Discussion Points

Division of State Police: Recruit Class

1. The FY 2024 Budget in Brief indicates that FY 2024 will end with 3,200 troopers, 40 more than FY 2023. The Division of State Police graduated the 163rd State Trooper class on July 22, 2022 with 163 troopers (156 men and seven women). The 164th State Trooper class graduated on February 24, 2023 with 103 troopers (99 men and four women). The 165th class is scheduled to begin in March of 2023.

- ***Question:*** **Please provide statistics on the 165th, 164th, and 163rd recruit classes:**
    - **Number of applicants**
    - **Minority and gender representation in terms of number and percentage**
    - **Enrollment target per class**
    - **Graduation rate.**

    - 163rd Class selection process was used for the 163rd and 164th recruit classes – 3,677 total applicants
    - 165th Class selection process – 3,820 total applicants

163rd Class and 164th Class

	Overall							
Race	Total		Male		Female		Missing	
White (Not Hispanic or Latino)	1547	42%	1367	45%	177	31%	3	7%
Hispanic or Latino	1015	28%	829	27%	180	32%	6	14%
African American or Black (Not Hispanic or Latino)	762	21%	575	19%	173	30%	14	32%

Choose Not to Answer/Missing	112	3%	73	2%	20	3%	0	0%	19	14%
TOTAL	**3820**	**100%**	**3050**	**100%**	**625**	**100%**	**5**	**100%**	**140**	**100%**

- **Enrollment target per class**

The enrollment target per class is 215 applicants, which is the maximum number that the current Academy can hold given limited bunk space and training facilities. Among other things, the Academy is an adjustment for recruits and many determine that they are not physically or mentally prepared to continue with training. The 164th class was filled with residual applicants from the 163rd class selection process and started the academy with 152 recruits.

- **Graduation rate.**
    - 163rd Class: Day 1: 216 / Graduated: 163 = 75%
    - 164th Class: Day 1: 152 / Graduated: 103 = 68%
    - 165th Class: In Progress / 215 recruits

Discussion Points (Cont'd)

- ***Question:*** **Were there sufficient applicants to fill each recruit class? How many qualified applicants resigned their commission due to the lapse in time between applying and the class commencing?**

There were sufficient applicants for the 163rd and 165th classes being that these classes were drawn from a new selection process. The 164th class was an additional class that utilized the remaining applicant pool from the 163rd class selection process and therefore did not meet the 215-recruit enrollment target. The number of applicants withdrawn from the process does not include a reason for withdrawal. Withdrawals occur throughout the selection process. There is no particular part of the process where withdrawals occur more often. Applicants withdraw for various reasons including accepting other job opportunities, family situations, and medical reasons. Withdrawal statistics by class are as follows:

- 163rd Class: 87 applicants
- 164th Class 59 applicants
- 165th Class: 71 applicants

- ***Question:*** **Please provide budget information in chart format for the 166th, 165th, 164th, and 163rd recruit classes, respectively, showing the training costs to be incurred in each of FY 2024, FY 2023, and FY 2022.**

	Salary	Non-Salary	Total
163rd	$2,492,384	$2,275,053	$4,767,437
164th	$1,797,294	$2,423,923	$4,221,218
165th (proj.)	$2,700,000	$2,734,600	$5,434,600
166th (proj.)	$2,700,000	$2,734,600	$5,434,600

Training costs incurred by fiscal year:
FY21 (ARP funds) - $3,995,426
FY22 - $4,472,287
FY23 - $5,955,342
FY24 - $5,434,600

Discussion Points (Cont'd)

Division of State Police Retirements: Healthcare in Retirement

2. P.L.2018, c.63 requires the State to pay full cost of health care benefits coverage in retirement for State Police Retirement System members who retire at mandatory retirement age of 55 with more than 20 years but less than 25 years of service.

- ***Question:*** **Please provide an update on the number of troopers eligible for retirement in the next 10 years, per year. For the period between 2022 and 2023, please indicate, by year, the number of troopers who were eligible to retire, the number who actually retired, and the length of time that elapsed between retirement eligibility and actual retirement for each retiree. How do past and future retirements affect the minority ratios? Was there a noticeable increase in retirements in 2021 and 2022 that can be attributed to a changing perception of law enforcement within society?**

The past and future retirements have not appeared to affect the minority ratios. As the below chart indicates, the minority ratio has steadily increased over the past 10 years.

Fiscal Year	Minority Representation %
2012	17.2%
2013	17.4%
2014	19.9%
2015	20.3%
2016	20.6%
2017	20.3%
2018	21.4%
2019	22.3%
2020	22.8%
2021	24.6%
2022	24.8%
2023 YTD	25.9%

We are not aware of any retirements in 2021 and 2022 that can be attributed to the changing perception of law enforcement within society.

2023	49	32	1.60

*****Analysis based on 25 years of Enlisted service time

- *Question:* **Did the department experience an increase in State Trooper retirements resulting from the law enacted in 2018? Did the State have to increase the number and rate of recruit classes to backfill for the increase in the number of retirements that occurred due to that law? Please provide for each year since 2018 the number of State Troopers who were eligible to retire under P.L.2018, c. 63, and those who actually retired under P.L.2018, c. 63.**

The law, P.L.2018, c.63, did not have an impact the rate of retirements, therefore the State did not have to increase the number and rate of recruit classes.

Fiscal Year	Mandatory Retirements
2018	8
2019	6

Division of State Police: Vehicle Theft

3a. Reported auto thefts in New Jersey reached a total of 15,560 for calendar year 2022. This is an increase of 1,135 incidences, or 8 percent over 2021. Auto thefts in calendar years 2021 and 2022 were 22 percent and 31 percent, respectively, higher than in the two preceding years indicating that the trend was seemingly not abating. However, the Division of State Police auto theft task force reported that thus far in 2023 there has been a decline of 26 percent in reported vehicle thefts, indicating that the trend seems to be reversing.

Number of Cars Stolen Annually in New Jersey*

CY 2022	CY 2021	CY 2020	CY 2019
15,650	14,425	11,781	11,989

**According to the New Jersey Attorney General's Office 3/2023*

To counter the growing auto theft activity, the Division of State Police and the Division of Criminal Justice began expanding the task force by increasing the number of detectives and prosecutors on the force and by soliciting help from police departments around the State.

As late as March 2022, the Attorney General indicated that the department was still actively recruiting officers and agencies to join the effort, allocating up to 125,000 in federal Justice Assistance Grant funding to pay for overtime reimbursements and equipment costs and $10 million to expand the use of license plate recognition technology.

Discussion Points (Cont'd)

- *Question:* **To what extent has the increased staffing and the use of license plate recognition technology contributed to the reversal of the auto theft trend? Please provide details of the efforts of the auto theft task force over the last year, including the task force's use of the license plate readers, real time crime centers, increased staffing levels, collaborations with municipal departments and other law enforcement agencies, and other efforts.**

The Auto Theft Task Force (ATTF) has taken advantage of modern crime-fighting technologies that have become a day-to-day tool utilized by detectives. Automated License Plate Readers (ALPR) technology is a critical tool which supports a wide range of public safety and law enforcement activities. Recognizing the importance of ALPR, NJSP created the Statewide Networked ALPR Program (SNAP) to coordinate existing and future ALPR systems, data, and law enforcement users. The Statewide ALPR Coordinator and NJ SNAP responsibilities have formalized this technology by codifying ALPR standards and guidance by contributing to New Jersey Attorney General Directive 2022-12. This directive dictates data sharing and management standardization. The procurement and enhancement of additional equipment is ongoing.

The staffing increases in the auto theft task force over the last year have significantly expanded and has helped investigators spread their mission further across the state. Comparing 2023 to 2021, the auto theft task force has increased staffing by 52% going from 25 assigned detectives to 38 detectives currently. The increase in task force officers (TFO) has risen 143% from 7 TFO in 2021 to 17 TFO currently with three additional TFO pending. Long time relationships and collaborations with municipal and county agencies has expanded the amount of partner task force agencies to 13 which include the Union County Police Department, Marlboro Police Department, Woodbridge Police Department, Middlesex Police Department, Newark Police Department, Ocean County Sheriff's Department, Division of Criminal Justice, Warren County Prosecutor's Office, Bergen County Sheriff's Department, Fairfield Police Department, Westfield Police Department, Paramus Police Department, and the Camden County Police Department.

These measurables, increased staffing, and the use of ALPR, have aided task force members to identify motor vehicle theft organizations, identify stolen motor vehicles more regularly, and make arrests of violent recidivist offenders. Working in conjunction with our real time crime centers also has aided in the collaboration between the ATTF and local and county police departments. Real time information has been broadcasted to our detectives in a faster and more efficient manner, in turn identifying repeat theft offenders and quicker recovery of stolen vehicles.

In addition, the Office of the Insurance Fraud Prosecutor (OIFP) joined the statewide Auto Theft Task Force (ATTF) in 2019. As part of its active collaboration with the New Jersey State Police, the Division of Criminal Justice, and county agencies, OIFP has dedicated funding and staff to address the uptick in auto theft. Accordingly, OIFP developed the following ATTF-related initiatives:

1) In an effort to dissuade NJ citizens from leaving their key fobs or keys inside their vehicles, OIFP has funded the "Lock It or Lose It" public awareness campaign. The campaign was broadcast across various media platforms including television streaming, social media, sporting events, travel apps and the like;

Discussion Points (Cont'd)

2) OIFP has allocated funding to pay overtime for ATTF members from law enforcement agencies located in counties that participate in OIFP's county reimbursement program;

3) OIFP has provided funding to pay for ATTF-related equipment purchases; and

4) OIFP has committed direct investigative and prosecutorial support to the ATTF including:

    a) Two (2) full-time detectives for investigation;
    b) Three (3) part-time Deputy Attorneys General for the review and prosecution of ATTF matters; and
    c) One (1) managing Deputy Attorney General for the supervision of same.

As just one highlight of its work on the ATTF, in 2022, OIFP charged 18 defendants by indictment/accusation in 9 total cases. 2 of the 18 defendants were charged with First Degree Crimes (Employing Juvenile in Comm of Crime, Promoting Organized Street Crime), and 13 of the 18 defendants were charged with Second Degree Crimes (receiving stolen property, fencing, Use of Juvenile in Automobile Theft, etc.). In addition to auto-related crimes, 7 of the 18 defendants (38.8%) were charged with Possession of a Prohibited Weapon. Of the 82 total charges filed against these 18 defendants, 18 of those 82 charges (21.9%) are weapons-related (i.e., guns, prohibited devices, prohibited ammunition, possession of a weapon during CDS activities, and Certain Persons not to possess a weapon), illustrating the connection between auto theft and more serious crimes.

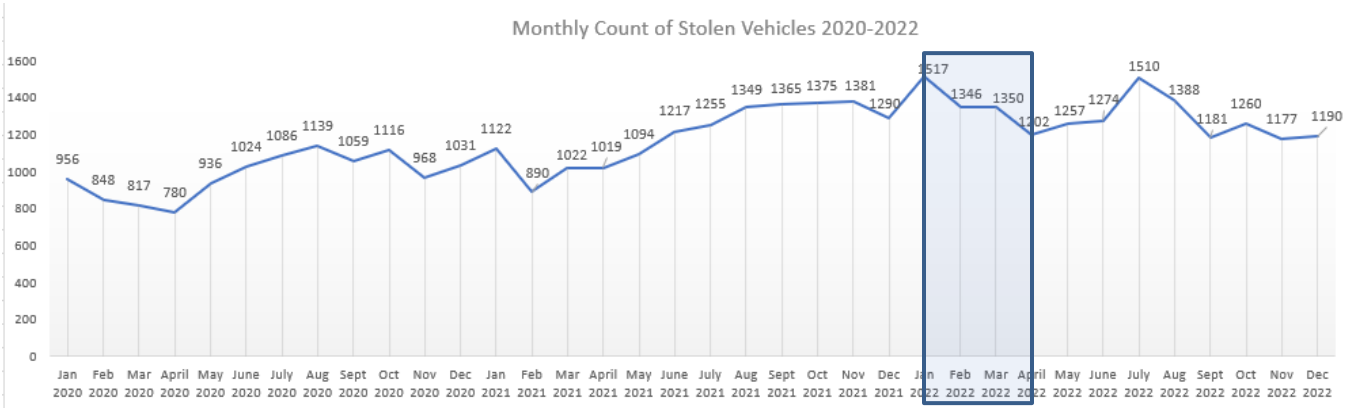

OIFP's membership in the ATTF has fostered collaboration among ATTF partners, whose collective efforts have contributed to the reversal of the auto theft trend.

3b. In December 2020 the Attorney General issued a directive that law enforcement is no longer allowed to pursue vehicles that are reported stolen. In response to the surge in car thefts, the Attorney General temporarily reversed this decision in April 2022. Through the end of calendar year 2022 law enforcement was permitted again to pursue vehicles reported stolen. The Attorney General's office indicated the policy decision was assessed at the end of CY 2022 and the review did not result in any further changes in policy.

- ***Question:*** **Has the decision to re-permit the pursuit of vehicles reported stolen been effective in increasing the recovery of stolen vehicles and the apprehension of suspects? Please provide the most recent data on vehicle thefts and law enforcement safety as related to vehicle pursuits for CY 2023 to date, CY 2022, and CY 2021. Please provide the accident, injury, and death rates resulting from the re-permitting the pursuit of vehicles reported stolen. Does the Attorney General plan to maintain the current policy once auto theft numbers have declined and if not, please explain which factors would again demand the pursuit policy be re-evaluated?**

During early 2022, concern arose that the vehicle pursuit policy may have been contributing to increasing trends in stolen vehicles. However, the fluctuation in vehicle pursuits and stolen vehicles suggests that the change in the pursuit policy and stolen vehicle reports are unrelated. The analysis below concerns vehicle pursuits and stolen vehicles, not recovery of stolen vehicles.

