 "Retail choice" means the ability of retail customers to shop for  
43 electric generation or gas supply service from electric power or gas  
44 suppliers, or opt to receive basic generation service or basic gas  
45 service, and the ability of an electric power or gas supplier to offer  
46 electric generation service or gas supply service to retail customers,  
47 consistent with the provisions of P.L.1999, c.23 (C.48:3-49 et al.).

1 "Retail margin" means an amount, reflecting differences in  
2 prices that electric power suppliers and electric public utilities may  
3 charge in providing electric generation service and basic generation  
4 service, respectively, to retail customers, excluding residential  
5 customers, which the board may authorize to be charged to  
6 categories of basic generation service customers of electric public  
7 utilities in this State, other than residential customers, under the  
8 board's continuing regulation of basic generation service pursuant to  
9 sections 3 and 9 of P.L.1999, c.23 (C.48:3-51 and 48:3-57), for the  
10 purpose of promoting a competitive retail market for the supply of  
11 electricity.

12 "Sales representative" means a person employed by, acting on  
13 behalf of, or as an independent contractor for, an electric power  
14 supplier, gas supplier, broker, energy agent, marketer, or private  
15 aggregator who, by any means, solicits a potential residential  
16 customer for the provision of electric generation service or gas  
17 supply service.

18 "Sanitary landfill facility" shall have the same meaning as  
19 provided in section 3 of P.L.1970, c.39 (C.13:1E-3).

20 "School district" means a local or regional school district  
21 established pursuant to chapter 8 or chapter 13 of Title 18A of the  
22 New Jersey Statutes, a county special services school district  
23 established pursuant to article 8 of chapter 46 of Title 18A of the  
24 New Jersey Statutes, a county vocational school district established  
25 pursuant to article 3 of chapter 54 of Title 18A of the New Jersey  
26 Statutes, and a district under full State intervention pursuant to  
27 P.L.1987, c.399 (C.18A:7A-34 et al.).

28 "Shopping credit" means an amount deducted from the bill of an  
29 electric public utility customer to reflect the fact that the customer  
30 has switched to an electric power supplier and no longer takes basic  
31 generation service from the electric public utility.

32 "Site investigation" shall have the same meaning as provided in  
33 section 3 of P.L.1976, c.141 (C.58:10-23.11b).

34 "Small scale hydropower facility" means a facility located within  
35 this State that is connected to the distribution system, and that  
36 meets the requirements of, and has been certified by, a nationally  
37 recognized low-impact hydropower organization that has  
38 established low-impact hydropower certification criteria applicable  
39 to: (1) river flows; (2) water quality; (3) fish passage and  
40 protection; (4) watershed protection; (5) threatened and endangered  
41 species protection; (6) cultural resource protection; (7) recreation;  
42 and (8) facilities recommended for removal.

43 "Social program" means a program implemented with board  
44 approval to provide assistance to a group of disadvantaged  
45 customers, to provide protection to consumers, or to accomplish a  
46 particular societal goal, and includes, but is not limited to, the  
47 winter moratorium program, utility practices concerning "bad debt"  
48 customers, low income assistance, deferred payment plans,

1 weatherization programs, and late payment and deposit policies, but  
2 does not include any demand side management program or any  
3 environmental requirements or controls.

4 "Societal benefits charge" means a charge imposed by an electric  
5 public utility, at a level determined by the board, pursuant to, and in  
6 accordance with, section 12 of P.L.1999, c.23 (C.48:3-60).

7 "Solar alternative compliance payment" or "SACP" means a  
8 payment of a certain dollar amount per megawatt hour (MWh)  
9 which an electric power supplier or provider may submit to the  
10 board in order to comply with the solar electric generation  
11 requirements under section 38 of P.L.1999, c.23 (C.48:3-87).

12 "Solar renewable energy certificate" or "SREC" means a  
13 certificate issued by the board or its designee, representing one  
14 megawatt hour (MWh) of solar energy that is generated by a facility  
15 connected to the distribution system in this State and has value  
16 based upon, and driven by, the energy market.

17 "Solar renewable energy certificate II" or "SREC-II" means a  
18 transferable certificate, issued by the board or its designee pursuant to  
19 P.L. , c. (C. ) (pending before the Legislature as this bill),  
20 which is capable of counting towards the renewable energy portfolio  
21 standards of an electric power supplier or basic generation service  
22 provider in the State pursuant to section 38 of P.L.1999, c.23 (C.48:3-  
23 87).

24 "SREC-II program" means the program established pursuant to  
25 section 2 of P.L. , c. (C. ) (pending before the Legislature  
26 as this bill) to distribute SREC-IIs.

27 "SREC-II value per megawatt-hour" means the value, in dollars-  
28 per-megawatt-hour, assigned by the board to each solar electric  
29 power generation facility eligible to receive SREC-IIs, which is  
30 paid to the facility and which represents the environmental  
31 attributes of the facility.

32 "Standard offer capacity agreement" or "SOCA" means a  
33 financially-settled transaction agreement, approved by board order,  
34 that provides for eligible generators to receive payments from the  
35 electric public utilities for a defined amount of electric capacity for  
36 a term to be determined by the board but not to exceed 15 years,  
37 and for such payments to be a fully non-bypassable charge, with  
38 such an order, once issued, being irrevocable.

39 "Standard offer capacity price" or "SOCP" means the capacity  
40 price that is fixed for the term of the SOCA and which is the price  
41 to be received by eligible generators under a board-approved  
42 SOCA.

43 "State entity" means a department, agency, or office of State  
44 government, a State university or college, or an authority created by  
45 the State.

46 "Stranded cost" means the amount by which the net cost of an  
47 electric public utility's electric generating assets or electric power  
48 purchase commitments, as determined by the board consistent with

1 the provisions of P.L.1999, c.23 (C.48:3-49 et al.), exceeds the  
2 market value of those assets or contractual commitments in a  
3 competitive supply marketplace and the costs of buydowns or  
4 buyouts of power purchase contracts.

5 "Stranded costs recovery order" means each order issued by the  
6 board in accordance with subsection c. of section 13 of P.L.1999,  
7 c.23 (C.48:3-61) which sets forth the amount of stranded costs, if  
8 any, the board has determined an electric public utility is eligible to  
9 recover and collect in accordance with the standards set forth in  
10 section 13 of P.L.1999, c.23 (C.48:3-61) and the recovery  
11 mechanisms therefor.

12 "Telemarketer" shall have the same meaning as set forth in  
13 section 2 of P.L.2003, c.76 (C.56:8-120).

14 "Telemarketing sales call" means a telephone call made by a  
15 telemarketer to a potential residential customer as part of a plan,  
16 program, or campaign to encourage the customer to change the  
17 customer's electric power supplier or gas supplier. A telephone call  
18 made to an existing customer of an electric power supplier, gas  
19 supplier, broker, energy agent, marketer, private aggregator, or  
20 sales representative, for the sole purpose of collecting on accounts  
21 or following up on contractual obligations, shall not be deemed a  
22 telemarketing sales call. A telephone call made in response to an  
23 express written request of a customer shall not be deemed a  
24 telemarketing sales call.

25 "Thermal efficiency" means the useful electric energy output of a  
26 facility, plus the useful thermal energy output of the facility,  
27 expressed as a percentage of the total energy input to the facility.

28 "Transition bond charge" means a charge, expressed as an  
29 amount per kilowatt hour, that is authorized by and imposed on  
30 electric public utility ratepayers pursuant to a bondable stranded  
31 costs rate order, as modified at any time pursuant to the provisions  
32 of P.L.1999, c.23 (C.48:3-49 et al.).

