

SENATE LABOR COMMITTEE

STATEMENT TO

SENATE, No. 3781

with committee amendments

STATE OF NEW JERSEY

DATED: DECEMBER 14, 2023

The Senate Labor Committee reports favorably Senate Bill No. 3781, with committee amendments.

As amended by the committee, this bill directs the Department of Labor and Workforce Development to establish a grant program for YouthBuild programs throughout New Jersey. YouthBuild is a community-based pre-apprenticeship program that provides job training and educational opportunities for at-risk youth ages 16 to 24 through the United States Department of Labor. The bill would expand YouthBuild programs in the State by establishing a State program with funding that would work in coordination with the federal program.

In order for a YouthBuild program to be eligible to receive this grant funding, several program requirements must be met: (1) serving economically disadvantaged young people ages 16 to 24 who have not received a secondary school diploma or its equivalent; (2) offering integrated education and job skills training services and activities which are evenly divided within the program, with 50 percent of students' time spent in classroom-based instruction, counseling, and leadership development instruction and 50 percent of their time spent in service learning experiences at job sites; (3) curriculum culminating in an industry recognized credential, with the YouthBuild program being the entity administering the examination; (4) providing stipends to youth participants to cover the costs associated with their full time participation in this program.

Only not-for-profit private agencies that are affiliates of YouthBuild USA or have received a federal Housing and Urban Development YouthBuild award are eligible to use the term YouthBuild and apply for this funding. The Commissioner of Labor and Workforce Development will require all programs eligible to receive YouthBuild grant funding to meet the specific application requirements outlined in this bill. YouthBuild programs selected for funding under the bill will be required to report outcomes to the Department of Labor and Workforce Development, which will be publicly available. The department will also complete an initial evaluation report on the progress of individual programs funded under

the bill; this report will be available to the Governor and the Legislature.

The purpose of this bill is to increase accessibility and sustainability of the evidence-based YouthBuild model. For more than 30 years, the YouthBuild model, through YouthBuild USA, has demonstrated positive outcomes for youth-supporting young people in earning their high school diploma, or equivalent, and acquiring the skills and credentials necessary to meet their postsecondary goals. Over the years, the number of YouthBuild programs throughout the State of New Jersey has fluctuated because the federal YouthBuild appropriation from the federal Department of Labor is not guaranteed. A Statewide YouthBuild appropriation would help ensure that opportunity youth throughout New Jersey are consistently served with an evidence-based model. It would promote the sustainability of currently operating YouthBuild programs and would also likely lead to an increase in YouthBuild programs throughout New Jersey.

The bill appropriates an unspecified amount from various federal sources.

COMMITTEE AMENDMENTS:

The amendments adopted by the committee delete the multiyear appropriation from the General Fund, ranging from \$4 million in FY 2024 to \$6 million in FY 2028, and instead appropriate an unspecified amount from federal sources. The amendments also makes technical corrections to the bill.