Discussion Points (Cont'd)

The policy limiting pursuit of stolen vehicles was in effect from January to March of 2022 (see boxed area on time series above). The number of stolen vehicles was increasing prior to the new policy and continued to increase immediately after the implementation of the new policy. Although there was an immediate increase in vehicle thefts in January of 2022, which coincided with the policy limiting pursuits for stolen vehicles, vehicle thefts did not consistently decrease after permission to pursue stolen vehicles was restored—they were sometimes higher and sometimes lower.

The Attorney General's Office continues to evaluate data regarding the current pursuit policy.

Division of State of Police: Waterfront Commission of the New York Harbor

4. In 1953, New York and New Jersey jointly formed the Waterfront Commission of New York Harbor for the purpose of addressing racketeering and other criminal, corrupt, and abusive conditions in the Port of New York and New Jersey. The commission conducts background checks on prospective port employees to guard against infiltration by individuals with criminal ties or records, and to prevent guns, drugs, and other contraband from moving through the ports overseas.

P.L.2017, c.324 requires New Jersey's withdrawal from the compact establishing the Waterfront Commission of New York Harbor and the transfer of the commission's New Jersey operations to the State Police. On December 27, 2021, New Jersey notified Congress and the Governor of New York that it intended to withdraw unilaterally from the interstate compact and terminate the bi-state commission. New York sued to stop the March 28, 2022 withdrawal, which case is awaiting a decision by the United States Supreme Court after oral arguments were heard on March 1, 2023. Nevertheless, New Jersey pulled its commissioner from the commission and assigned the Division of State Police to take over the duties. According to New Jersey's court filings in 2022, the Division of State Police has expended $2.3 million to date, including 17,000 work hours, on a transition to take over enforcement.

The FY 2024 Governor's Budget recommends the continuation of the appropriation of $4 million to the Division of State Police to absorb the duties of the Waterfront Commission of the New York

Discussion Points (Cont'd)

Harbor. As of March 15, 2023, no funds in the Waterfront account have been encumbered or expended.

- ***Question:*** **With the Waterfront Commission of the New York Harbor compact still intact, please provide an update to the proceedings withdrawing from the bi-state compact and commission. Please explain the benefits to New Jersey by withdrawing from the bi-state compact.**

On March 1, 2023, the Supreme Court of the United States heard oral arguments regarding the NY v. NJ Waterfront Commission Compact (Docket No. 22O156). It is anticipated that a ruling will be rendered by the end of the court's term in June 2023. Should the Court rule in favor of New Jersey, powers of the Waterfront Commission will be returned to the State of New Jersey. Specifically, under the terms of P.L.2017, c.324, the State of New Jersey via the New Jersey State Police (NJSP) will maintain full police powers within their borders and ensure regulation and oversight within the Port.

NJSP is in the midst of a comprehensive plan to transition the law enforcement, regulatory, and administrative functions of the Commission to its jurisdiction. The NJSP will utilize proven systems and capabilities to ensure that the port's industry and workforce are safe, secure, and confident in continuing their mission and ensuring economic prosperity. Safety is preventing terrorism, organized crime, and actors from impacting port operations. The NJSP will detect and deter illegal activity through the collection and sharing of intelligence, by conducting long-term proactive investigations, and the leveraging of both public and private sector partnerships. Accountability will come through the prosecution of criminal actors attempting to disrupt port operations.

Security is being forward of the threat by collaborating with the workforce and enhancing our knowledge of the port environment. The NJSP is committed to long-term partnerships with stakeholders and the sharing of vital intelligence to maximize security and safeguard uninterrupted port operations. Port security will be modernized through cutting-edge tools and systems.

Please also be aware that New Jersey does have an active Commissioner serving with the Commission to represent New Jersey's interests. Jennifer Davenport was nominated by Governor Murphy and confirmed by the New Jersey Senate on November 21, 2022 to fill that role.

- ***Question:*** **Which unit of the Division of State Police is anticipated to staff the waterfront detail? What did the 17,000 transition work hours entail?**

It is anticipated that the newly created NJSP Port Security Section (PSS) will staff the waterfront detail. The PSS is projected to be a multi-faceted organizational element of the Division that will oversee operations and activity impacting the Port of New York and New Jersey. Specifically, the PSS will be charged with conducting port-related investigations and intelligence gathering, timely licensing and regulation of businesses and port workers, and maintaining audit and administrative capabilities to ensure operational efficiency. The PSS is expected to be comprised of three bureaus, six units and staff 89 total employees (i.e., 49 enlisted and 40 civilian personnel.)

Discussion Points (Cont'd)

Between the middle of calendar year 2021 and March 25, 2022, the NJSP expended over 17,000 person-hours, totaling $2.3 million in salary and fringe benefits, in preparation for the initial anticipated March 28, 2022 transfer date. Roughly 100 of those person-hours were spent on interviews with representatives from law enforcement partners (including the Federal Bureau of Investigation, Department of Homeland Security, and local police departments), former commission employees, as well as industry and labor leaders to understand and assess port issues and needs. Furthermore, hundreds of person-hours were devoted to research, including review of sensitive information used by law enforcement, as well as publicly available information such as Commission Annual Reports and the Commission Tables of Organization to determine the nature, scope, and capabilities of the current commission to assess the law enforcement, security and regulatory needs of the port.

Division of State Police: Traffic Stop Dashboard

5. Since 2009, the Office of Law Enforcement Professional Standards (OLEPS) has been tasked by statute with publishing the aggregate data of motor vehicle stops by the troopers of the Division of State Police.

In July 2021, former Attorney General Grewal made this index of reports available online. The Division of State Police Traffic Stop Dashboard exhibits data from all traffic stops made by the Division of State Police from January 1, 2009 to May 31, 2021. Data on the number of stops, reasons for stops, race of those stopped, and stop outcomes are compiled and displayed in an interactive, graphic format. This tool is accessible to anyone with internet access and was designed to improve transparency and accountability as part of the Excellence in Policing Initiative of the Attorney General's office.

While there are over six million entries to analyze in this database, the information is limited to traffic stops executed by the Division of State Police. There is no central public record or database of traffic stops performed by other law enforcement authorities in the State. The FY 2023 budget allocated $500,000 toward the Traffic Stop Dashboard with the intention of commencing the collection and reporting of municipal law enforcement traffic stops data into the database, but no funds were encumbered or expended. The FY 2024 Governor's Budget does not recommend the continuation of this funding related to municipal law enforcement traffic stops.

- ***Question:*** **In light of the fact that the Division of State Police encompasses a part of New Jersey's law enforcement and that there are over 500 municipal law enforcement entities that can make traffic stops, is there a plan to expand the State Police database to include municipal traffic stop data? Is a $500,000 appropriation toward the municipal traffic stop database sufficient to establish a program of this size and complexity? What was the purpose of the $500,000 appropriation in FY 2023 and why was it not expended?**

The Attorney General's Office is committed to transparency and use of data to reflect and inform its policy decisions. This is most clearly expressed through the creation of the Office of Justice Data in 2021. At this time, the collection of traffic stop data is diffuse as law enforcement organizations may not collect stop data or do so in a uniform manner. The common reporting and compiling of traffic stop data from law enforcement agencies across the state would be a substantial

Discussion Points (Cont'd)

undertaking and require significant resources to, among other things, allow for a uniform data collection and export of electronic records.

It is difficult to estimate the specific cost to upgrade or adjust over 500 law enforcement agencies across the state, but such an investment would be significant and require equipment, resources, personnel, and time to manage the process and program. A statewide program would include the coordination of an estimated 2 million traffic stops from over 530 law enforcement agencies.

What was the purpose of the $500,000 appropriation in FY2023? And why was it not expended?

With the understanding that a statewide system would require significant investment, the office utilized the $500,000 appropriation to begin work to compile the traffic stop data for municipalities with a threshold number of stops and that already collect data. This was done to achieve the most efficient and effective use of the funding. In the fall of 2022, the Office announced a grant program whereby law enforcement agencies with at least 1000 traffic stops per year could apply for up to $15,000 to upgrade their data systems for traffic stop data collection – on the condition that they share their stop data with OAG. About 400 agencies met the volume criterion to be eligible for the grant. Our hope was to encourage agencies to share data voluntarily by offering them the ability to upgrade their infrastructure at the state's expense. Only one municipality applied for the grant.

The Office is currently reviewing options to expend the funding to achieve the goal of remedying traffic stop disparities, potentially as a pilot program with the New Jersey State Police.

Division of State Police: Mounted Patrol Unit

6. During the FY 2023 budget hearing process, the Division of State Police indicated that the Mounted Patrol Unit is a full-time unit located in the Special Operations Section, Technical Response Bureau. This unit was formally created as a full-time entity in the summer of 2020; however, historically the mounted details have been staffed over the years by volunteer enlisted Troopers that utilized their own horses in order to attend ceremonial and community events.

The unit currently provides a wide variety of services including missing persons searches, target hardening detail assists, community outreach, and providing a rider less horse for funerals. With the creation of a full time unit, it is currently staffed by a Lieutenant, Sergeant First Class, Sergeant, and Trooper, which oversees and runs the day-to-day operations. The Division of State Police indicates there is a need for the "Field Rider" group that assists in the details as a collateral duty. These Field Riders (approximately ten Troopers throughout the Division of State Police) volunteer their horses in order to attend special events, ceremonial details, and other requests for the presence of the unit.

To attain certification, the unit has a professional relationship with the Pennsylvania State Police Mounted program. The Pennsylvania program offers a ten-day Mounted Riders Course and offers course slots to the members of the unit, which sends their members, both assigned and volunteer, to this certification course.

Discussion Points (Cont'd)

The Division of State Police acknowledges that without the Field Riders, and members utilizing their horses, these details could not be staffed. The Troopers pay for the maintenance of their own horses. There are currently no State funds allocated for the use and maintenance of the personally owned horses and these expenses are solely funded by the owners of the horses.

However, the unit is currently working on a comprehensive Barn and Riding Arena project at the New Jersey State Corrections Property which with planning, this project is noted to be funded and underway. The Division of State Police anticipates purchasing State-owned horses to be utilized by the unit. With the future purchase of State-owned horses, the unit is coordinating with Division of State Police's Fiscal Control Bureau and the Division of Law for funding directed towards the care and maintenance of State-owned horses.

- ***Question:*** **Please provide a status overview and timeline for the "Barn and Riding Arena" project at the New Jersey State Corrections Property referred to during the FY 2023 budget process. In which account is this program budgeted? What funding has been dedicated for the project to date? Please provide the anticipated annual costs associated with the Division of State Police Mounted Unit. What expenses will the program cover once implemented (travel, boarding, food, veterinary, insurance, boarding, grooming, etc.)? Please provide an anticipated time-line for the program to have acquired all the needed equines to be up and running and the number of equines anticipated in the program.**

The Division of State Police is utilizing internal funds for the "Barn and Riding Arena" project.

For feeding, using a 2000-pound draft horse, the rough estimate with no supplements or horseshoes, for hay is $3,000 per year. For our estimated ten horses, hay feeding will cost $30,000 per year. Currently, there is plenty of grass acreage with decent pasture management which will decrease this estimated amount significantly to a need only when hay growing season ends. A 2000-pound horse will need 18 pounds of feed per day, one 50-pound bag of Sentinel LS is $30.00, yielding $30,000 per year for ten horses. For veterinary and farrier costs, ten horses per year would yield approximately $3,000 per year. For dental care, 10 horses per year would approximately cost $1,000 per year. For bedding expenses, 10 horses per year would cost approximately $10,000 per year. The total estimated cost for 10 horses would be approximately $80,000 per year in addition to $300.00 per horse per month for details. This cost does not include any Mounted Unit training.

The New Jersey State Police is working with the Department of Corrections on the proposed transition of the Jones Farm property to the New Jersey State Police. A detailed timeline is not available at this time.

Division of State Police: Emergency Management Assistance Compact

7. The Department of Law and Public Safety has a long history of providing mutual aid to jurisdictions outside of New Jersey. The requests are through the Emergency Management Assistance Compact (EMAC), a mutual aid agreement allowing states and territories to share resources in response to natural and man-made disasters.

Discussion Points (Cont'd)

In September of 2022, New Jersey authorized aid to Puerto Rico to assist in recovery efforts caused by Hurricane Fiona. It was indicated that New Jersey State Troopers and civilian medical doctors would support the Puerto Rico Police Bureau Assistance.

In addition, a New Jersey All-Hazards Incident Management Team travelled to Puerto Rico as a Supplemental Response Team working directly with the Federal Emergency Management Agency. The 12-member team consists of individuals from several state departments.

In October of 2022, New Jersey Task Force 1 deployed to Florida to rescue victims who were trapped by flooding or structural damage due to Hurricane Ian, a Category 4 storm. The task force team is made up of 250 volunteers from throughout the State.

In December 2022, the Division of State Police, in coordination with the NJ Department of Transportation, were reported to have supported the snowstorm in New York through an Emergency Management Assistance Compact.