33 "Transition bonds" means bonds, notes, certificates of  
34 participation, beneficial interest, or other evidences of indebtedness  
35 or ownership issued pursuant to an indenture, contract, or other  
36 agreement of an electric public utility or a financing entity, the  
37 proceeds of which are used, directly or indirectly, to recover,  
38 finance or refinance bondable stranded costs and which are, directly  
39 or indirectly, secured by or payable from bondable transition  
40 property. References in P.L.1999, c.23 (C.48:3-49 et al.) to  
41 principal, interest, and acquisition or redemption premium with  
42 respect to transition bonds which are issued in the form of  
43 certificates of participation or beneficial interest or other evidences  
44 of ownership shall refer to the comparable payments on such  
45 securities.

46 "Transition period" means the period from August 1, 1999  
47 through July 31, 2003.

1 "Transmission and distribution system" means, with respect to an  
2 electric public utility, any facility or equipment that is used for the  
3 transmission, distribution, or delivery of electricity to the customers  
4 of the electric public utility including, but not limited to, the land,  
5 structures, meters, lines, switches, and all other appurtenances  
6 thereof and thereto, owned or controlled by the electric public  
7 utility within this State.

8 "Universal service" means any service approved by the board  
9 with the purpose of assisting low-income residential customers in  
10 obtaining or retaining electric generation or delivery service.

11 "Unsolicited advertisement" means any advertising claims of the  
12 commercial availability or quality of services provided by an  
13 electric power supplier, gas supplier, broker, energy agent,  
14 marketer, private aggregator, sales representative, or telemarketer  
15 which is transmitted to a potential customer without that customer's  
16 prior express invitation or permission.

17 (cf: P.L.2020, c.24, s.7)

18  
19 10. Section 38 of P.L.1999, c.23 (C.48:3-87) is amended to read  
20 as follows:

21 38. a. The board shall require an electric power supplier or  
22 basic generation service provider to disclose on a customer's bill or  
23 on customer contracts or marketing materials, a uniform, common  
24 set of information about the environmental characteristics of the  
25 energy purchased by the customer, including, but not limited to:

26 (1) Its fuel mix, including categories for oil, gas, nuclear, coal,  
27 solar, hydroelectric, wind and biomass, or a regional average  
28 determined by the board;

29 (2) Its emissions, in pounds per megawatt hour, of sulfur  
30 dioxide, carbon dioxide, oxides of nitrogen, and any other pollutant  
31 that the board may determine to pose an environmental or health  
32 hazard, or an emissions default to be determined by the board; and

33 (3) Any discrete emission reduction retired pursuant to rules and  
34 regulations adopted pursuant to P.L.1995, c.188.

35 b. Notwithstanding any provisions of the "Administrative  
36 Procedure Act," P.L.1968, c.410 (C.52:14B-1 et seq.) to the  
37 contrary, the board shall initiate a proceeding and shall adopt, in  
38 consultation with the Department of Environmental Protection, after  
39 notice and opportunity for public comment and public hearing,  
40 interim standards to implement this disclosure requirement,  
41 including, but not limited to:

42 (1) A methodology for disclosure of emissions based on output  
43 pounds per megawatt hour;

44 (2) Benchmarks for all suppliers and basic generation service  
45 providers to use in disclosing emissions that will enable consumers  
46 to perform a meaningful comparison with a supplier's or basic  
47 generation service provider's emission levels; and

1 (3) A uniform emissions disclosure format that is graphic in  
2 nature and easily understandable by consumers. The board shall  
3 periodically review the disclosure requirements to determine if  
4 revisions to the environmental disclosure system as implemented  
5 are necessary.

6 Such standards shall be effective as regulations immediately  
7 upon filing with the Office of Administrative Law and shall be  
8 effective for a period not to exceed 18 months, and may, thereafter,  
9 be amended, adopted or readopted by the board in accordance with  
10 the provisions of the "Administrative Procedure Act."

11 c. (1) The board may adopt, in consultation with the  
12 Department of Environmental Protection, after notice and  
13 opportunity for public comment, an emissions portfolio standard  
14 applicable to all electric power suppliers and basic generation  
15 service providers, upon a finding that:

16 (a) The standard is necessary as part of a plan to enable the  
17 State to meet federal Clean Air Act or State ambient air quality  
18 standards; and

19 (b) Actions at the regional or federal level cannot reasonably be  
20 expected to achieve the compliance with the federal standards.

21 (2) By July 1, 2009, the board shall adopt, pursuant to the  
22 "Administrative Procedure Act," P.L.1968, c.410 (C.52:14B-1 et  
23 seq.), a greenhouse gas emissions portfolio standard to mitigate  
24 leakage or another regulatory mechanism to mitigate leakage  
25 applicable to all electric power suppliers and basic generation  
26 service providers that provide electricity to customers within the  
27 State. The greenhouse gas emissions portfolio standard or any other  
28 regulatory mechanism to mitigate leakage shall:

29 (a) Allow a transition period, either before or after the effective  
30 date of the regulation to mitigate leakage, for a basic generation  
31 service provider or electric power supplier to either meet the  
32 emissions portfolio standard or other regulatory mechanism to  
33 mitigate leakage, or to transfer any customer to a basic generation  
34 service provider or electric power supplier that meets the emissions  
35 portfolio standard or other regulatory mechanism to mitigate  
36 leakage. If the transition period allowed pursuant to this  
37 subparagraph occurs after the implementation of an emissions  
38 portfolio standard or other regulatory mechanism to mitigate  
39 leakage, the transition period shall be no longer than three years;  
40 and

41 (b) Exempt the provision of basic generation service pursuant to  
42 a basic generation service purchase and sale agreement effective  
43 prior to the date of the regulation.

44 Unless the Attorney General or the Attorney General's designee  
45 determines that a greenhouse gas emissions portfolio standard  
46 would unconstitutionally burden interstate commerce or would be  
47 preempted by federal law, the adoption by the board of an electric  
48 energy efficiency portfolio standard pursuant to subsection g. of this

1 section, a gas energy efficiency portfolio standard pursuant to  
2 subsection h. of this section, or any other enhanced energy  
3 efficiency policies to mitigate leakage shall not be considered  
4 sufficient to fulfill the requirement of this subsection for the  
5 adoption of a greenhouse gas emissions portfolio standard or any  
6 other regulatory mechanism to mitigate leakage.

