STATEMENT

This bill enhances penalties for possession, distribution, and
manufacture of fentanyl based on the amount of fentanyl involved.

Under current law, it is a crime of the second degree distribute or
manufacture fentanyl in a quantity of one ounce or more. It is a
crime of the third degree to manufacture or distribute fentanyl in a
quantity of less than one ounce.

This bill changes the law to make the manufacture and
distribution of: (1) 10 grams or more of fentanyl, or its analog,
including any adulterants or dilutants, or 100 grams or more of a
fentanyl mixture, including any adulterants or dilutants, a crime of
the first degree; (2) five grams or more, but less than 10 grams, of
fentanyl, or its analog, including any adulterants or dilutants, or 50
grams or more, but less than 100 grams, of a fentanyl mixture,
including any adulterants or dilutants, a crime of the second degree;
and (3) less than five grams of fentanyl or its analog, including any
adulterants or dilutants, or less than 50 grams of a fentanyl mixture,
including any adulterants or dilutants a crime of the third degree.

This bill also specifies that possession of less than 10 grams of
fentanyl is a crime of the third degree, similar to possession of other
controlled dangerous substances. However, this bill specifies that
possession of 10 grams or more of fentanyl is a first degree crime.

First degree crimes are punishable by 10 to 20 years
imprisonment, a fine of up to $200,000, or both. Second degree
crimes are punishable by up to five to 10 years imprisonment, a fine
of up to $150,000, or both. Third crime crimes are punishable by
three to five years imprisonment, a fine of up to $15,000, or both.

The sponsor’s intent is not to target or punish fentanyl users who
could benefit from drug rehabilitation. Rather, the sponsor’s express
intent is to target drug distributors. Many people are dying due to
fentanyl overdoses. Further, other illicit drugs are being combined
with fentanyl, which is dangerous because users do not know they
are ingesting lethal doses of fentanyl. New Jersey, along with many
other areas, is being negatively impacted by the fentanyl crisis.