- ***Question:*** **In addition to these noted Emergency Management Assistance Compact requests, please list and describe briefly the purpose of each deployment in which the department provided assistance outside of New Jersey in FY 2022 and FY 2023. For each mission: a) how many members of the Division of State Police, including troopers, were deployed; b) what were the dates of the deployment; c) what was the cost of the mission to the State of New Jersey; and d) if reimbursement was received, how much was received and from whom?**

Personnel and equipment are generally deployed outside the State in one of two ways: (1) through EMAC; and (2) by agreement with and authorization of FEMA. Deployments through EMAC are processed and facilitated by the New Jersey Office of Emergency Management (NJOEM) within the Division of State Police, regardless of whether the personnel and equipment deployed included any NJSP resources. The following information includes deployments coordinated through the EMAC process (state to state requests), as well as a special deployment of the NJ All Hazards Incident Management Team pursuant to a separate FEMA process. While many of the reimbursements for the FY23 EMAC missions have not yet been received, it is anticipated that they will be received in the coming year.

Note: deployments of New Jersey Task Force 1 (the State's Search and Rescue Team) undertaken at the request of FEMA are reimbursed separately through the mechanism for FEMA SAR teams. That information is reported in the subsequent set of answers further below. Deployments of New Jersey Task Force 1 through the EMAC process at the request of another state are included in this answer.

1. **EMAC Deployments**
   a. **FY 2022 – no EMAC deployments**
   b. **FY 2023 - 8 EMAC responses that included NJSP personnel deploying**
      - New Mexico 2022 Wildfires (EMAC Mission 2357-RSA-11371-0-1)

Discussion Points (Cont'd)

Purpose of Deployment- Request for Emergency Manager with knowledge in public assistance and flooding prevention measures.

- NJSP Public Assistance Personnel- 1 Civilian
- Deployment Dates- 7/11/2022 to 8/12/2022
- EMAC Mission Estimate Cost- $40,477.10
- EMAC Reimbursement- As of March 24, no reimbursement has been received from New Mexico.

- New Mexico 2022 Wildfires (EMAC Mission 2357-RSA-11391-0-1)

  Purpose of Deployment- Request for Emergency Manager with knowledge in public assistance and flooding prevention measures.

  - NJSP Public Assistance Personnel- 1 Civilian
  - Deployment Dates- 8/17/2022 to 9/14/2022
  - EMAC Mission Estimate Cost- $44,330.74
  - EMAC Reimbursement- No reimbursement has been received from New Mexico.
- Florida 2022 Hurricane Ian (EMAC Mission 2458-RSA-11762-2-1)

  Purpose of Deployment- Request for the NJ-AHIMT to assist with the build-out of a Type 1 All-Hazards Incident Management Team to support local resources and fire department field operations.

  - NJSP AHIMT Personnel- 1 Enlisted, 3 Civilians
  - Deployment Dates- 10/19/2022 to 11/1/2022
  - EMAC Mission Estimate Cost- $43,226.70
  - EMAC Reimbursement- No reimbursement has been received from FL. Currently updating reimbursement package.

- Florida 2022 Hurricane Ian (EMAC Mission 2458-RSA-11730-1-1)

  Purpose of Deployment- Request for Public Information Officer to assist the Fort Myers Beach EOC. Interface with the public, engage in active communication and information sharing with elected and appointed officials.

  - NJSP Public Information Officer- 1 Enlisted
  - Deployment Dates- 10/29/2022 to 11/21/2022
  - EMAC Mission Estimate Cost- $39,307.06
  - EMAC Reimbursement- No reimbursement has been received from FL.

- Hurricane Fiona- Puerto Rico 9/17/2022 (EMAC Mission 2454-RSA-11541-0-1)

Discussion Points (Cont'd)

Purpose of Deployment- Police Officers were requested to support the Puerto Rico Police Bureau performing traffic control of areas impacted by Hurricane Fiona in Puerto Rico.

- NJSP Personnel Deployed- 150 Enlisted
- Deployment Dates
  - First Wave (75)- 9/24/2022 to 10/08/2022
  - Second Wave (75)- 10/08/2022 to 10/22/2022
- EMAC Mission Estimate Cost- $3,891,076.84
- EMAC Reimbursement-Currently working with new PR EMAC staffing for submission of expense invoices for complete reimbursement of 2454-RSA-11541 EMAC mission.

- NY Snowstorm in Buffalo (EMAC Mission 2556-RSA-11908-0-1)

  Purpose of Deployment- Request for high axle vehicles and search and rescue team NJ-TF1 due to excessive snowfall and trapped residents.

  - NJ-TF1 Personnel Deployed- 25 personnel including: 4 NJSP Enlisted and 1 NJSP Civilian
  - Deployment Dates- 12/26/2022 to 12/31/2022
  - EMAC Mission Estimate Cost- $550,455.30
  - EMAC Reimbursement- Currently reimbursement package is being developed.

- California Winter Storms (EMAC Mission 2564-RSA-11976-0-1)

  Purpose of Deployment-Request Mitigation personnel to support Disaster Recovery center or Local Assistance center in impacted areas in California.

  - NJSP Mitigation Personnel Deployed- 1 Enlisted
  - Deployment Date-1/17/2023 to 02/17/2023
  - EMAC Mission Estimate Cost - $44,678.46
  - EMAC Reimbursement- Currently reimbursement package is being developed.

- California Winter Storms (EMAC Mission 2564-RSA-11984-0-1)

  Purpose of Deployment- Request for Public Assistance Personnel to assist with long term recovery activities in California.

  - NJSP Public Assistance Personnel Deployed- 1 Civilian
  - Deployment Date-1/19/2023 to 02/19/2023
  - EMAC Mission Estimate Cost - $38,440.86
  - EMAC Reimbursement- Currently reimbursement package is being developed

Discussion Points (Cont'd)

c. FY 2023 - 1 EMAC response processed by NJSP but no NJSP personnel deployed

- NY Snowstorm in Buffalo (EMAC Mission 2556-RSA-11910-0-1)

  Purpose of Deployment- Snow removal was needed due to Lake Effect Snow in Buffalo NY. Vehicles were stranded and abandoned on major roadways. Local and state resources were all exhausted prior to EMAC request. Request for 10 loaders and 10 dump trucks for snow removal in the City of Buffalo and local Highways in the Buffalo area.

  - NJDOT Personnel Deployed- 40 Civilians
  - Deployment Date-12/28/2022 to 01/01/2023
  - EMAC Mission Estimate Cost - $996,828.66
  - EMAC Reimbursement- Awaiting complete and final cost for EMAC mission to be submitted by DOT Response Coordinator for reimbursement package.

2. Special FEMA Deployment of the New Jersey All Hazards Incident Management Team (NJ-AHIMT) to Puerto Rico

The New Jersey All Hazards Incident Management Team (NJ-AHIMT) was deployed to Puerto Rico in response to Hurricane Fiona, DR-4671-PR. The NJ-AHIMT's membership is from multiple State and local agencies and other partners. The Team is overseen by the NJSP All Hazards Incident Management Team Unit.

The Team was deployed as the inaugural FEMA Supplemental Response Team (SRT) and assigned to assist FEMA with Response and Recovery in the northwestern part of the Island, including 22 municipalities. One of the primary roles was the management of the federal programs, to include Individual and Public Assistance and setting up Disaster Recovery Centers (DRC) and Business Recovery Centers (BRC). DRCs and BRCs provide survivors and businesses with information and resources while they recover from a disaster and aid them in applying for federal assistance and disaster loans. The Team's presence in PR allowed operations to continue when FEMA had to send additional personnel and resources to Florida in response to Hurricane Ian. The NJ-AHIMT's efforts were highlighted and commented on during President Biden's press conference following a tour of the impacted areas in Puerto Rico.

- 6 members of the Division of State Police were deployed - 2 enlisted troopers and 4 civilian employees as part of a total team of 13 deployed
- Deployment dates - 9/20/22-10/9/22 (Travel dates were 9/22/22 and 10/9/22, respectively)
- Total Cost of the mission - $300,188.28; costs attributable to the 6 NJSP employees = $143,597.25
- All costs are being reimbursed by FEMA. The reimbursement package was submitted for reimbursement. Per discussions with FEMA, it is expected to tentatively process in May 2023.

Discussion Points (Cont'd)

- ***Question:*** **How many rescue missions by the NJ Urban Search and Rescue Team occurred in FY 2021, FY 2022 and current to date in FY 2023? For each mission, please provide a date, short description, and itemize of the total cost. How are the costs of a rescue mission determined? How does the State estimate the average rescue mission per year?**

The following information pertains to the deployment of NJ Task Force 1 (NJ-TF1), the State's Search and Rescue Team that is also qualified as one of the 28 FEMA US&R teams that can be deployed as a federal resource. NJ-TF1 members are from various agencies across the State, including civilian and enlisted members of NJSP. The Team operates under the authority of the NJSP Search and Rescue Unit. As a FEMA team, NJ-TF1 is partially funded by FEMA, and deploys out of state at the direction of FEMA according to a pre-arranged priority deployment schedule based upon all the FEMA teams nationwide. When NJ-TF1 deploys out of state at the direction of FEMA, the costs are reimbursed by FEMA pursuant to federal guidance and the NJ-TF1 members salary scale.

1. **Rescue Missions for each of FY 2021, FY 2022 and FY 2023 (YTD)**

   a. **FY 2021**

   - Hurricane Laura, Atlanta, Georgia. 8/27/2020 to 8/29/2020

     Deployed as a Type I USAR Team (80 Members) to Atlanta, GA. The team staged and did not conduct operation.

     - Total Cost: $712,395.00 (reimbursed)

   b. **FY 2022 - 4 Responses**

   - Champlain Towers Building Collapse, Surfside FLFEMA response. July 1, 2021, to July 17, 2021.

     13 Story 136 Unit Building collapse with 98 decedents. NJ-TF1 was activated as an 80-member Type I Urban Search and Rescue Team. NJ-TF1 recovered 14 decedents.
     - Total Cost: $4,036,905.00 (reimbursed)

   - Tropical Cyclone Ida, 8/27/2021 to 8/31/2021. FEMA Response.

     40-member Type 3 Urban Search and Rescue Team deployed to Alabama and staged. No operations conducted.

     - Total Cost: $531,908.00 (reimbursed)

   - Tropical Cyclone Ida, 9/01/2021 to 09/02/21. In-State Response.

     153 Members Activated. The following statistics reflect NJ-TF1's in-state deployment in response to Hurricane Ida:

Discussion Points (Cont'd)

- 3 persons rescued via boat in Hunterdon County
- 9 persons rescued via boat and helicopter in Somerset County
- 74 persons evacuated in Somerset and Union Counties
- 33 persons assisted in Somerset and Union Counties
- 4 human remains discovered in Elizabeth
- 1 human remains discovered by K9 in Elizabeth.
- 106 persons sheltering in place in Somerset and Union Counties
- 10 targeted search missions in Hillsborough resulting in 4 rescued by lifts by helicopter.
- Total Cost: Zero cost, all members volunteer

- Tropical Storm Henri, 8/21/2021 - 08/24/2021, FEMA Response

  16 member Mission Ready Package (Water). The team was deployed and staged in Windsor, CT. No operations conducted.

  - Total Cost: $313,799.00 (reimbursed)

c. FY 2023 - 1 Response

- Buffalo, NY Lake Effect Storm, 12/26/2022 to 1/9/23.

  1 rescue. This was an EMAC deployment, not a FEMA deployment. See information reported in earlier answers.

Title 44 Code of Federal Regulation Part 208 determines the types of allowable costs and parameters for reimbursement directly by FEMA. The amount of the reimbursement is based upon the salary scale of the members being deployed for a given response. Equipment costs, repairs and consumables are reimbursed at a FEMA rate. To ensure that deployment is cost-neutral to the participating agency, backfill overtime attributed to deployed personnel is an allowable cost. Based upon current salaries for the NJ-TF1 members, costs per day for the various types of teams deployed are generally as follows:

- Type I USAR (80 Personnel) = $237,465.00
- Type 3 (40 Personnel) = 132,977.00
- Type 4 (25 Personnel) = $82,295
- Mission Ready Package (16 Personnel) = $78,449.00

On average the NJ-TF1 has been deploying twice per year since being designated as a FEMA team, with increased frequency of deployments due to the increased number of severe weather incidents in the Nation.

Discussion Points (Cont'd)

Division of State Police: New Vehicle Purchases

8. Language in the FY 2023 Governor's budget provide funds from the "New Jersey Emergency Medical Service Helicopter Response Act" not to exceed $3 million for the Division of State Police to purchase new vehicles.

- ***Question:*** **Please specify the total amount expended for new State Police vehicle purchases annually since FY 2019 and the number of vehicles.**

    - FY19 $11M line of credit, 271 vehicles
    - FY20 $11M line of credit, 230 vehicles
    - FY21 $17M Cares Act Funding, 389 vehicles
    - FY22 $521,783 American Rescue Plan Act – 8 vehicles
    - FY23 $6.25M State funds, 143 Vehicles

- ***Question:*** **Please explain the Division of State Police policy for assignment of vehicles to enlisted members and civilian staff. Please explain the guidelines for use of a Division of State Police vehicle, including marked and unmarked vehicles, for commuting purposes. Is the commuting policy effective and if so, how?**

By internal SOP, vehicles are officially assigned to sections and troops and not individuals. Within these section assignments are the operators of the vehicles. The emergency nature of State Police operations requires personnel to be available for duty at all times. Transportation is provided to meet this requirement. Civilian use vehicles are provided based on the individual's functional duties.

As indicated above, vehicles are utilized by enlisted members predicated by the fact that they are never off duty. For that reason, the typical definition of "commute" does not apply, and is not relevant to members operating State Police vehicles. Members operate police certified vehicles with emergency lighting and communication. They provide backup protection for station troopers on patrol, provide safety to disabled vehicles if first on site and on many occasions, initiate engagement, respond to critical incidents, civil emergencies, and emergency responses.