7 d. Notwithstanding any provisions of the "Administrative  
8 Procedure Act," P.L.1968, c.410 (C.52:14B-1 et seq.) to the  
9 contrary, the board shall initiate a proceeding and shall adopt, after  
10 notice, provision of the opportunity for comment, and public  
11 hearing, renewable energy portfolio standards that shall require:

12 (1) that two and one-half percent of the kilowatt hours sold in  
13 this State by each electric power supplier and each basic generation  
14 service provider be from Class II renewable energy sources;

15 (2) beginning on January 1, 2020, that 21 percent of the kilowatt  
16 hours sold in this State by each electric power supplier and each  
17 basic generation service provider be from Class I renewable energy  
18 sources. The board shall increase the required percentage for Class  
19 I renewable energy sources so that by January 1, 2025, 35 percent  
20 of the kilowatt hours sold in this State by each electric power  
21 supplier and each basic generation service provider shall be from  
22 Class I renewable energy sources, and by January 1, 2030, 50  
23 percent of the kilowatt hours sold in this State by each electric  
24 power supplier and each basic generation service provider shall be  
25 from Class I renewable energy sources. Notwithstanding the  
26 requirements of this subsection, the board shall ensure that the cost  
27 to customers of the Class I renewable energy requirement imposed  
28 pursuant to this subsection shall not exceed nine percent of the total  
29 paid for electricity by all customers in the State for energy year  
30 2019, energy year 2020, and energy year 2021, respectively, and  
31 shall not exceed seven percent of the total paid for electricity by all  
32 customers in the State in any energy year thereafter ; provided that,  
33 if in energy years 2019 through 2021 the cost to customers of the  
34 Class I renewable energy requirement is less than nine percent of  
35 the total paid for electricity by all customers in the State, the board  
36 may increase the cost to customers of the Class I renewable energy  
37 requirement in energy years 2022 through 2024 to a rate greater  
38 than seven percent, as long as the total costs to customers for  
39 energy years 2019 through 2024 does not exceed the sum of nine  
40 percent of the total paid for electricity by all customers in the State  
41 in energy years 2019 through 2021 and seven percent of the total  
42 paid for electricity by all customers in the State in energy years  
43 2022 through 2024. In calculating the cost to customers of the  
44 Class I renewable energy requirement imposed pursuant to this  
45 subsection, the board shall not include the costs of the offshore  
46 wind energy certificate program established pursuant to paragraph  
47 (4) of this subsection. In calculating the cost to customers of the  
48 Class I renewable energy requirement, the board shall reflect any

1 energy and environmental savings attributable to the Class I  
2 program in its calculation, which shall include, but not be limited  
3 to, the social cost of carbon dioxide emissions at a value no less  
4 than the most recently published three percent discount rate  
5 scenario of the United States Government Interagency Working  
6 Group on Social Cost of Greenhouse Gases. The board shall take  
7 any steps necessary to prevent the exceedance of the cap on the cost  
8 to customers including, but not limited to, adjusting the Class I  
9 renewable energy requirement.

10 An electric power supplier or basic generation service provider  
11 may satisfy the requirements of this subsection by participating in a  
12 renewable energy trading program approved by the board in  
13 consultation with the Department of Environmental Protection;

14 (3) that the board establish a multi-year schedule, applicable to  
15 each electric power supplier or basic generation service provider in  
16 this State, beginning with the one-year period commencing on June  
17 1, 2010, and continuing for each subsequent one-year period up to  
18 and including, the one-year period commencing on June 1, 2033,  
19 that requires the following number or percentage, as the case may  
20 be, of kilowatt-hours sold in this State by each electric power  
21 supplier and each basic generation service provider to be from solar  
22 electric power generators connected to the distribution system or  
23 transmission system in this State:

24	EY 2011	306 Gigawatthours (Gwhrs)
25	EY 2012	442 Gwhrs
26	EY 2013	596 Gwhrs
27	EY 2014	2.050%
28	EY 2015	2.450%
29	EY 2016	2.750%
30	EY 2017	3.000%
31	EY 2018	3.200%
32	EY 2019	4.300%
33	EY 2020	4.900%
34	EY 2021	5.100%
35	EY 2022	5.100%
36	EY 2023	5.100%
37	EY 2024	4.900%
38	EY 2025	4.800%
39	EY 2026	4.500%
40	EY 2027	4.350%
41	EY 2028	3.740%
42	EY 2029	3.070%
43	EY 2030	2.210%
44	EY 2031	1.580%
45	EY 2032	1.400%
46	EY 2033	1.100%

47 No later than 180 days after the date of enactment of P.L.2018,  
48 c.17 (C.48:3-87.8 et al.), the board shall adopt rules and regulations

1 to close the SREC program to new applications upon the attainment  
2 of 5.1 percent of the kilowatt-hours sold in the State by each  
3 electric power supplier and each basic generation provider from  
4 solar electric power generators connected to the distribution system.  
5 The board shall continue to consider any application filed before the  
6 date of enactment of P.L.2018, c.17 (C.48:3-87.8 et al.). The board  
7 shall provide for an orderly and transparent mechanism that will  
8 result in the closing of the existing SREC program on a date certain  
9 but no later than June 1, 2021.

10 No later than 24 months after the date of enactment of P.L.2018,  
11 c.17 (C.48:3-87.8 et al.), the board shall complete a study that  
12 evaluates how to modify or replace the SREC program to encourage  
13 the continued efficient and orderly development of solar renewable  
14 energy generating sources throughout the State. The board shall  
15 submit the written report thereon to the Governor and, pursuant to  
16 section 2 of P.L.1991, c.164 (C.52:14-19.1), to the Legislature. The  
17 board shall consult with public utilities, industry experts, regional  
18 grid operators, solar power providers and financiers, and other State  
19 agencies to determine whether the board can modify the SREC  
20 program such that the program will:

- 21 - continually reduce, where feasible, the cost of achieving the  
22 solar energy goals set forth in this subsection;
- 23 - provide an orderly transition from the SREC program to a  
24 new or modified program;
- 25 - develop megawatt targets for grid connected and distribution  
26 systems, including residential and small commercial rooftop  
27 systems, community solar systems, and large scale behind the meter  
28 systems, as a share of the overall solar energy requirement, which  
29 targets the board may modify periodically based on the cost,  
30 feasibility, or social impacts of different types of projects;
- 31 - establish and update market-based maximum incentive  
32 payment caps periodically for each of the above categories of solar  
33 electric power generation facilities;
- 34 - encourage and facilitate market-based cost recovery through  
35 long-term contracts and energy market sales; and
- 36 - where cost recovery is needed for any portion of an efficient  
37 solar electric power generation facility when costs are not  
38 recoverable through wholesale market sales and direct payments  
39 from customers, utilize competitive processes such as competitive  
40 procurement and long-term contracts where possible to ensure such  
41 recovery, without exceeding the maximum incentive payment cap  
42 for that category of facility.

43 The board shall approve, conditionally approve, or disapprove  
44 any application for designation as connected to the distribution  
45 system of a solar electric power generation facility filed with the  
46 board after the date of enactment of P.L.2018, c.17 (C.48:3-87.8 et  
47 al.), no more than 90 days after receipt by the board of a completed  
48 application. For any such application for a project greater than 25

1 kilowatts, the board shall require the applicant to post a notice  
2 escrow with the board in an amount of \$40 per kilowatt of DC  
3 nameplate capacity of the facility, not to exceed \$40,000. The  
4 notice escrow amount shall be reimbursed to the applicant in full  
5 upon either denial of the application by the board or upon  
6 commencement of commercial operation of the solar electric power  
7 generation facility. The escrow amount shall be forfeited to the  
8 State if the facility is designated as connected to the distribution  
9 system pursuant to this subsection but does not commence  
10 commercial operation within two years following the date of the  
11 designation by the board.

12 For all applications for designation as connected to the  
13 distribution system of a solar electric power generation facility filed  
14 with the board after the date of enactment of P.L.2018, c.17  
15 (C.48:3-87.8 et al.), the SREC term shall be 10 years.

16 (a) The board shall determine an appropriate period of no less  
17 than 120 days following the end of an energy year prior to which a  
18 provider or supplier must demonstrate compliance for that energy  
19 year with the annual renewable portfolio standard;

20 (b) No more than 24 months following the date of enactment of  
21 P.L.2012, c.24, the board shall complete a proceeding to investigate  
22 approaches to mitigate solar development volatility and prepare and  
23 submit, pursuant to section 2 of P.L.1991, c.164 (C.52:14-19.1), a  
24 report to the Legislature, detailing its findings and  
25 recommendations. As part of the proceeding, the board shall  
26 evaluate other techniques used nationally and internationally;

27 (c) The solar renewable portfolio standards requirements in this  
28 paragraph shall exempt those existing supply contracts which are  
29 effective prior to the date of enactment of P.L.2018, c.17 (C.48:3-  
30 87.8 et al.) from any increase beyond the number of SRECs  
31 mandated by the solar renewable energy portfolio standards  
32 requirements that were in effect on the date that the providers  
33 executed their existing supply contracts. This limited exemption for  
34 providers' existing supply contracts shall not be construed to lower  
35 the Statewide solar sourcing requirements set forth in this  
36 paragraph. Such incremental requirements that would have  
37 otherwise been imposed on exempt providers shall be distributed  
38 over the providers not subject to the existing supply contract  
39 exemption until such time as existing supply contracts expire and  
40 all providers are subject to the new requirement in a manner that is  
41 competitively neutral among all providers and suppliers.  
42 Notwithstanding any rule or regulation to the contrary, the board  
43 shall recognize these new solar purchase obligations as a change  
44 required by operation of law and implement the provisions of this  
45 subsection in a manner so as to prevent any subsidies between  
46 suppliers and providers and to promote competition in the  
47 electricity supply industry.

1       An electric power supplier or basic generation service provider  
2       may satisfy the requirements of this subsection by participating in a  
3       renewable energy trading program approved by the board in  
4       consultation with the Department of Environmental Protection, or  
5       compliance with the requirements of this subsection may be  
6       demonstrated to the board by suppliers or providers through the  
7       purchase of SRECs.

8       The renewable energy portfolio standards adopted by the board  
9       pursuant to paragraphs (1) and (2) of this subsection shall be  
10      effective as regulations immediately upon filing with the Office of  
11      Administrative Law and shall be effective for a period not to exceed  
12      18 months, and may, thereafter, be amended, adopted or readopted  
13      by the board in accordance with the provisions of the  
14      "Administrative Procedure Act."

15      The renewable energy portfolio standards adopted by the board  
16      pursuant to this paragraph shall be effective as regulations  
17      immediately upon filing with the Office of Administrative Law and  
18      shall be effective for a period not to exceed 30 months after such  
19      filing, and shall, thereafter, be amended, adopted or readopted by  
20      the board in accordance with the "Administrative Procedure Act";  
21      and

22      (4) within 180 days after the date of enactment of P.L.2010,  
23      c.57 (C.48:3-87.1 et al.), that the board establish an offshore wind  
24      renewable energy certificate program to require that a percentage of  
25      the kilowatt hours sold in this State by each electric power supplier  
26      and each basic generation service provider be from offshore wind  
27      energy in order to support at least 3,500 megawatts of generation  
28      from qualified offshore wind projects.

29      The percentage established by the board pursuant to this  
30      paragraph shall serve as an offset to the renewable energy portfolio  
31      standard established pursuant to paragraph (2) of this subsection  
32      and shall reduce the corresponding Class I renewable energy  
33      requirement.

34      The percentage established by the board pursuant to this  
35      paragraph shall reflect the projected OREC production of each  
36      qualified offshore wind project, approved by the board pursuant to  
37      section 3 of P.L.2010, c.57 (C.48:3-87.1), for 20 years from the  
38      commercial operation start date of the qualified offshore wind  
39      project which production projection and OREC purchase  
40      requirement, once approved by the board, shall not be subject to  
41      reduction.

42      An electric power supplier or basic generation service provider  
43      shall comply with the OREC program established pursuant to this  
44      paragraph through the purchase of offshore wind renewable energy  
45      certificates at a price and for the time period required by the board.  
46      In the event there are insufficient offshore wind renewable energy  
47      certificates available, the electric power supplier or basic generation  
48      service provider shall pay an offshore wind alternative compliance

1 payment established by the board. Any offshore wind alternative  
2 compliance payments collected shall be refunded directly to the  
3 ratepayers by the electric public utilities.

4 The rules established by the board pursuant to this paragraph  
5 shall be effective as regulations immediately upon filing with the  
6 Office of Administrative Law and shall be effective for a period not  
7 to exceed 18 months, and may, thereafter, be amended, adopted or  
8 readopted by the board in accordance with the provisions of the  
9 "Administrative Procedure Act," P.L.1968, c.410 (C.52:14B-1 et  
10 seq.).

11 e. Notwithstanding any provisions of the "Administrative  
12 Procedure Act," P.L.1968, c.410 (C.52:14B-1 et seq.) to the  
13 contrary, the board shall initiate a proceeding and shall adopt, after  
14 notice, provision of the opportunity for comment, and public  
15 hearing:

16 (1) net metering standards for electric power suppliers and basic  
17 generation service providers. The standards shall require electric  
18 power suppliers and basic generation service providers to offer net  
19 metering at non-discriminatory rates to industrial, large  
20 commercial, residential and small commercial customers, as those  
21 customers are classified or defined by the board, that generate  
22 electricity, on the customer's side of the meter, using a Class I  
23 renewable energy source, for the net amount of electricity supplied  
24 by the electric power supplier or basic generation service provider  
25 over an annualized period. Systems of any sized capacity, as  
26 measured in watts, are eligible for net metering. If the amount of  
27 electricity generated by the customer-generator, plus any kilowatt  
28 hour credits held over from the previous billing periods, exceeds the  
29 electricity supplied by the electric power supplier or basic  
30 generation service provider, then the electric power supplier or  
31 basic generation service provider, as the case may be, shall credit  
32 the customer-generator for the excess kilowatt hours until the end of  
33 the annualized period at which point the customer-generator will be  
34 compensated for any remaining credits or, if the customer-generator  
35 chooses, credit the customer-generator on a real-time basis, at the  
36 electric power supplier's or basic generation service provider's  
37 avoided cost of wholesale power or the PJM electric power pool's  
38 real-time locational marginal pricing rate, adjusted for losses, for  
39 the respective zone in the PJM electric power pool. Alternatively,  
40 the customer-generator may execute a bilateral agreement with an  
41 electric power supplier or basic generation service provider for the  
42 sale and purchase of the customer-generator's excess generation.  
43 The customer-generator may be credited on a real-time basis, so  
44 long as the customer-generator follows applicable rules prescribed  
45 by the PJM electric power pool for its capacity requirements for the  
46 net amount of electricity supplied by the electric power supplier or  
47 basic generation service provider. The board may authorize an  
48 electric power supplier or basic generation service provider to cease

1 offering net metering to customers that are not already net metered  
2 whenever the total rated generating capacity owned and operated by  
3 net metering customer-generators Statewide equals 5.8 percent of  
4 the total annual kilowatt-hours sold in this State by each electric  
5 power supplier and each basic generation service provider during  
6 the prior one-year period;

7 (2) safety and power quality interconnection standards for Class  
8 I renewable energy source systems used by a customer-generator  
9 that shall be eligible for net metering.