- ***Question:*** **How does the Division of State Police determine when to retire a vehicle and what happens to a retired vehicle? How many vehicles were retired each year from FY 2018 to FY 2024? What is the process to retire a vehicle from the fleet?**

Vehicles are retired when there is funding available for replacements on a worst-first basis. Others are removed from service when there is a safety issue that cannot be remedied such as rust. In those situations, the age of a vehicle is not the sole determination, as parts could be obsolete or the vehicle has high mileage making expensive repairs fiscally or operationally imprudent.

The process to retire a vehicle involves removing all police markings and equipment. The vehicles are then sent to the Department of Treasury, Purchase and Property Distribution Center in compliance with Treasury Circular Letter No. 22-08-DPP, Excess and Surplus Property – Procedures for Disposal. NJSP works with Treasury on a disposition, which may include an auction process.

Discussion Points (Cont'd)

- FY18 213
- FY19 201
- FY20 226
- FY21 241
- FY22 305
- FY23 141 as of 3/23/23

- ***Question:*** **On average, how often do vehicles need to be purchased to replace vehicles retired given the projected retirement schedule? How many miles is a typical patrol car driven each year and at what mileage point are vehicle supposed to be or are required to be retired? How many vehicles will a $3 million appropriation fund and how does this compare to the last three purchasing cycles?**

The State Police Fleet Management Office has a replacement model that calls for replacing every marked station patrol vehicle at three years and everything else at five years. Therefore, stable funding at a level that allows for the targeted number of vehicles each year (marked station patrol/all others) to meet the replacement model. Presently, an upfitted Ford Police Interceptor Utility costs $56,400, replacing 200 vehicles each fiscal year as planned requires $11.3M just for that segment of the fleet.

Marked Patrol vehicles may accrue as much as 90,000 miles in a year. Per Treasury circular 17-06-ADM "Any trade in must have at least 125,000 miles". The decision to replace vehicles is determined solely by funding and replacements are made on a worst-first basis.

- ***Question:*** **What are the current terms on the line of credit used to purchase the vehicles? Please compare the cost of a single vehicle purchased in FY 2018 to FY 2024. Are there any supply chain issues regarding the purchase of vehicles? Has this affected the vehicle price and the type of vehicle being purchased? Does the State have a contract with a car manufacturer to purchase police vehicles?**

Joint Circular 17-12-PF/OMB Master Lease/Line of Credit contains the current terms. In FY2018 for example, a Ford Police Interceptor Utility (marked) base vehicle cost $28,937. FY 2024 pricing is not available. However, for FY 2023 a Ford Police Interceptor Utility base cost is now $34,844.

Vehicle delivery has been impacted by private sector supply chain issues, which have affected multiple sectors not exclusive to NJSP.

Yes, the state has several contracts with manufacturers for police vehicles under T -Code T2776.

- ***Question:*** **What are the components of change between the FY 2023 appropriated amount and FY 2024 recommended appropriation? How many vehicles, marked and unmarked, make up the Division of State Police fleet? How many Division of State Police vehicles were purchased in FY 2023 and will be purchased in FY 2024? What are each of the funding sources utilized for the purchase of Division of State Police vehicles?**

Discussion Points (Cont'd)

The FY 2023 appropriation of $6.25M allowed for the purchase of 143 vehicles, of which 55 are station marked vehicles. The FY24 appropriation of $3.7 million will allow for the purchase of approximately 75 vehicles. There are 620 marked pursuit and 902 unmarked pursuit vehicles. The balance of 1,016, are other vehicles utilized by various operational entities throughout the Division. The funding sources are Line of Credit, Budget Appropriations and Federal Grant monies.

Division of State Police Training Center: Capital Construction

9. According to the FY 2024 Budget in Brief, the Governor recommends allocating $120 million out of the Debt Defeasance and Prevention Fund for the first phase of a new Division of State Police Training Center. Currently, the State Police conducts its training at the New Jersey State Police Academy in Sea Girt, New Jersey. The Regional Training Institute at the National Guard Training Center is also in Sea Girt on the same campus. In 2017, construction of the then new Regional Training Institute facility was completed with federal government paying for the $34 million cost. The 86,000 square foot center includes state-of-the-art classrooms, an auditorium, offices, student housing, and an administration building which would be available to the Division of State Police, Department of Corrections, and Juvenile Justice Commission to use at a reimbursable rate.

- ***Question:*** **For what reasons does the department intend to construct a new State Police Training facility in lieu of conducting training activities at the National Guard facility in Sea Girt? Where is the new training center intended to be built? Please provide the total estimated cost of this project. What is the estimated completion date? How many phases of the project are anticipated?**

Although certain buildings used primarily by the National Guard are newly constructed, the facilities used by NJSP for its academy are in dire need of upgrade in order to equip a modern, premier law enforcement agency like the NJSP.

Challenges with the current facilities include:

- Residential facilities are old and antiquated and dire need of repair
- Residential Facilities are not large enough for an average class size
- Residential Facilities are not multi-purpose
- Classroom space is limited
- Driving pad is ineffective for defensive driver training
- Firing range needs modernization
- Limited space for advanced training
- Space limitations hinder the ability to provide training to partner agencies
- Academy currently does not have an aquatic facility for onsite mandated training, and NJSP must use off-site pools.
- Currently, the state does not have a facility to train all 21 counties in Emergency Management, which is a critical need to have unified training at a dedicated location. Currently, the Office of Emergency Management has limited warehouse space (1,500 square feet) which led to the need to lease/rent two warehouses to house emergency management supplies and equipment: PPE, ventilators, etc. The estimated cost of the lease for the two warehouses are 3.6 million dollars per year. The state does not have

Discussion Points (Cont'd)

dedicated, refrigerated, or frozen storage to which became essential during the COVID-19 pandemic. Morgue space was unavailable forcing the use of refrigerated trailers.

The new training center is intended to be built at the New Jersey State Police Division Headquarters in West Trenton, NJ. Current working estimates, including other costs, is a total of $240 million. The completion date is dependent on when the critical components of the project begin, with a total estimate of approximately 3-4 years.

The overall project can be completed in two phases:

- Phase One – Build multi-purpose housing facility, cafeteria, indoor training facility and aquatic center, automotive garage, and radio repair facility
- Phase Two - Build multi-purpose firearms range, outdoor physical training facility, defensive driving training pad, state emergency response training center, and multi-purpose emergency and storage facility

Division of State Police – 15 Network Power Back-up

10. The FY 2023 budget allocated $3.5 million toward the Division of State Police Building 15 Network Power Backup, which houses all of the platforms for the Division of State Police information technology systems, including the radio network and dispatching capabilities. The building suffered a large utility power surge and required immediate upgrades to prevent decreased speeds and interference with critical systems. As of March 15, 2023, the entire $3.5 million has been pre-encumbered.

- ***Question:*** **Is this a resiliency project and how will this project secure State Police operations in the event of a surge and black-out? Is the equipment sophisticated enough to recognize down-level demand and adjust output accordingly within the reasonable bounds of capacity to avoid system crashes? Are there other resiliency projects that will be necessary to construct to secure State Police operations? Please provide an overview of this project, including a timeline for completion, contract changes, and anticipated annual funding necessary to complete the project.**

Yes, this is a resiliency project. This project will secure State Police operations in the event of a surge or black-out by ensuring a seamless transition from street power to generator power with zero interruptions.

Is the equipment sophisticated enough to recognize down-level demand and adjust output accordingly within the reasonable bounds of capacity to avoid system crashes?

Yes, the replacement of the electrical system requirements were developed by a certified electrical engineer who is cognizant of the demands being placed upon the equipment. As the project progresses, the electrical engineer is continually assessing the design to meet the expected performance demands which will protect the NJSP network, communications, and radio systems.

Discussion Points (Cont'd)

Are there other resiliency projects that will be necessary to construct to secure State Police operations?

Yes, the building 15 Network Power Back-up needs a full replacement of the associated uninterrupted power supply system (UPS). The UPS is a battery backup for all network communications and acts as the power supply bridge when there is a loss of street power service. In the event of a power outage, the UPS keeps all systems operational while the power supply transfers from street power to generator power. This also protects millions of dollars in equipment from power surges and the loss of data. The estimated cost of the UPS replacement is approximately $250,000.00. This cost may be covered with the original funding requested but we may be required to seek additional funding due to the unknown inflation cost since the cost analysis was completed.

Please provide an overview of this project, including a timeline for completion, contract changes, and anticipated annual funding necessary to complete the project.

In March 2022, a construction cost estimate was completed and estimated the project cost at 3.5 million dollars. The estimated annual inflation rate is approximately 6.0% for the twelve months ending in February 2023. This will potentially increase the 3.5 million dollars estimate to approximately 3.7 million dollars. With the UPS replacement the total project could cost approximately 4 million dollars. With the fluctuations of labor, material, and equipment costs the price could increase or decrease depending on market conditions. The 3.5 million dollars has been transferred to DPMC for which the project is currently in the DPMC bidding process to obtain an electrical engineer/project management design firm. Once a bid is awarded by DPMC to the electrical engineer/project management design firm, specific figures will become available. From the time the project is awarded to an electrical engineer/project management design firm, the estimated timeline for completion is eighteen months.

Law Enforcement: Statewide Licensure of Law Enforcement

11. P.L.2022, c.65, which was signed into law on July 22, 2022, concerns the licensing of law enforcement officers and appropriated $6 million. Under the law, an individual is not to be employed as a law enforcement officer in this State unless the person holds a valid, active license issued in accordance with certain provisions. The law will take effect on January 1, 2024.

At the time, the department estimated that the implementation of the licensing program would cost $6 million annually for salary and non-salary expenditures for the Police Training Commission to establish a State-wide licensure process for law enforcement officers. The Police Training Commission is responsible for improving the value of police officers' contribution to communities by supervising the administration of all basic police training programs and conducting management surveys of local police agencies.

The department also estimated that the Police Training Commission's expenditures could reach $6 million to $7 million annually, but indicated that fees for training or other services may be considered, which when added to an annual State appropriation could offset some of the Police Training Commission's expenditures. However currently, law enforcement officers are excluded from paying any licensing fees.

Discussion Points (Cont'd)

The FY 2023 budget authority for the commission totaled $6 million of which $1 million was expended. The FY 2024 Governor's budget recommends reducing the appropriation by $3.8 million.

- ***Question:*** **What steps has the department taken to begin implementing this law? For what purposes was the FY 2023 expended amount of $1 million used? Given that the law takes effect on January 1, 2024, does the FY 2024 recommended appropriation represent six-month funding?**

Prior to the enactment of P.L. 2022, c.65, the Police Training Commission had started to take steps in anticipation of the law. Staffing requirements were developed along with the logistical needs of an increased staff. The PTC developed job descriptions and an organizational chart based on expected needs. Positions were posted, interviews were undertaken and several positions were filled. It was estimated that $6 million dollars would be needed to meet the needs of the expanded PTC responsibilities. This includes $400,00 for software purchases and maintenance, purchase of vehicles, filling the FTEs, purchase of additional IT needs, and the logistical support such as supplies and vehicle maintenance.

The PTC has been active in hiring personnel: Since December 2019, PTC staff has increased from six to 20. After the enactment of the licensing law, the PTC has onboarded three new staff members, 17 are pending start dates, and the agency is working to fill two vacancies. In addition, the agency has received four vehicles with 13 more to be fulfilled. Finally, software systems needed for licensing are in the process of being acquired. Most of the expenditures will be ongoing, including software maintenance.

The Governor's recommended budget reduces the appropriation for the Police Training Commission as the original budget of $6 million included the cost of fringe expenses. Appropriations that are funded with Direct State Service dollars, which is how the Police Training Commission is funded, does not absorb fringe expenses.

The PTC is on track to roll out licensing on January 1, 2024. The regulations have been drafted and will be published for public comment this April. Staff is being hired to train law enforcement agencies in the use of the ACADIS system that will be used to facilitate license applications. As January approaches, the rest of the needs will have to be addressed in a timely manner so that the staff will be prepared for licensing.

- ***Question:*** **Has the department encountered any obstacles in the implementation of this law so far, such as a long term funding source? What funding sources are available to fund this program? Have all professional licensure processing improvements been completed?**

The PTC has begun outreach efforts to explain licensing to stakeholders. More in-depth training will be provided in the coming months. There have not been significant obstacles, however a long term dedicated funding source would be valuable. The law does not allow for renewal fees of licensing fees for current or future law enforcement officers. While initial fees can be charged to new officers and for certain other programs, such as waiver applications, the amount that can be recovered would not be sufficient to meet funding needs.

Discussion Points (Cont'd)

We have been developing licensing processes. The ACADIS system is being piloted in seven municipalities. The pilot seems to be running well. The pilot will be extended to eight additional agencies within the next month.

Division of Gaming Enforcement: Casino Oversight

12. The Office of Legislative Services State Auditor's report of the Division of Gaming Enforcement, in the Department of Law and Public Safety, published in June of 2022 highlighted weaknesses in the Division of Gaming's oversight of the operations of casino owners, operators, employees, and vendors and its enforcement of the laws and regulations promulgated under the Casino Control Act.

Specifically, the State Auditor found that the Division of Gaming's procedures for monitoring and processing licensee applications, waivers, dormant accounts, and gambling addiction reports were deficient leading to the potential for licensees to operate indefinitely on transactional waivers, the closure and withdrawal of funds from dormant accounts prior to contacting the owners, and the insufficient disbursement of gambling treatment funds.

The FY 2024 Governor's Budget recommends an increase of $5.3 million in the appropriation for salary and non-salary expenses.