10 Such standards or rules shall take into consideration the goals of  
11 the New Jersey Energy Master Plan, applicable industry standards,  
12 and the standards of other states and the Institute of Electrical and  
13 Electronics Engineers. The board shall allow electric public  
14 utilities to recover the costs of any new net meters, upgraded net  
15 meters, system reinforcements or upgrades, and interconnection  
16 costs through either their regulated rates or from the net metering  
17 customer-generator;

18 (3) credit or other incentive rules for generators using Class I  
19 renewable energy generation systems that connect to New Jersey's  
20 electric public utilities' distribution system but who do not net  
21 meter; and

22 (4) net metering aggregation standards to require electric public  
23 utilities to provide net metering aggregation to single electric public  
24 utility customers that operate a solar electric power generation  
25 system installed at one of the customer's facilities or on property  
26 owned by the customer, provided that any such customer is a State  
27 entity, school district, county, county agency, county authority,  
28 municipality, municipal agency, or municipal authority. The  
29 standards shall provide that, in order to qualify for net metering  
30 aggregation, the customer must operate a solar electric power  
31 generation system using a net metering billing account, which  
32 system is located on property owned by the customer, provided that:  
33 (a) the property is not land that has been actively devoted to  
34 agricultural or horticultural use and that is valued, assessed, and  
35 taxed pursuant to the "Farmland Assessment Act of 1964,"  
36 P.L.1964, c.48 (C.54:4-23.1 et seq.) at any time within the 10-year  
37 period prior to the effective date of P.L.2012, c.24, provided,  
38 however, that the municipal planning board of a municipality in  
39 which a solar electric power generation system is located may  
40 waive the requirement of this subparagraph (a), (b) the system is not  
41 an on-site generation facility, (c) all of the facilities of the single  
42 customer combined for the purpose of net metering aggregation are  
43 facilities owned or operated by the single customer and are located  
44 within its territorial jurisdiction except that all of the facilities of a  
45 State entity engaged in net metering aggregation shall be located  
46 within five miles of one another, and (d) all of those facilities are  
47 within the service territory of a single electric public utility and are  
48 all served by the same basic generation service provider or by the

1 same electric power supplier. The standards shall provide that , in  
2 order to qualify for net metering aggregation, the customer's solar  
3 electric power generation system shall be sized so that its annual  
4 generation does not exceed the combined metered annual energy  
5 usage of the qualified customer facilities, and the qualified  
6 customer facilities shall all be in the same customer rate class under  
7 the applicable electric public utility tariff. For the customer's  
8 facility or property on which the solar electric generation system is  
9 installed, the electricity generated from the customer's solar electric  
10 generation system shall be accounted for pursuant to the provisions  
11 of paragraph (1) of this subsection to provide that the electricity  
12 generated in excess of the electricity supplied by the electric power  
13 supplier or the basic generation service provider, as the case may  
14 be, for the customer's facility on which the solar electric generation  
15 system is installed, over the annualized period, is credited at the  
16 electric power supplier's or the basic generation service provider's  
17 avoided cost of wholesale power or the PJM electric power pool  
18 real-time locational marginal pricing rate. All electricity used by  
19 the customer's qualified facilities, with the exception of the facility  
20 or property on which the solar electric power generation system is  
21 installed, shall be billed at the full retail rate pursuant to the electric  
22 public utility tariff applicable to the customer class of the customer  
23 using the electricity. A customer may contract with a third party to  
24 operate a solar electric power generation system, for the purpose of  
25 net metering aggregation. Any contractual relationship entered into  
26 for operation of a solar electric power generation system related to  
27 net metering aggregation shall include contractual protections that  
28 provide for adequate performance and provision for construction  
29 and operation for the term of the contract, including any appropriate  
30 bonding or escrow requirements. Any incremental cost to an  
31 electric public utility for net metering aggregation shall be fully and  
32 timely recovered in a manner to be determined by the board. The  
33 board shall adopt net metering aggregation standards within 270  
34 days after the effective date of P.L.2012, c.24.

35 Such rules shall require the board or its designee to issue a credit  
36 or other incentive to those generators that do not use a net meter but  
37 otherwise generate electricity derived from a Class I renewable  
38 energy source and to issue an enhanced credit or other incentive,  
39 including, but not limited to, a solar renewable energy credit, to  
40 those generators that generate electricity derived from solar  
41 technologies.

42 Such standards or rules shall be effective as regulations  
43 immediately upon filing with the Office of Administrative Law and  
44 shall be effective for a period not to exceed 18 months, and may,  
45 thereafter, be amended, adopted or readopted by the board in  
46 accordance with the provisions of the "Administrative Procedure  
47 Act."

- 1       f. The board may assess, by written order and after notice and  
2 opportunity for comment, a separate fee to cover the cost of  
3 implementing and overseeing an emission disclosure system or  
4 emission portfolio standard, which fee shall be assessed based on an  
5 electric power supplier's or basic generation service provider's share  
6 of the retail electricity supply market. The board shall not impose a  
7 fee for the cost of implementing and overseeing a greenhouse gas  
8 emissions portfolio standard adopted pursuant to paragraph (2) of  
9 subsection c. of this section.
- 10       g. The board shall adopt, pursuant to the "Administrative  
11 Procedure Act," P.L.1968, c.410 (C.52:14B-1 et seq.), an electric  
12 energy efficiency program in order to ensure investment in cost-  
13 effective energy efficiency measures, ensure universal access to  
14 energy efficiency measures, and serve the needs of low-income  
15 communities that shall require each electric public utility to  
16 implement energy efficiency measures that reduce electricity usage  
17 in the State pursuant to section 3 of P.L.2018, c.17 (C.48:3-87.9).  
18 Nothing in this subsection shall be construed to prevent an electric  
19 public utility from meeting the requirements of this subsection by  
20 contracting with another entity for the performance of the  
21 requirements.
- 22       h. The board shall adopt, pursuant to the "Administrative  
23 Procedure Act," P.L.1968, c.410 (C.52:14B-1 et seq.), a gas energy  
24 efficiency program in order to ensure investment in cost-effective  
25 energy efficiency measures, ensure universal access to energy  
26 efficiency measures, and serve the needs of low-income  
27 communities that shall require each gas public utility to implement  
28 energy efficiency measures that reduce natural gas usage in the  
29 State pursuant to section 3 of P.L.2018, c.17 (C.48:3-87.9).  
30 Nothing in this subsection shall be construed to prevent a gas public  
31 utility from meeting the requirements of this subsection by  
32 contracting with another entity for the performance of the  
33 requirements.
- 34       i. After the board establishes a schedule of solar kilowatt-hour  
35 sale or purchase requirements pursuant to paragraph (3) of  
36 subsection d. of this section, the board may initiate subsequent  
37 proceedings and adopt, after appropriate notice and opportunity for  
38 public comment and public hearing, increased minimum solar  
39 kilowatt-hour sale or purchase requirements, provided that the  
40 board shall not reduce previously established minimum solar  
41 kilowatt-hour sale or purchase requirements, or otherwise impose  
42 constraints that reduce the requirements by any means.
- 43       j. The board shall determine an appropriate level of solar  
44 alternative compliance payment, and permit each supplier or  
45 provider to submit an SACP to comply with the solar electric  
46 generation requirements of paragraph (3) of subsection d. of this  
47 section. The value of the SACP for each Energy Year, for Energy

1 Years 2014 through 2033 per megawatt hour from solar electric  
2 generation required pursuant to this section, shall be:

3	EY 2014	\$339
4	EY 2015	\$331
5	EY 2016	\$323
6	EY 2017	\$315
7	EY 2018	\$308
8	EY 2019	\$268
9	EY 2020	\$258
10	EY 2021	\$248
11	EY 2022	\$238
12	EY 2023	\$228
13	EY 2024	\$218
14	EY 2025	\$208
15	EY 2026	\$198
16	EY 2027	\$188
17	EY 2028	\$178
18	EY 2029	\$168
19	EY 2030	\$158
20	EY 2031	\$148
21	EY 2032	\$138
22	EY 2033	\$128.

23 The board may initiate subsequent proceedings and adopt, after  
24 appropriate notice and opportunity for public comment and public  
25 hearing, an increase in solar alternative compliance payments,  
26 provided that the board shall not reduce previously established  
27 levels of solar alternative compliance payments, nor shall the board  
28 provide relief from the obligation of payment of the SACP by the  
29 electric power suppliers or basic generation service providers in any  
30 form. Any SACP payments collected shall be refunded directly to  
31 the ratepayers by the electric public utilities.

32 k. The board may allow electric public utilities to offer long-  
33 term contracts through a competitive process, direct electric public  
34 utility investment and other means of financing, including but not  
35 limited to loans, for the purchase of SRECs and the resale of SRECs  
36 to suppliers or providers or others, provided that after such  
37 contracts have been approved by the board, the board's approvals  
38 shall not be modified by subsequent board orders. If the board  
39 allows the offering of contracts pursuant to this subsection, the  
40 board may establish a process, after hearing, and opportunity for  
41 public comment, to provide that a designated segment of the  
42 contracts approved pursuant to this subsection shall be contracts  
43 involving solar electric power generation facility projects with a  
44 capacity of up to 250 kilowatts.

45 1. The board shall implement its responsibilities under the  
46 provisions of this section in such a manner as to:

- 1 (1) place greater reliance on competitive markets, with the
- 2 explicit goal of encouraging and ensuring the emergence of new
- 3 entrants that can foster innovations and price competition;
- 4 (2) maintain adequate regulatory authority over non-competitive
- 5 public utility services;
- 6 (3) consider alternative forms of regulation in order to address
- 7 changes in the technology and structure of electric public utilities;
- 8 (4) promote energy efficiency and Class I renewable energy
- 9 market development, taking into consideration environmental
- 10 benefits and market barriers;
- 11 (5) make energy services more affordable for low and moderate
- 12 income customers;
- 13 (6) attempt to transform the renewable energy market into one
- 14 that can move forward without subsidies from the State or public
- 15 utilities;
- 16 (7) achieve the goals put forth under the renewable energy
- 17 portfolio standards;
- 18 (8) promote the lowest cost to ratepayers; and
- 19 (9) allow all market segments to participate.
- 20 m. The board shall ensure the availability of financial incentives
- 21 under its jurisdiction, including, but not limited to, long-term
- 22 contracts, loans, SRECs, or other financial support, to ensure
- 23 market diversity, competition, and appropriate coverage across all
- 24 ratepayer segments, including, but not limited to, residential,
- 25 commercial, industrial, non-profit, farms, schools, and public entity
- 26 customers.
- 27 n. For projects which are owned, or directly invested in, by a
- 28 public utility pursuant to section 13 of P.L.2007, c.340 (C.48:3-
- 29 98.1), the board shall determine the number of SRECs with which
- 30 such projects shall be credited; and in determining such number the
- 31 board shall ensure that the market for SRECs does not detrimentally
- 32 affect the development of non-utility solar projects and shall
- 33 consider how its determination may impact the ratepayers.
- 34 o. The board, in consultation with the Department of
- 35 Environmental Protection, electric public utilities, the Division of
- 36 Rate Counsel in, but not of, the Department of the Treasury,
- 37 affected members of the solar energy industry, and relevant
- 38 stakeholders, shall periodically consider increasing the renewable
- 39 energy portfolio standards beyond the minimum amounts set forth
- 40 in subsection d. of this section, taking into account the cost impacts
- 41 and public benefits of such increases including, but not limited to:
- 42 (1) reductions in air pollution, water pollution, land disturbance,
- 43 and greenhouse gas emissions;
- 44 (2) reductions in peak demand for electricity and natural gas,
- 45 and the overall impact on the costs to customers of electricity and
- 46 natural gas;
- 47 (3) increases in renewable energy development, manufacturing,
- 48 investment, and job creation opportunities in this State; and

1       (4) reductions in State and national dependence on the use of  
2 fossil fuels.

3       p. Class I RECs and ORECs shall be eligible for use in  
4 renewable energy portfolio standards compliance in the energy year  
5 in which they are generated, and for the following two energy years.  
6 SRECs shall be eligible for use in renewable energy portfolio  
7 standards compliance in the energy year in which they are  
8 generated, and for the following four energy years.

9       q. (1) During the energy years of 2014, 2015, and 2016, a solar  
10 electric power generation facility project that is not: (a) net  
11 metered; (b) an on-site generation facility; (c) qualified for net  
12 metering aggregation; or (d) certified as being located on a  
13 brownfield, on an area of historic fill or on a properly closed  
14 sanitary landfill facility, as provided pursuant to subsection t. of this  
15 section may file an application with the board for approval of a  
16 designation pursuant to this subsection that the facility is connected  
17 to the distribution system. An application filed pursuant to this  
18 subsection shall include a notice escrow of \$40,000 per megawatt of  
19 the proposed capacity of the facility. The board shall approve the  
20 designation if: the facility has filed a notice in writing with the  
21 board applying for designation pursuant to this subsection, together  
22 with the notice escrow; and the capacity of the facility, when added  
23 to the capacity of other facilities that have been previously  
24 approved for designation prior to the facility's filing under this  
25 subsection, does not exceed 80 megawatts in the aggregate for each  
26 year. The capacity of any one solar electric power supply project  
27 approved pursuant to this subsection shall not exceed 10 megawatts.  
28 No more than 90 days after its receipt of a completed application  
29 for designation pursuant to this subsection, the board shall approve,  
30 conditionally approve, or disapprove the application. The notice  
31 escrow shall be reimbursed to the facility in full upon either  
32 rejection by the board or the facility entering commercial operation,  
33 or shall be forfeited to the State if the facility is designated pursuant  
34 to this subsection but does not enter commercial operation pursuant  
35 to paragraph (2) of this subsection.

36       (2) If the proposed solar electric power generation facility does  
37 not commence commercial operations within two years following  
38 the date of the designation by the board pursuant to this subsection,  
39 the designation of the facility shall be deemed to be null and void,  
40 and the facility shall not be considered connected to the distribution  
41 system thereafter.

42       (3) Notwithstanding the provisions of paragraph (2) of this  
43 subsection, a solar electric power generation facility project that as  
44 of May 31, 2017 was designated as "connected to the distribution  
45 system," but failed to commence commercial operations as of that  
46 date, shall maintain that designation if it commences commercial  
47 operations by May 31, 2018.

1       r. (1) For all proposed solar electric power generation facility  
2 projects except for those solar electric power generation facility  
3 projects approved pursuant to subsection q. of this section, and for  
4 all projects proposed in energy year 2019 and energy year 2020, the  
5 board may approve projects for up to 50 megawatts annually in  
6 auctioned capacity in two auctions per year as long as the board is  
7 accepting applications. If the board approves projects for less than  
8 50 megawatts in energy year 2019 or less than 50 megawatts in  
9 energy year 2020, the difference in each year shall be carried over  
10 into the successive energy year until 100 megawatts of auctioned  
11 capacity has been approved by the board pursuant to this  
12 subsection. A proposed solar electric power generation facility that  
13 is neither net metered nor an on-site generation facility, may be  
14 considered "connected to the distribution system" only upon  
15 designation as such by the board, after notice to the public and  
16 opportunity for public comment or hearing. A proposed solar  
17 **[power]** electric power generation facility seeking board  
18 designation as "connected to the distribution system" shall submit  
19 an application to the board that includes for the proposed facility:  
20 the nameplate capacity; the estimated energy and number of SRECs  
21 to be produced and sold per year; the estimated annual rate impact  
22 on ratepayers; the estimated capacity of the generator as defined by  
23 PJM for sale in the PJM capacity market; the point of  
24 interconnection; the total project acreage and location; the current  
25 land use designation of the property; the type of solar technology to  
26 be used; and such other information as the board shall require.