- ***Question:*** **What are the effects of these weaknesses on customers? Are the deficiencies in operational oversight leading to the inappropriate use of funds by licensees who are operating indefinitely on transactional waivers? How will the Division of Gaming overcome its shortcomings in its oversight of the casino industry?**

The findings of the June 2022 OLS audit do not have a negative impact on patrons. DGE has made considerable efforts to ensure that its regulatory responsibilities are performed within the policies and procedures afforded by the Casino Control Act to enable casino operators and racetracks, along with their Internet gaming (I-gaming) and sports wagering (SW) partners, to have the ability to enter those markets in an efficient manner and to succeed, while assuring that the high standards of plenary licensure are maintained and that gaming is conducted with integrity and fairness. Copies of DGE's responses to the Auditor's report are attached for reference.

All I-gaming and SW casino service industry enterprises, by statute, are required to pay the full cost of their investigations. No initial fees are paid that are not attributed to the appropriate application. Further, all investigative costs during the course of the process, including those related to the submission of a completed application filing, the review of a transactional waiver (TW) petition and the issuance of a TW, the analysis of all technical service laboratory submissions, and efforts expended with regard to any disciplinary investigations and actions, are all billed on a monthly basis and directly to the appropriate I-gaming or SW provider for the work conducted by DGE staff. Moreover, the TW process exists to vet I-gaming and SW providers in key integrity respects before any such provider is permitted to participate in, and benefit from, the Atlantic City casino industry, while allowing business to proceed, thus serving a critical purpose.

Discussion Points (Cont'd)

- ***Question:*** **Is the $5.3 million increase in the division's budget for salary and non-salary expense intended to fund system improvements, additional staff, and equipment to support the Division of Gaming's efforts to comply with statutes and regulations in its oversight duties?**

The $5.3 million increase is related to additional FY 2024 FTE staffing salary costs, increased fringe benefit costs and IT system upgrades. DGE's FTE level is set to remain flat from FY2023 to FY2024.

- ***Question:*** **What precluded the Division of Gaming from disbursing the gambling treatment funds as required by the law and its regulations? Are there any impediments that preclude the Division of Gaming from carrying out its statutory and regulatory duties? If so, please explain.**

DGE is aware of the differences in the gambling addiction treatment funding which it collected but have not been disbursed. DGE's statutory authority in this area is limited to collecting the funds; DGE does not have the authority to determine how they are disbursed. DGE fully performs its responsibilities in connection with gambling addiction treatment funds. Those monies are disbursed in a timely manner and in their total amount to Treasury which then, in accordance with the statute, provides the funds to the Department of Human Services, Division of Mental Health and Addiction Services which is the State agency that is empowered statutorily to handle and distribute those funds.

Regulation of Alcoholic Beverage: Liquor Licenses

13. New Jersey restricts the number of alcoholic beverage retail licenses that are available for distribution based on the population of the municipality where the license will be issued. Plenary retail consumption licenses, which are held by owners of bars and restaurants, are owned by the licensees, who may pay hundreds of thousands of dollars or even more than $1 million for the license. Legislation has been introduced over the years to expand the number of retail licenses available in the State, but traditionally has been opposed by existing licensees who fear their investment will lose value.

- ***Question:*** **How does the department intend to resolve the growing demand for additional liquor licenses?**

The Division of Alcoholic Beverage Control has been working with the Governor's Office on the reform proposal, and looks forward to implementing it. If population caps phased out, municipalities will be able to issue a greater number of liquor licenses. It will be up to the municipalities to decide whether to issue more licenses. Additionally, ABC continues to work with municipalities on a case by case basis to secure state issued licenses on municipally-owned or municipally-controlled property, where appropriate and allowable.

Please provide the total value of liquor licenses Statewide versus the actual purchase price of a liquor license by municipality.

ABC does not maintain data on the price or value of municipally issued liquor licenses.

Discussion Points (Cont'd)

How will the expansion of liquor licenses affect consumers?

ABC has worked with the Governor's Office to provide information regarding anticipated consumer impacts, and looks forward to working with the Administration on implementation of the reforms. At this time, ABC anticipates that the expansion of liquor license may promote economic development in the State by increasing the accessibility of consumption licenses to businesses, thereby allowing these businesses the opportunity to grow and lowering the barrier of entry for new businesses to start. These economic benefits have positive impacts for consumers; these economic benefits could result in increases to the State's GDP, state and local revenues, and new job creation. Additionally, the increase in the number of licenses could create increased competition among licensees in the marketplace, promoting a healthier and fairer industry.

Regulation of Alcoholic Beverage: Limited Breweries

14. In July of 2022, the Division of Alcoholic Beverage Control implemented a revised special ruling with 18 conditions that limit the activities of limited breweries, including a restriction in the number of special events limited breweries may hold on their premises each year. Some argue that these restrictions may result in few patrons visiting the limited breweries, thereby lowering tax revenue to State.

- ***Question:*** **Please describe the Division of Alcoholic Beverage Control's decision-making process when establishing the provisions of the special ruling. The special ruling indicated that there were discussions with various stakeholders from the alcoholic beverage industry, which stakeholders were involved in the decision-making process and how did the Division of Alcoholic Beverage Control attempt to weigh the competing interests of alcoholic beverage license holders?**

The Legislature amended the limited brewery in 2012 to allow limited breweries a small degree of on-premises consumption, which is a privilege normally reserved only for retail license holders. The Legislature amended the law to permit limited breweries to "sell [their products] at retail to consumers on the licenses premises of the brewery for consumption on the premises, but only in connection with a tour of the brewery, or for consumption off the premises in a quantity of not more than 15.5 fluid gallons per person." The statute also prohibits a licensee from selling "food or operat[ing] a restaurant" on the licensed premises. See NJSA 33:1-10(1b).

Starting soon after the limited brewery statute was enacted in 2012 and continuing through 2018 and early 2019, ABC engaged in numerous meetings with representatives of the craft brewing industry, Legislators, and representatives of the alcoholic beverage industry at large. In 2015, ABC was presented by the Brewers Guild of New Jersey (Guild) with a list of their best practices for tasting rooms at limited breweries that they believed would comply with the Act. The Guild, the New Jersey Brewers Association, and other industry stakeholders were given an opportunity to review and comment on the proposed Special Ruling before it was issued in 2018. After the 2018 Special ruling was rescinded and before issuing the 2019 Special Ruling, ABC redoubled its outreach to stakeholders. ABC held additional meetings and communications with limited breweries, including the Guild and the New Jersey Brewer's Association, and received input from the Licensed

Discussion Points (Cont'd)

Beverage Association, other industry stakeholders, and elected and government officials. The Special Ruling considered the consensus of opinions expressed by competing stakeholders.

- **What measures does the Division of Alcoholic Beverage Control plan to take when enforcing the provisions of the special ruling?**

The Special Ruling was intended to be guidance to the industry and a prelude to formal rulemaking. No enforcement actions based solely upon the provisions of the Special Ruling have been taken. Like all license holders, the craft brewers may be subject to enforcement actions for failure to comply with statutes and ABC regulations for violations including serving minors and intoxicated patrons.

- **What penalties do you foresee the Division of Alcoholic Beverage Control imposing on limited breweries that fail to comply with the special ruling?**

The are no unique penalties associated with violations of the special ruling. Penalties for violating the statute or ABC regulations depend on the nature of the violation. Licenses may be suspended for a period of days or revoked. Licensees may be offered an opportunity to compromise the suspension in exchange for a monetary penalty.

Regulation of Alcoholic Beverage: Revision of Plenary Retail Consumption Licenses

15a. Senate Bill No. 3675 and Assembly Bill No. 5270 of 2022-2023 propose revisions to the alcoholic beverage laws requiring that existing plenary retail consumption licenses will receive a tax credit in the first year based on tiers related to their taxable sales in one of the three calendar years of past retail sales.

- ***Question:*** **If enacted, by what amount (estimated) will this affect Alcoholic Beverage Excise Tax revenue? Please provide the number of plenary retail consumption licenses in New Jersey in 2022, by municipality. Please provide the number of inactive plenary retail consumption licenses in New Jersey in 2022, by municipality. How many existing plenary retail consumption license holders are eligible for the tax credit? Of the existing plenary retail consumption license holders, please provide the number of license holders anticipated in each tier? What is the maximum amount estimated for the State to issue in tax credits to the license holders once enacted?**

- ***Question:*** **If enacted, by what amount (estimated) will this affect Alcoholic Beverage Excise Tax revenue**?

ABC does not collect the information or have the expertise that would enable it to estimate how the bills will affect the Excise Tax revenue.

Please provide the number of plenary retail consumption licenses in New Jersey in 2022, by municipality.

Please see attached report which displays the breakdown of active plenary retail consumption licenses by municipality in New Jersey in FY 2022. It should be noted that the attached report only

Discussion Points (Cont'd)

includes active plenary retail consumption licenses as requested but does not include active distribution licenses.

Please provide the number of inactive plenary retail consumption licenses in New Jersey in 2022, by municipality.

Please see attached report which displays the breakdown of inactive plenary retail consumption licenses by municipality in New Jersey as of March 2023. It should be noted that the attached report only includes inactive plenary retail consumption licenses as requested but does not include inactive distribution licenses.

How many existing plenary retail consumption license holders are eligible for the tax credit?
ABC lacks information to answer this question and defers to Treasury.

Of the existing plenary retail consumption license holders, please provide the number of license holders anticipated in each tier?

ABC lacks information to answer this question, and defers to Treasury.

What is the maximum amount estimated for the State to issue in tax credits to the license holders once enacted?
ABC lacks information to answer this question, and defers to Treasury.

15b. For plenary retail consumption license holders, the State is proposing to establish a tiered initial State fee to-be-determined and an annual renewal fee of $200 payable to the New Jersey Director of Alcohol Beverage Control. The seasonal retail consumption license holders are also anticipated to pay an initial and annual fee.

- ***Question:*** **What is the anticipated initial fee and what are the revenues anticipated to be raised by the imposition of this fee? Please provide the number of license holders that are anticipated in each of the three tiers, by tier.**

Fees are subject to formal rulemaking. ABC would engage in fact finding and provide an economic justification before proposing a regulatory fee schedule. The ABC does not have the information needed to answer this inquiry regarding anticipated license holders.

15c. The Limited Brewery license holders, Plenary winery license holders, Farm winery license holders, Out-of-State winery license holders, Cidery and Meadery license holders, and Craft distillery license holders (craft beverage manufactures) have set fees in statute.

- ***Question:*** **Under the proposed legislation, the New Jersey Director of Alcohol Beverage Control will set the initial and annual license fees, is there an anticipation that these initial and annual fees will change? If so, please elaborate on the anticipated changes.**

Discussion Points (Cont'd)

Yes. The Division will seek to promulgate a fee schedule that can be financially justified, that is commensurate with fees charged to other licensees, and that is reasonable and fair based on an economic analysis of the industry.

- ***Question:*** **With the anticipated removal of restrictions on craft beverage manufactures and the introduction of the new retail plenary consumption licenses over the course of five years and following the elimination of the population cap, what is the projected State tax revenue from additional alcoholic beverage sales?**

ABC lacks information to provide an answer, and defers to Treasury.

15d. The proposed legislation removes the authority of the New Jersey Director of Alcohol Beverage Control to renew inactive plenary retail consumption licenses and grants the authority to renew or deny these inactive licenses to municipal governing bodies.

- ***Question:*** **Is there anticipation that moving the authority to renew or deny licenses to municipal governing bodies will result in a cost savings to the Division of Alcohol Beverage Control? If so, what are the anticipated cost savings? What is the current total number of inactive plenary retail consumption licenses in the State?**

ABC does not anticipate a significant cost savings. The most recent data reflects 1,195 inactive plenary retail consumption licenses. The attached report shows the breakdown by municipality.

Regulation of Racing Activities: Horse Racing Purse Subsidies

16. P.L.2018. c.36 required an appropriation out of the General Fund of $20 million annually commencing in FY 2019 and in each of the four fiscal years thereafter to the New Jersey Horse Racing Commission to subsidize horse racing in New Jersey as part of an effort by the State to retain jobs and make the industry more competitive with tracks in neighboring states. From FY 2019 through FY 2023 a total of $100 million was appropriated. The FY 24 Governor's Budget recommends continuing this appropriation at $20 million for horse racing purse subsidies.

FISCAL YEAR	ANNUAL APPROPRIATION
FY 2019	$20 million Supplemental Appropriation
FY 2020	$20 million
FY 2021	$20 million
FY 2022	$15 million
FY 2023	$25 million
FY 2024	$20 million

The New Jersey Racing Commission is required to file an annual report that documents the purposes for which those funds were used and the amounts allocated for those purposes.

Discussion Points (Cont'd)

- ***Question:*** **Has the purse subsidy been an effective means to supporting the industry by retaining jobs and making the industry more competitive with tracks in neighboring states?**

The purse subsidies have been effective in supporting New Jersey's racing and breeding industries. Data reported in the New Jersey Horse Racing Impact Report 2016-2021 ("2021 Report") indicate an increase in jobs within the thoroughbred industry for 2019 and 2020 and for training centers within the standardbred industry in 2019, 2020 and 2021.[1]

The number of thoroughbred vendors[2] and employees on farms affiliated with the Thoroughbred Breeders Association of New Jersey ("TBANJ") increased by 5.8% in 2019 and 7.3% in 2020. Report 2021 at 28.
See Chart 1 (below). The number of reported vendors and employees remained the same in 2021.

Chart 1 - Vendors, Trainers and Employees on Farms and Training Centers

The number of standardbred vendors, trainers and employees at training centers affiliated with the Standardbred Breeders and Owners Association of New Jersey ("SBOANJ") increased with each year of purse subsidies. Id. at 31. The number of vendors, trainers and employees at training centers increased by 10.7% in 2019, 16.5% in 2020 and 5.5% in 2021.