27       (2) The board shall approve the designation of the proposed  
28 solar **[power]** electric power generation facility as "connected to  
29 the distribution system" if the board determines that:

30       (a) the SRECs forecasted to be produced by the facility do not  
31 have a detrimental impact on the SREC market or on the  
32 appropriate development of solar power in the State;

33       (b) the approval of the designation of the proposed facility  
34 would not significantly impact the preservation of open space in  
35 this State;

36       (c) the impact of the designation on electric rates and economic  
37 development is beneficial; and

38       (d) there will be no impingement on the ability of an electric  
39 public utility to maintain its property and equipment in such a  
40 condition as to enable it to provide safe, adequate, and proper  
41 service to each of its customers.

42       (3) The board shall act within 90 days of its receipt of a  
43 completed application for designation of a solar **[power]** electric  
44 power generation facility as "connected to the distribution system,"  
45 to either approve, conditionally approve, or disapprove the  
46 application. If the proposed solar electric power generation facility  
47 does not commence commercial operations within two years  
48 following the date of the designation by the board pursuant to this

1 subsection, the designation of the facility as "connected to the  
2 distribution system" shall be deemed to be null and void, and the  
3 facility shall thereafter be considered not "connected to the  
4 distribution system."

5 s. In addition to any other requirements of P.L.1999, c.23 or  
6 any other law, rule, regulation or order, a solar electric power  
7 generation facility that is not net metered or an on-site generation  
8 facility and which is located on land that has been actively devoted  
9 to agricultural or horticultural use that is valued, assessed, and  
10 taxed pursuant to the "Farmland Assessment Act of 1964,"  
11 P.L.1964, c.48 (C.54:4-23.1 et seq.) at any time within the 10-year  
12 period prior to the effective date of P.L.2012, c.24, shall only be  
13 considered "connected to the distribution system" if (1) the board  
14 approves the facility's designation pursuant to subsection q. of this  
15 section; or (2) (a) PJM issued a System Impact Study for the facility  
16 on or before June 30, 2011, (b) the facility files a notice with the  
17 board within 60 days of the effective date of P.L.2012, c.24,  
18 indicating its intent to qualify under this subsection, and (c) the  
19 facility has been approved as "connected to the distribution system"  
20 by the board. Nothing in this subsection shall limit the board's  
21 authority concerning the review and oversight of facilities, unless  
22 such facilities are exempt from such review as a result of having  
23 been approved pursuant to subsection q. of this section.

24 t. (1) No more than 180 days after the date of enactment of  
25 P.L.2012, c.24, the board shall, in consultation with the Department  
26 of Environmental Protection and the New Jersey Economic  
27 Development Authority, and, after notice and opportunity for public  
28 comment and public hearing, complete a proceeding to establish a  
29 program to provide SRECs to owners of solar electric power  
30 generation facility projects certified by the board, in consultation  
31 with the Department of Environmental Protection, as being located  
32 on a brownfield, on an area of historic fill or on a properly closed  
33 sanitary landfill facility, including those owned or operated by an  
34 electric public utility and approved pursuant to section 13 of  
35 P.L.2007, c.340 (C.48:3-98.1). Projects certified under this  
36 subsection shall be considered "connected to the distribution  
37 system", shall not require such designation by the board, and shall  
38 not be subject to board review required pursuant to subsections q.  
39 and r. of this section. Notwithstanding the provisions of section 3  
40 of P.L.1999, c.23 (C.48:3-51) or any other law, rule, regulation, or  
41 order to the contrary, for projects certified under this subsection, the  
42 board shall establish a financial incentive that is designed to  
43 supplement the SRECs generated by the facility in order to cover  
44 the additional cost of constructing and operating a solar electric  
45 power generation facility on a brownfield, on an area of historic fill  
46 or on a properly closed sanitary landfill facility. Any financial  
47 benefit realized in relation to a project owned or operated by an  
48 electric public utility and approved by the board pursuant to section

1 13 of P.L.2007, c.340 (C.48:3-98.1), as a result of the provision of a  
2 financial incentive established by the board pursuant to this  
3 subsection, shall be credited to ratepayers. The issuance of SRECs  
4 for all solar electric power generation facility projects pursuant to  
5 this subsection shall be deemed "Board of Public Utilities financial  
6 assistance" as provided under section 1 of P.L.2009, c.89 (C.48:2-  
7 29.47).

8 (2) Notwithstanding the provisions of the "Spill Compensation  
9 and Control Act," P.L.1976, c.141 (C.58:10-23.11 et seq.) or any  
10 other law, rule, regulation, or order to the contrary, the board, in  
11 consultation with the Department of Environmental Protection, may  
12 find that a person who operates a solar electric power generation  
13 facility project that has commenced operation on or after the  
14 effective date of P.L.2012, c.24, which project is certified by the  
15 board, in consultation with the Department of Environmental  
16 Protection pursuant to paragraph (1) of this subsection, as being  
17 located on a brownfield for which a final remediation document has  
18 been issued, on an area of historic fill or on a properly closed  
19 sanitary landfill facility, which projects shall include, but not be  
20 limited to projects located on a brownfield for which a final  
21 remediation document has been issued, on an area of historic fill or  
22 on a properly closed sanitary landfill facility owned or operated by  
23 an electric public utility and approved pursuant to section 13 of  
24 P.L.2007, c.340 (C.48:3-98.1), or a person who owns property  
25 acquired on or after the effective date of P.L.2012, c.24 on which  
26 such a solar electric power generation facility project is constructed  
27 and operated, shall not be liable for cleanup and removal costs to  
28 the Department of Environmental Protection or to any other person  
29 for the discharge of a hazardous substance provided that:

30 (a) the person acquired or leased the real property after the  
31 discharge of that hazardous substance at the real property;

32 (b) the person did not discharge the hazardous substance, is not  
33 in any way responsible for the hazardous substance, and is not a  
34 successor to the discharger or to any person in any way responsible  
35 for the hazardous substance or to anyone liable for cleanup and  
36 removal costs pursuant to section 8 of P.L.1976, c.141 (C.58:10-  
37 23.11g);

38 (c) the person, within 30 days after acquisition of the property,  
39 gave notice of the discharge to the Department of Environmental  
40 Protection in a manner the Department of Environmental Protection  
41 prescribes;

42 (d) the person does not disrupt or change, without prior written  
43 permission from the Department of Environmental Protection, any  
44 engineering or institutional control that is part of a remedial action  
45 for the contaminated site or any landfill closure or post-closure  
46 requirement;

47 (e) the person does not exacerbate the contamination at the  
48 property;

1 (f) the person does not interfere with any necessary remediation  
2 of the property;

3 (g) the person complies with any regulations and any permit the  
4 Department of Environmental Protection issues pursuant to section  
5 19 of P.L.2009, c.60 (C.58:10C-19) or paragraph (2) of subsection  
6 a. of section 6 of P.L.1970, c.39 (C.13:1E-6);

7 (h) with respect to an area of historic fill, the person has  
8 demonstrated pursuant to a preliminary assessment and site  
9 investigation, that hazardous substances have not been discharged;  
10 and

11 (i) with respect to a properly closed sanitary landfill facility, no  
12 person who owns or controls the facility receives, has received, or  
13 will receive, with respect to such facility, any funds from any post-  
14 closure escrow account established pursuant to section 10 of  
15 P.L.1981, c.306 (C.13:1E-109) for the closure and monitoring of  
16 the facility.