However, although the number of standardbred vendors and employees at breeding farms affiliated with the SBOANJ increased in 2019, the number of vendors and employees decreased in 2020 and 2021. There was a 49.2% increase in 2019, but a 9.2% decrease in 2020 and a 28.4% decrease in 2021.

Finally, the number of standardbred vendors and employees at turnout farms affiliated with the SBOANJ also increased in 2019, but also decreased in 2020 and 2021. 2021 Report at 26. There was a 45.6% increase in 2019, but a 2.6% decrease in 2020, which includes the disruption from the COVID-19 pandemic, and a 6.3% decrease in 2021.

Overall, compiling the data in the annual report for the thoroughbred and standardbred industry indicates that there was a substantial increase of 21.2% in the number of reported vendors, employees and trainers in 2019, a further increase of 7.4% in 2020, but a decrease of 3.8% in 2021.

1 The racing industry received the first appropriation of purse subsidies in calendar year 2019 and the first annual report includes data for calendar year 2019. The two subsequent annual reports include data for calendar years 2020 and 2021, respectively. No annual report has yet been filed for calendar year 2022. In the horse racing industry, data is typically recorded for calendar years and not fiscal years.

2 All references to vendors include veterinarians, blacksmiths and shippers. Id. at 26.

Discussion Points (Cont'd)

Calendar Year	Total Number of Vendors and Employees on TBANJ-Affiliated Farms	Total Number of Vendors, Trainers and Employees on SBOANJ-Affiliated Training Centers	Total Number of Vendors and Employees on SBOANJ-Affiliated Breeding Farms	Total Number of Vendors and Employees on SBOANJ-Affiliated Turnout Farms	Total Number of All Reported Vendors, Employees and Trainers
2018	104	1,074	392	79	1,649
2019	110 ↑ 5.8%	1,189 ↑10.7%	585 ↑ 49.2%	115 ↑ 45.6%	1,999 ↑ 21.2%
2020	118 ↑ 7.3%	1,385 ↑16.5%	531 ↓ 9.2%	112 ↓ 2.6%	2,146 ↑ 7.4%
2021	118 0.0%	1,461 ↑ 5.5%	380 ↓ 28.4%	105 ↓ 6.3%	2,064 ↓ 3.8%

P.L. 2019, c. 36 does not require the New Jersey Racing Commission to file an annual report. Rather, it requires the recipients of the purse subsidies to file an annual report with the Governor and Legislature as a condition of receiving any such funds in the subsequent fiscal year. Each year, the recipients decided to file their annual reports with the New Jersey Racing Commission, which the New Jersey Racing Commission then submitted to the Governor's Office and Office of Legislative Services' Office of Public Information. The annual reports filed by the recipients of the purse subsidies do not include data regarding racing in New York, Pennsylvania and Delaware. As a result, there is insufficient data to directly compare racing in New Jersey with racing in these neighboring states.

However, the annual reports do contain data that indicate that the purse subsidies have benefitted New Jersey's racing industry, which allows the industry to better compete with racetracks in neighboring states. Combined wagering on New Jersey races reached $509.9 million in 2021, which was the highest handle since 2016. 2021 Report at 9-10. This increase in wagering handles suggests an increased popularity of New Jersey races with racing patrons.

Moreover, the annual reports document an increase in the number of standardbred and thoroughbred horses bred and raised in New Jersey. The quality and number of available horses make racing more competitive and attractive to patrons. More horses bred and stabled in New Jersey can result in more horses entered to race in this state. Larger fields, which increase the chances of long-shots, make the races more attractive to patrons who attend the races or wager on them.

Particularly notable is the reported fact that the number of standardbred yearlings nominated to the Sire Stakes has increased more than15-fold from 38 yearlings in 2016 to 605 yearlings in 2021. This increase suggests that the purse subsidies have had a substantial impact on New Jersey's standardbred breeding industry despite the decrease referenced above in the number of vendors and employees at standardbred breeding farms in 2020 and 2021.

Discussion Points (Cont'd)

Other positive effects, that likely correlate to the purse subsidies, include an increase in the number of race days, number of races run and the combined track wagering handle in 2019 and 2021. In 2019, the first year of the purse subsidies, there was an increase in the number of race days, races run, horses entered, track attendance, and total track wagering in New Jersey.

In 2020, there were understandable decreases in the number of races run, horses entered, track attendance and total track wagering due to the closure of the racetracks for more than three months during the height of the COVID-19 pandemic.

In 2021, the number of race days, total races run and total track wagering increased over those reported for 2019. Although the number of horses in races and track attendance in 2021 increased over 2020, they did not return to the levels of 2019.

Office of the Attorney General: Diversity in Policing

17. Pursuant to N.J.S.A.52:17B-4.10, which became effective in 2021, law enforcement agencies in this State were required to establish minority recruitment and selection programs. The law requires each agency to post their programs on each of their respective websites.

- ***Question:*** **Are all police departments currently in compliance with this mandate?**

Pursuant to N.J.S.A. 52:17B-4.10 (the "Act"), County Prosecutors and the Attorney General must monitor the results of the programs established by law enforcement agencies, and annually report to the Governor and Legislature a summary of the results. Although the statute does not require the Attorney General to compile the recruitment and selection plans from each agency or to check for compliance in the posting of these plans to the agency's website, the Attorney General's Office is fulfilling the statute's mandate by monitoring the results of such recruitment programs.

On December 7, 2021, this office issued Guidelines for Promoting Diversity in Law Enforcement Recruiting and Hiring, requiring each law enforcement agency to report for the preceding calendar year: (1) the age, gender, race, and ethnicity of the law enforcement officers currently appointed; (2) the age, gender, race, sexual orientation (if provided), and ethnicity of applicants for a law enforcement officer position; (3) the age, gender, race, and ethnicity of applicants appointed to the agency, with transfer applicants listed separately; (4) the reasons for denying an applicant an appointment to the law enforcement agency; and (5) the age, gender, race, and ethnicity of each law enforcement officer eligible for promotion and promoted within the agency, including the position to which the officer was promoted.

The first reporting period for this data collection covered December 7, 2021, to December 31, 2021. The Office of the Attorney General published the data collected from all required law enforcement agencies at https://www.njoag.gov/policerecruiting/ and all law enforcement agencies complied with this reporting requirement. Currently, the Office of Justice Data is finalizing the data collection process for the 2022 calendar year, which will be published afterwards.

Discussion Points (Cont'd)

Office of the Attorney General: Gun Safety Legislation

18a. In July of 2022, the Governor signed seven comprehensive gun safety bills, six of which were part of a gun safety package introduced to the Legislature in April 2021 to address nationwide gun violence. The seven gun safety reform bills included many measures with the intention of creating a safer State for New Jersey residents including:

- bringing public nuisance cause of actions,
- requiring the issuance of firearm purchaser identification cards,
- upgrading the crime for the manufacture of "ghost guns,
- revising the definition of destructive devices,
- regulating the sale of handgun ammunition, training for firearms,
- requiring training for the issuance of firearms purchaser identification cards and permits and requiring that a firearms purchaser identification card include a photograph and be electronically linked to the fingerprints of the cardholder and remain valid for ten years.
- requiring firearm retailers to sell microstamping-enabled firearms,

- ***Question:*** **Overall, please elaborate on how the enactment of each of these laws will work together to reduce gun violence and continue to ensure the safety of New Jersey residents. Has the department observed a reduction in gun violence in New Jersey since enactment and implementation of the programs established by the law? To date, how many persons have been charged with, and convicted of, violations of any of the new firearm related laws enacted in FY 2023?**

The seven gun-safety laws enacted in July of 2022 are a comprehensive and commonsense response to the epidemic of gun violence in New Jersey and across the United States. Attorney General Platkin is committed to working with Governor Murphy to use all of the tools available to reduce gun violence and keep New Jersey residents safe. The new laws represent a multi-faceted approach to protecting New Jerseyans from gun violence, which includes helping law enforcement keep deadly firearms out of the hands of dangerous criminals, ensuring that lawful gun owners are properly trained, that those who come from out-of-state comply with New Jersey's registration requirements, and holding accountable the irresponsible gun dealers and manufacturers who profit from the bloodshed.

These seven new gun-reform laws were enacted recently on July 5, 2022, with two taking effect February 1, 2023. While it is too early to draw any permanent conclusions, the state has already seen a significant reduction in gun violence. The number of people shot in New Jersey from July 2022 through February 2023 has fallen 15% when compared to the same period in FY 2022. New Jersey saw a 25% reduction in the number of shooting victims in 2022, and a 35% reduction in the number of shooting victims in February of 2023, compared to the same month just two years ago. While it is difficult to attribute this reduction to the July 2022 gun-safety laws alone, these laws are the continuation of a series of strong actions taken to combat gun violence since 2021, including the Attorney General's creation of a statewide Gun Violence Reduction Task Force, a heightened focus on intelligence-based approaches to shooting investigations and prosecutions, and groundbreaking community-based violence intervention strategies. The Attorney General also

Discussion Points (Cont'd)

created the Statewide Affirmative Firearms Enforcement (SAFE) Office to bring civil enforcement actions against firearm companies to hold them accountable for violations of the law that harm the health and safety of New Jersey residents, including by enforcing the new firearms public nuisance legislation.

The Department does not maintain information on the number of individuals convicted of violations of the new firearms-related laws. However, we are aware through the Division of State Police that 207 charges have been filed for criminal violations of the following statutes enacted, amended, or impacted by the July 2022 laws since their respective effective dates:

- 44 charges for violations of N.J.S.A. 2C:39-3(a) (destructive devices);
- 112 charges for violations of N.J.S.A. 2C:39-9(k) through (n) (ghost guns);
- 46 charges for violations of N.J.S.A. 2C:39-10(a)(1) (violating regulatory provisions);
- no charges for violations of N.J.S.A. 2C:58-2.14 (tampering with a microstamping enabled firearm);
- no charges for violations of N.J.S.A. 2C:58-3(o) (registration requirements for new residents); and
- five charges for violations of N.J.S.A. 2C:58-3.3 (unlawful disposition of ammunition).

18b. The FY 2024 Governor's Budget recommends an appropriation of $450,000 to fund salaries and wages for the Statewide Affirmative Firearms Enforcement Office.

- ***Question:*** **Please describe the mission, vision, and goals of the Statewide Affirmative Firearms Enforcement Office. In which division will this office be placed and what is the purpose of the office? What will be the fiscal impact of implementing and administering these laws in terms of staffing, workload, increased cases, enforcement, etc.? How will this program effect the Division of State Police and other divisions' budgets?**

The Statewide Affirmative Firearms Enforcement Office (SAFE) is the Department of Law and Public Safety's dedicated firearms industry watchdog, and the first-of-its-kind office of any state in the country. The Attorney General established SAFE in July 2022 under AG Directive No. 2022-08. SAFE sits as its own office within LPS, separate from other Divisions. The office is primarily tasked with investigating and bringing civil claims against irresponsible members of the firearms industry. That mandate includes implementing P.L. 2022, c.56, the public nuisance law specific to the firearms industry. That law allows SAFE to investigate and bring civil claims against firearms industry members who violate their obligations to the people of New Jersey and cause harm to the public.

SAFE was created to further LPS's efforts to keep the people of New Jersey safe from gun violence. Oversight and accountability of the firearms industry is a necessary and integral part of that effort, and SAFE is tasked with conducting that oversight. Like every business making or selling dangerous products, firearms businesses have to comport with strict federal and state laws to ensure that they do not jeopardize public safety. Their obligations include being responsible about what they sell and who they sell to. It is critical to public safety that the firearms industry act

Discussion Points (Cont'd)

appropriately given the nature of their business. SAFE's civil enforcement efforts are aimed at promoting legal, responsible industry business practices.

Given that SAFE is only a few months old, it is premature to fully assess the fiscal impact of the office's work. The establishment of SAFE as its own separate office, however, is designed to provide a centralized resource to all of LPS on gun-violence prevention efforts and to ensure limited fiscal and workload impact on other divisions. The Governor's recommended appropriation will go towards funding the salaries and wages of SAFE's staff, which will be comprised of a small group but effective group of investigators, attorneys, and administrative support, all supervised by a Director and Deputy Director. Their work is necessary to conduct investigations and bring civil actions pursuant to SAFE's mandate, and to limit the workload and budget burdens on other divisions. SAFE may also work with approved outside counsel to bring its civil enforcement actions, which include several law firms that will work on a *pro bono* or contingency basis.

Bringing Public Nuisance Cause of Actions

18c. P.L.2022, c.56 allows the Attorney General to bring cause of action for certain public nuisance violations arising from sale or marketing of firearms. This law permits the Attorney General to bring a public nuisance cause of action against members of the firearm industry, such as retailers and manufacturers, whose actions pose a risk to the public's health and safety. A similar law was enacted in New York and the New York Attorney General filed a lawsuit in June 2022 against multiple gun distributors for illegal firearms sales

- ***Question:*** **Please provide an example of a public nuisance violation under this law. How prevalent are public nuisance violations arising from sale of firearms?**

While it would be inappropriate to speculate on any specific matters in New Jersey, the threat to public safety posed by firearms industry member misconduct is very real in New Jersey and nationally, and that behavior can amount to a public nuisance violation under P.L.2022, c. 56. As publicly documented, unscrupulous gun dealers sell weapons to felons, domestic abusers, and other prohibited or high-risk persons, often foregoing or disregarding federally mandated background checks, or altering records to conceal the evidence of their wrongdoing. (see, e.g., https://www.thetrace.org/2021/05/atf-inspection-report-gun-store-ffl-violation). Other gun dealers have knowingly engaged in repeated "straw purchases"—illegal gun purchases in which the actual buyer of the firearm is not the person who completes the required background check or paperwork. A study in the Journal of Urban Health found that one in five of the gun dealers in its sample were willing to sell firearms to customers who were explicitly asking to buy a gun on behalf of another person, without conducting a background check or obtaining the necessary paperwork from the actual intended user of the firearm. (see https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2937134). Further, some firearms retailers store their products in an irresponsible manner that leads to theft and allows weapons to fall into dangerous hands. In 2021 alone, retailers reported 10,325 firearms as lost or stolen. (see https://www.atf.gov/resource-center/federal-firearms-licensee-theftloss-report-2021). SAFE is empowered to hold these industry members accountable under the public nuisance statute through affirmative litigation and by promoting responsible business practices.