17 Only the person who is liable to clean up and remove the  
18 contamination pursuant to section 8 of P.L.1976, c.141 (C.58:10-  
19 23.11g) and who does not have a defense to liability pursuant to  
20 subsection d. of that section shall be liable for cleanup and removal  
21 costs.

22 u. No more than 180 days after the date of enactment of  
23 P.L.2012, c.24, the board shall complete a proceeding to establish a  
24 registration program. The registration program shall require the  
25 owners of solar electric power generation facility projects  
26 connected to the distribution system to make periodic milestone  
27 filings with the board in a manner and at such times as determined  
28 by the board to provide full disclosure and transparency regarding  
29 the overall level of development and construction activity of those  
30 projects Statewide.

31 v. The issuance of SRECs for all solar electric power  
32 generation facility projects pursuant to this section, for projects  
33 connected to the distribution system with a capacity of one  
34 megawatt or greater, shall be deemed "Board of Public Utilities  
35 financial assistance" as provided pursuant to section 1 of P.L.2009,  
36 c.89 (C.48:2-29.47).

37 w. No more than 270 days after the date of enactment of  
38 P.L.2012, c.24, the board shall, after notice and opportunity for  
39 public comment and public hearing, complete a proceeding to  
40 consider whether to establish a program to provide, to owners of  
41 solar electric power generation facility projects certified by the  
42 board as being three megawatts or greater in capacity and being net  
43 metered, including facilities which are owned or operated by an  
44 electric public utility and approved by the board pursuant to section  
45 13 of P.L.2007, c.340 (C.48:3-98.1), a financial incentive that is  
46 designed to supplement the SRECs generated by the facility to  
47 further the goal of improving the economic competitiveness of  
48 commercial and industrial customers taking power from such

1 projects. If the board determines to establish such a program  
2 pursuant to this subsection, the board may establish a financial  
3 incentive to provide that the board shall issue one SREC for no less  
4 than every 750 kilowatt-hours of solar energy generated by the  
5 certified projects. Any financial benefit realized in relation to a  
6 project owned or operated by an electric public utility and approved  
7 by the board pursuant to section 13 of P.L.2007, c.340 (C.48:3-  
8 98.1), as a result of the provisions of a financial incentive  
9 established by the board pursuant to this subsection, shall be  
10 credited to ratepayers.

11 x. Solar electric power generation facility projects that are  
12 located on an existing or proposed commercial, retail, industrial,  
13 municipal, professional, recreational, transit, commuter,  
14 entertainment complex, multi-use, or mixed-use parking lot with a  
15 capacity to park 350 or more vehicles where the area to be utilized  
16 for the facility is paved, or an impervious surface may be owned or  
17 operated by an electric public utility and may be approved by the  
18 board pursuant to section 13 of P.L.2007, c.340 (C.48:3-98.1).  
19 (cf: P.L.2019, c.448, s.1)  
20

21 11. Section 4 of P.L.2016, c.12 (C.13:8C-46) is amended to read  
22 as follows:

23 4. There is established in the General Fund a special account to  
24 be known as the "Preserve New Jersey Fund Account."

25 a. The State Treasurer shall credit to this account:

26 (1) (a) (i) For State fiscal year 2016, an amount equal to 71  
27 percent of the four percent of the revenue annually derived from the  
28 tax imposed pursuant to the "Corporation Business Tax Act  
29 (1945)," P.L.1945, c.162 (C.54:10A-1 et seq.), as amended and  
30 supplemented, or any other State law of similar effect, dedicated for  
31 recreation and conservation, farmland preservation, and historic  
32 preservation purposes pursuant to subparagraph (a) of Article VIII,  
33 Section II, paragraph 6 of the State Constitution, less \$19,972,000  
34 already appropriated and expended for parks management in  
35 P.L.2015, c.63; and

36 (ii) in each State fiscal year 2017 through and including State  
37 fiscal year 2019 an amount equal to 71 percent of the four percent  
38 of the revenue annually derived from the tax imposed pursuant to  
39 the "Corporation Business Tax Act (1945)," P.L.1945, c.162  
40 (C.54:10A-1 et seq.), as amended and supplemented, or any other  
41 State law of similar effect, dedicated to recreation and conservation,  
42 farmland preservation, and historic preservation purposes pursuant  
43 to subparagraph (a) of Article VIII, Section II, paragraph 6 of the  
44 State Constitution; and

45 (b) (i) in each State fiscal year commencing in State fiscal year  
46 2020 and annually thereafter, an amount equal to 78 percent of the  
47 six percent of the revenue annually derived from the tax imposed  
48 pursuant to the "Corporation Business Tax Act (1945)," P.L.1945,

1 c.162 (C.54:10A-1 et seq.), as amended and supplemented, or any  
2 other State law of similar effect, dedicated to recreation and  
3 conservation, farmland preservation, and historic preservation  
4 purposes pursuant to subparagraph (a) of Article VIII, Section II,  
5 paragraph 6 of the State Constitution; and

6 (ii) any amount received from a solar electric power generation  
7 facility pursuant to section 5 of P.L. , c. (C. ) (pending  
8 before the Legislature as this bill); and

9 (2) in each State fiscal year, an amount equal to the amount  
10 dedicated pursuant to subparagraph (b) of Article VIII, Section II,  
11 paragraph 6 of the State Constitution.

12 b. In each State fiscal year, the amount credited to the Preserve  
13 New Jersey Fund Account shall be appropriated from time to time  
14 by the Legislature only for the applicable purposes set forth in  
15 Article VIII, Section II, paragraph 6 of the State Constitution and  
16 **[this act]** P.L.2016, c.12 (C.13:8C-43 et seq.) for:

17 (1) providing funding, including loans or grants, for the  
18 preservation, including acquisition, development, and stewardship,  
19 of lands for recreation and conservation purposes, including lands  
20 that protect water supplies and lands that have incurred flood or  
21 storm damage or are likely to do so, or that may buffer or protect  
22 other properties from flood or storm damage;

23 (2) providing funding, including loans or grants, for the  
24 preservation and stewardship of land for agricultural or horticultural  
25 use and production;

26 (3) providing funding, including loans or grants, for historic  
27 preservation; and

28 (4) paying administrative costs associated with (1) through (3) of  
29 this subsection.

30 c. Nothing in **[this act]** P.L.2016, c.12 (C.13:8C-43 et seq.)  
31 shall authorize any State entity to use constitutionally dedicated  
32 CBT moneys for the purpose of making any payments relating to  
33 any bonds, notes, or other debt obligations, other than those relating  
34 to obligations arising from land purchase agreements made with  
35 landowners.

36 d. In each State fiscal year after the enactment of P.L. ,  
37 c. (C. ) (pending before the Legislature as this bill), the State  
38 Treasurer shall notify, in writing, the chairperson of the Garden  
39 State Preservation Trust of the amount received from a solar electric  
40 power generation facility pursuant to section 5 of P.L. ,  
41 c. (C. ) (pending before the Legislature as this bill) and  
42 credited to the Preserve New Jersey Fund Account pursuant to  
43 subsubparagraph (ii) of subparagraph (b) of paragraph (1) of  
44 subsection a. of this section to be used for the purposes of  
45 subsection b. of this section.

46 (cf: P.L.2016, c.12, s.4)

47  
48 12. This act shall take effect immediately.