Discussion Points (Cont'd)

Public nuisance claims can also be brought against those who make and distribute ghost guns. Ghost guns—unregistered, unidentifiable weapons made by unlicensed manufacturers—pose a significant new danger to the public. They are rapidly proliferating around the country, and represent an increasing percentage of all firearms recovered by New Jersey law enforcement. (see https://nj.gov/oag/newsreleases21/Final_Frame_or_Receiver_Comment.pdf). The public nuisance statute can address and deter the proliferation of these dangerous weapons. Indeed, New York's first use of its own firearms-specific public-nuisance law was to bring charges against ten ghost-gun distributors, alleging that these distributors sold tens of thousands of illegal unfinished frames and receivers to New York residents that were then converted into unserialized ghost guns (see *New York v. Arm or Ally LLC et al.*, No. 22-cv-6124 (S.D.N.Y. Dec. 22, 2022)). SAFE's work will accordingly help deter and address this significant new threat to public safety by holding those who manufacture and distribute these weapons accountable.

Requiring the Issuance of Firearm Purchaser Identification Cards

18d. P.L.2022, c.52 requires firearm owners who become New Jersey residents to obtain firearm purchaser identification cards and register handguns acquired out-of-State. Prior to this law's enactment, a firearm owner who resided out-of-State, but moved to New Jersey was not required to obtain a firearm purchaser identification card, which provides for a background check, fingerprinting, and approval of firearm ownership. In addition, out-of-State residents were not required to register their firearms purchased prior to moving into this State. This law was enacted to close this loophole. Moreover, all firearm retailers were required to report to the New Jersey Division of State Police all handgun sales conducted in this State.

- ***Question:*** **What will occur if an individual was a lawful firearm owner in another State, but is determined to be disqualified from obtaining a firearm purchaser identification card in New Jersey? Would that person be required to place the firearms in State or municipal law enforcement custody until a final resolution may be determined or will the owner be required to surrender or sell their firearms? How many firearm purchaser identification cards have been requested by, and issued to, new residents of New Jersey? How many handgun registrations have been requested by, and issued to, new residents?**

If an individual is denied under 2C:58-3b, the reason for their denial is the basis for the revocation of ownership. Example: individual is a person who may not possess (DV or felony conviction, mental health issue or physical handicap). There have been 111 FPIC and 170 self-registered handguns since 01/01/2023.

Upgrading the Crime for the Manufacture of Ghost Guns

18e. P.L.2022, c.53 upgrades certain crimes related to manufacturing firearms from third degree to second degree. This law established penalties for possession, transport, sale, and manufacture of "ghost guns" and parts for ghost guns or digital plans to make ghost guns or parts in 3D printers. A ghost gun is considered to be a non-traceable firearm. The law did not criminalize any new activity, but upgraded all of the penalties related to ghost guns in subsections k. through n. of N.J.S.2C:39-9 to second degree from third degree. This upgrade removes the presumption of non-incarceration for each crime and potentially provides prison terms for offenders. Crimes of the

Discussion Points (Cont'd)

second degree crime are punishable by a fine of up to $150,000, a term of imprisonment of five to 10 years, or both. Whereas, crimes of the third degree are punishable by a term of imprisonment of up to three to five years, a fine of up to $15,000, or both.

- *Question:* **What is the State's estimate of the annual revenue from fines and penalties imposed on and collected from individuals convicted of the upgraded offenses related to manufacturing certain firearms established by this law? What is the fiscal impact of the upgraded offenses on the Department of Law and Public Safety? How many people have been prosecuted for these crimes since the original ghost gun enactment in 2018 (subsections k. through m. were added to N.J.S.2C:39-9 by P.L.2018, c.138) and the expansion of the ghost gun law in 2019 (subsection n. was added by P.L.2019, c.165). Has prosecution of Internet distribution of 3D plans to construct firearms (subsection l.) been possible?**

The State is not able to estimate the revenue from fines and penalties imposed as the implementation of a fine is fully within the discretion of the Judge presiding over the sentencing. The collection of fines and penalties and its tracking is the province of the Administrative Office of the Courts.

The Department of Law and Public Safety does not anticipate any significant fiscal impact directly to the Department of Law and Public Safety from the upgrading of these offenses. However, the Division of Criminal Justice has been aggressively pursuing the prosecution of these offenses since their enactment, and the elevation of these crimes to a second-degree offense will assist prosecutors in obtaining stiffer penalties for offenders.

Since subsections (k) through (n) were upgraded in July of 2022, the Division has charged seven relevant cases with 11 total defendants, all involving the purchasing of firearms parts to manufacture a firearm without a serial number, also known as "ghost gun kits." These rates are consistent with the number and frequency of charges involving ghost gun offenses issued by the Division in the preceding eight months.

Since the enactment of these laws targeting the manufacture or sale of ghost guns and their components in 2018, there have been 281 complaints charging a violation of N.J.S.A. 2C:39-9(k), for the purchasing of firearm parts to manufacture a firearm without a serial number. There have been three complaints charging N.J.S.A. 2C:39-9(*l*)(1), charging the manufacture of a firearms or firearm components using a three-dimensional printer. There have been 13 complaints filed charging N.J.S.A. 2C:39-9(m), for the manufacture, transport, or sale of a covert or undetectable firearm. And there have been 40 complaints charging a violation of N.J.S.A. 2C:39-9(n), for the transport or sale of a firearm frame or receiver without a serial number.

To date, we are not aware of a prosecution involving the distribution of 3D plans to construct untraceable firearms under N.J.S.A. 2C:39-9(l)(2).

Discussion Points (Cont'd)

Revising the Definition of Destructive Devices

18f. P.L.2022, c.54 revised the definition of destructive device to include certain .50 caliber rifles. This law was intended to make unlawful "center-fire" rifles capable of firing a .50 browning machine gun cartridge.

- *Question:* **How do you anticipate this law will be implemented and enforced? Because this is a unique firearm, does the Attorney General anticipate many people being prosecuted for possessing this type of .50 caliber rifle? What is the estimated fiscal impact on the Department of Law and Public Safety having to prosecute additional cases? What is the administrations estimate resulting from fines, fees, and civil penalties under the law? What is the State's ability to collect these penalties? How many firearms have been sold, surrendered, or rendered inoperable resulting from the enactment of the .50 caliber rifle law?**

The classification of "any center-fire rifle that is capable of firing a .50 BMG cartridge" as a "destructive device" under N.J.S.A. 2C:39-1 will now allow law enforcement to prosecute the knowing possession of one of these firearms as a third-degree offense under N.J.S.A. 2C:39-3(a).

In 2022, 91 complaints were issued for a violation of this subsection. However, because the legislation added this particular firearm to the category of "destructive devices," which includes several other classes of weapons including bombs, grenades, and rockets, the Department is unable to parse out which complaints charging this offense specifically involved the possession of a .50 caliber rifle.

However, as these particular rifles are not common, we do not expect many prosecutions, and do not anticipate any significant fiscal impact on the Department. To date, since the enactment of this legislation, the Division of Criminal Justice has not handled a matter involving one of these firearms.

The Department of Law and Public Safety cannot estimate the revenue resulting from fines and penalties in matters involving these types of rifles, as that would be within the discretion of the judge imposing the sentence. Additionally, the State does not collect or track fines or penalties; that responsibility falls to the Administrative Office of the Courts.

Additionally, we are not aware of any firearms falling under this provision being sold, surrendered, or rendered inoperable. However, we can report that nine of these weapons were registered in accordance with the requirements of N.J.S.A. 2C:39-21.

Regulating the Sale of Handgun Ammunition, Training for Firearms,

18g. P.L.2022, c.55 regulates sale of handgun ammunition and develops system of electronic reporting of handgun ammunition sales. Prior to this law, handgun ammunition was regulated to the extent that a purchaser is to establish his or her eligibility by exhibiting a firearms purchaser identification card, a permit to purchase a handgun, or a permit to carry a handgun, and that he or she is 21 years of age or older.

Discussion Points (Cont'd)

P.L.2022, c.55 required an ammunition purchaser to also exhibit a driver's license, non-driver identification card, or other government-issued form of photo identification at the time of purchase. Moreover the law established a reporting requirement for firearm retailers who sell ammunition and requires the Division of State Police to establish a database of ammunition sales.

- *Question:* **How soon do you foresee the implementation of this database? What are the penalties for firearm retailers who fail to comply with the law? How will this database be used as a law enforcement tool during criminal investigations? What expenditures have the Division of State Police incurred to develop an electronic reporting system for handgun ammunition sales? What are the savings associated with the elimination of the current paper based reporting process.**

The database was operational prior to February 15, 2023. Pursuant to the law, retailers that do not comply with the law will be guilty of a fourth-degree crime, which carries with it a fine of up to $10,000. Law enforcement will be able to inquire as to the validity of a permit in real time. Law enforcement will also maintain the ability to revoke and/or suspend a permit instantly while also providing notification to the permit holder. NIC USA does not charge for the development of the system. They are provided with a fee for every transaction conducted in the system. There are no cost savings as each dealer kept a paper ledger for ammo sales prior to the system being activated.

Requiring Training for the Issuance of Firearms Purchaser identification Cards

18h. P.L.2022, c.58 requires training for issuance of firearms purchaser identification card and permit to purchase handgun under certain circumstances. The law was intended to require new applicants for a firearms purchaser identification card to satisfactorily complete a course of instruction approved by the Superintendent of the Division of State Police in the lawful and safe handling and storage of firearms. The law also increased security by requiring firearms purchaser identification cards to display a picture and fingerprint information of the cardholder. The law requires the renewal of firearms purchaser identification card every ten years to allow for subsequent background checks to ensure a person is still eligible to possess the card (does not apply to persons who obtained card prior to the law's effective date)

- *Question:* **Has the Division of State Police designed and implemented the training program? If so, how many people have completed the training requirement and is this at the rate administration anticipated? If so, does the administration anticipate the training requirement may delay an individual's access to a firearm, e.g., a domestic violence victim wishing to protect themselves? How will the training program be administered, e.g., remotely or in-person?**

Training was developed and activated into the Firearms Application and Registration System (FARS) application as of September 13, 2022. The applicant cannot proceed through the application until the training built into the application is completed. All applicants applying for an Initial FPIC must complete the training, although the exact number is not available. The training will not delay an individual's access to firearms as it is built into the application. The training is built into the application.

Discussion Points (Cont'd)

- *Question:* **Once the process for obtaining the firearms purchaser identification card with a picture and fingerprint is established, how does your office plan to inform the public of the new application process? How many people have received firearm purchaser identification cards since the law's effective date? Can you estimate the number of people annually who will be required to renew their firearms purchaser identification card?**

Every applicant is notified once they initiate their application in the FARS system for an initial FPIC. 25,407 initial FPICs have been approved since the training was effective 09/13/2022. NJSP cannot offer an estimate on the annual number of people who will be required to renew their card due to the various reasons that may prompt a change.

Requiring Firearm Retailers to Sell Microstamping-enabled Firearms

18i. P.L.2022, c.57 requires firearm retailers to sell microstamping-enabled firearms upon determination of availability by the Attorney General. A microstamp is a unique alphanumeric or geometric code that identifies the make, model, and serial number of a firearm. A microstamping-enabled firearm is a firearm that contains a microstamping-enabled component, which produces a microstamp on at least one location of an expended cartridge case each time the firearm is fired. This law was intended to normalize the purchase of microstamping-enabled firearms by making them widely available for consumers Statewide as soon as possible. Similar to the updated version of the personalized handgun law, the microstamping law requires licensed retail dealers of firearms to sell microstamping-enabled firearms in order to allow the public to have immediate access to them once they are commercially available. The law also provides an instant rebate at the point of sale to incentivize consumers to purchase them over traditional firearms (10 percent of purchase price to a maximum of $30).

- *Question:* **Has the Attorney General had an opportunity to make an initial determination of the availability of microstamping yet? If not, what is the timeline for the determination? What are the anticipated annual cost increases to: 1) evaluate the viability of microstamping; 2) establish certain guidelines related to microstamping; 3) employ a microstamping examiner; 4) regulate and enforce provisions related to licensed retail dealers; 5) establish a Microstamping Fund and grant program for law enforcement agencies to purchase microstamping firearms; and 6) establish an instant rebate program for purchasers? Please provide the anticipated fiscal impact from the revenue from fines, fees, and civil penalties imposed on individuals violating the provisions of this law. Please provide an overview of the availability of microstamping-enabled firearms and if any retailers are currently selling these firearms at this point.**

OAG and NJSP have met with various experts on microstamping technology and have conducted several demonstrations for law enforcement leadership in the state. Leadership is exploring implementing microstamping technology for law enforcement so that we can continue to study its use. Upon implementation, FIU would be required to inspect each licensed gun dealer in NJ every 2 years (currently periodically or at license renewal). An estimate of annual cost increases is not available.

Office of the Attorney General: Permit to Carry

Discussion Points (Cont'd)

19. New Jersey's gun safety laws, which are among the strongest in the nation, prohibit a person from carrying a handgun in public unless he or she has obtained a permit to carry that handgun. To obtain a permit to carry a handgun, an applicant is required to demonstrate a "justifiable need." Both State and federal courts have upheld this rigorous standard as constitutional until June of 2022, when the U.S. Supreme Court expanded an individual's gun rights, in a landmark ruling that said the Second Amendment protects an individual's right to carry a handgun for self-defense outside the home. The decision invalidated the justifiable need requirements of the gun laws in New Jersey and other states. In response to the United States Supreme Court decision in N.Y. State Rifle & Pistol Association v. Bruen, P.L.2022, c.131 was enacted to remove the "justifiable need" standard from current law, establish an expanded framework concerning the purchase of firearms and the issuance of permits to carry handguns in this State, and codify sensitive locations at which the right to carry a handgun would be restricted.

The Division of State Police predicted there could be as many as 200,000 new carry permit applications resulting from the court decision. Firearms owners will still be required to obtain permits, albeit without the requirement showing justifiable need. Background checks for firearm ID cards and permits are already taking several months to complete.

- ***Question:*** **Will this function be transferred to the new Statewide Affirmative Firearms Enforcement Office or will the Division of State Police handle the increased workload that will result from the additional number of anticipated permit to carry applications? Does the department intend to increase staffing to accommodate and expedite the application process? If so, please elaborate on the plan.**

The Division of State Police has handled all PTC applications for municipalities patrolled by the State Police as well as Armored Car employee and elected officials and will continue to do so. The Division of State Police has increased its staffing within FIU to handle the increased workload of PTC applications general increase in FPIC and handgun permits.

- ***Question:*** **With the potential for an increased number of New Jersey residents carrying concealed firearms, what are the overall repercussions on law enforcement, courts, and the correctional and parole systems? How many permits to carry a handgun have been issued since June 2022 when the United States Supreme Court issued the holding in Bruen?**

Due to more individuals carrying firearms and new statutes governing the requirements for lawfully carrying, it is likely that there will be more interaction with the public for incidents involving firearms. This is one reason why Attorney General Platkin has taken swift action, in conjunction with Governor Murphy, to bolster the state's common sense firearms laws to protect the public.

FIU cannot answer how this will affect the courts, corrections, or parole. Currently FIU has 5730 Permit to Carry issued statewide. The exact number is unknown as all municipalities do not send approved permit applications to FIU to be placed in the Firearms Licensing System. Once the online application database is operational, with an anticipated launch in summer 2023, real-time figures will be available for applications statewide.

Discussion Points (Cont'd)

Office of the Attorney General: Opioid Settlements Endo International plc

20. On August 21, 2022, several Attorney Generals nationwide announced that a $450 million agreement in principle was reached with the opioid maker Endo International plc and its lenders, which will help support opioid prevention, treatment, and recovery in communities nationwide.

Endo made a drug called Opana ER, which was removed from the market in 2017. The company claimed that the drug's formula was "abuse-deterrent," but ultimately led to deadly outbreaks of Hepatitis and HIV due to its widespread abuse via injection. Endo also was deemed to have used deceptive marketing that downplayed the risk of addiction and overstated the benefits of other opioids.

This nationwide agreement:

- Requires the payment of $450 million in cash over 10 years to participating states and subdivisions;
- Requires Endo to turn over its opioid-related documents for publication online in a public document archive and pay $2.75 million for archival expenses; and
- Bans the marketing of Endo's opioids forever.

In August of 2022, Endo filed for Chapter 11 bankruptcy reorganization and it is anticipated that creditors will establish voluntary trusts with $550 million to be funded over 10 years to settle opioid claims in the lawsuits.

- ***Question:*** **What amount of funds does New Jersey anticipate receiving from the settlement? Once settlement funds are received, how will the expenditure of the settlement funds address the ongoing opioid epidemic in New Jersey? Are there any stipulation on the expenditures of these funds? How does the State anticipate allocating and expending these funds in accordance with the settlement specifically with the programs supported under the agreement? When available, please include an explanation and details of the programs supported with these funds and a list of payments and amounts by program supported.**

At this point, we cannot calculate precisely the amount New Jersey or any other state will receive from the settlement because state allocation amounts have yet to be divulged in the chapter 11 filing. Once the settlement funds are received, recipients will be required by the operative documents to use the funds for opioid abatement. The State has not yet determined whether the allocation and expenditure of these funds will be in accordance with the default or the State Subdivision Agreement, and it is in the State's sole discretion to make such allocation decision. Accordingly, we are too early in the process to include an explanation and details of the programs supported with these funds and a list of payments and amounts by program supported.

Office of the Attorney General: Opioid Settlements: Johnson and Johnson, AmerisourceBergen, Cardinal Health, and McKesson

21. The State will receive $641 million in opioid related settlement funds from Johnson & Johnson and three distributors through the year 2038: AmerisourceBergen, Cardinal Health, and

Discussion Points (Cont'd)

McKesson. These funds are expected to be divided between the State, counties, and municipalities and expended over the next two decades.

Distributors and Janssen Combined Payments to New Jersey		
Payments	**Payment Dates**	**Payment Amounts**
Payment 1	April 2, 2022 Distribution 1 July 2, 2022 Janssen	$32,428,234.86
Payment 2	July 15, 2022	$46,033,974.00
Payment 3	July 15, 2023	$42,060,004.48
Payment 4	July 15, 2024	$51,015,655.89
Payment 5	July 15, 2025	$53,431,772.89
Payment 6	July 15, 2026	$33,134,907.27
Payment 7	July 15, 2027	$33,134,907.24
Payment 8	July 15, 2028	$38,194,045.04
Payment 9	July 15, 2029	$39,398,601.70
Payment 10	July 15, 2030	$39,398,601.72
Payment 11	July 15, 2031	$34,013,371.55
Payment 12	July 15, 2032	$28,399,344.97
Payment 13	July 15, 2033	$28,399,344.97
Payment 14	July 15, 2034	$28,399,344.97
Payment 15	July 15, 2035	$28,399,344.97
Payment 16	July 15, 2036	$28,399,344.97
Payment 17	July 15, 2037	$28,399,344.97
Payment 18	July 15, 2038	$28,399,344.97
Total Amount of Payments		**$641,049,491.43**

Source: Department of Law and Public Safety

Roughly speaking, of that amount $629 million will be split with the subdivisions and $12 million will flow to the state.

- ***Question:*** **Does the State anticipate any additional payments as a claimant from any other opioid cases that may be filed and settled? If so, please provide the company name and settlement amount for each.**

Our office has entered into a number of nationwide opioid settlements, with a total amount at approximately one billion dollars to State and local coffers for abatement purposes. In addition to the approximately $641 million New Jersey—including its county and municipal governments—stands to receive from New Jersey-based Johnson & Johnson, and three pharmaceutical distributors (McKesson, Cardinal Health, and AmerisourceBergen), we have received or anticipate receiving payments in connection with the following other opioid settlements:

- In a multi-state settlement announced in 2021, McKinsey, a global consulting firm that designed aggressive marketing strategies used by some of the nation's largest opioid manufacturers, will pay a total of $558 million to 47 states, the District of Columbia, and five U.S. territories. New Jersey's share of the settlement is approximately $16 million. To date, New Jersey has received over $13 million.

Discussion Points (Cont'd)

- In another multi-state opioid settlement in connection with the bankruptcy of Mallinckrodt PLC, New Jersey and its counties and municipalities are expected to receive approximately $30 million from global pharmaceutical maker, Mallinckrodt in connection with their opioid-related claims against the company. The settlement was announced in 2022. To date, New Jersey and its subdivisions have received over $4 million.

- In 2021, we entered into an anticipated $5 million settlement against Insys Therapeutics' founder John Kapoor, who we alleged orchestrated the payment of bribes to New Jersey doctors as part of a nationwide scheme to boost sales of the company's opioid drug, Subsys. To date, New Jersey has received $1 million.

- Earlier this year, we joined nationwide settlement agreements with pharmacy chains CVS, Walgreens, and Walmart, and drug makers Teva and Allergan. Subject to sufficient subdivision sign-on nationwide, the five companies have agreed to pay as much as $20.1 billion, collectively, to states and local governments nationwide as redress for their role in the opioid epidemic. In addition to holding the companies financially accountable, the settlements require them to make significant changes to their business practices to prevent similar crises in the future. Assuming the agreements become effective and there is sufficient New Jersey subdivision sign-on, New Jersey and our eligible county and municipal governments stand to receive up to approximately $500 million from all five settlement agreements.

Office of the Attorney General: Electronic Cigarette Settlement (Juul Labs)

22. In September 2022, electronic cigarette maker Juul Labs was required to pay nearly $438.5 million over a period of six to ten years to settle a two-year investigation by 33 states into the marketing of its high-nicotine vaping products, which have resulted in sparking a national surge in teen vaping. Under the agreement, New Jersey will receive approximately $33.6 million to be paid in yearly installments, with the first due by the end of 2022 and the final payment due by the end of 2027. JUUL has the option to split the final payment up over five additional years. If the company chooses to do so the final settlement will reach $36.5 million. The settlement is subject to final approval of the court.

- ***Question:*** **Has the settlement received final court approval? If so, when does the State anticipate that the first annual installment will be paid to New Jersey? Are there any stipulations on the expenditures of these funds? How does the State anticipate allocating and expending these funds in accordance with the settlement, specifically with the programs supported under the agreement, if any? Since the settlement, what is the Office of the Attorney General's outlook on the electronic cigarette industry and teen usage of electronic cigarettes?**

Yes, the Final Consent Judgment was filed on 2/7/23. The State received its first payment of $3,155,492.63 in February 2023. The next payment is due by December 31, 2023. Payment will continue on that schedule annually until the judgment is satisfied. Of each payment made by JUUL to NJ, 15% is to be allocated to the NJ Department of Health ("DOH"). Money received by DOH shall be used to the extent practicable to fund:

Discussion Points (Cont'd)

- Programs that provide cessation assistance to New Jersey residents who were exposed to electronic nicotine delivery systems (ENDS) while under the age of 21;

- Education or prevention programs that are designed to prevent or reduce use of ENDS by New Jersey residents who are under the age of 21;

- Research in support of preventing ENDS use by New Jersey residents who are under the age of 21 by independent third parties;

- Programs or equipment that are designed to abate the impact that ENDS and other nicotine products have had on New Jersey students, New Jersey residents who are under the age of 21, schools, school districts and to prevent such impact in the future; and

- Efforts to mitigate the impact of disposable ENDS, synthetic-nicotine products, and companies that have not taken steps similar to those described in the injunctive terms of the Final Consent Judgment to limit access to or usage of nicotine and nicotine-synthetic products by New Jersey residents who are under the age of 21.

Besides this 15% allocation per payment, the Consent Judgment states that it is the parties' intent that the amount paid shall be used by the Attorney General (which includes the Division of Consumer Affairs) for purposes that may include, but are not limited to: attorneys' fees and other costs of investigation and litigation of this and future matters, or may be placed in, or applied to, any consumer protection law enforcement fund, including future consumer protection enforcement efforts, consumer education or redress, litigation or local consumer aid fund or revolving fund, used to defray the costs of the inquiry leading hereto, and/or for other uses permitted by state law, within the sole discretion of the Attorney General.

The scourge of vaping and e-cigarette use continues to concern OAG, especially efforts by those in the e-cigarettes industry (and the larger tobacco industry) to market their products to minors. DCA and DOL staff are members of multi-states working groups that were formed to address consumer protection issues relating to tobacco (including e-cigarette and vaping) products. OAG continues to monitor these issues and will take appropriate action, on its own or working with other states, as warranted. This includes drafting or joining multi-state comments letters and amicus briefs, investigating potential violations of NJ's consumer protection laws and regulations, and taking appropriate enforcement action against violators.

Office of the Attorney General: Credit Suisse Settlement

23. In October of 2022, the Attorney General's Office announced a settlement was reached with Credit Suisse Securities (USA) LLC, Credit Suisse First Boston Mortgage Securities Corp., and DLJ Mortgage Capital, Inc. (collectively "Credit Suisse") to resolve allegations of fraud associated with the sale of residential mortgage-backed securities to hundreds of institutional investors nationwide. Credit Suisse sold to unsuspecting investors including public and private pension funds, charities, educational institutions, mutual funds, hospitals, and other money managers, who in turn invested the retirement funds of workers and the savings of individual retail investors from 2006 to 2007 in the run-up to the 2008 financial crisis.

Discussion Points (Cont'd)

The State alleged Credit Suisse made material misrepresentations in the offering documents about the risks of the residential mortgage-backed securities, including failing to disclose material defects of the underlying mortgages, in violation of New Jersey's securities laws.

The New Jersey Bureau of Securities in the Department of Law and Public Safety states that the agreement in principle reached with Credit Suisse totaled $495 million. In addition, the Bureau states that the civil monetary recoveries will include $300 million in restitution for investors nationwide and $100 million in a civil monetary penalty. The FY 2024 Budget in Brief reflects $321.4 million in dedicated revenues for restitution from the Credit Suisse Settlement in FY 2023.

- ***Question:*** **Please provide a breakdown of the uses of the $495 million settlement and indicate whether the State has already received the full amount of the settlement. If applicable when are any remaining funds anticipated to be received? Are there any stipulations on the expenditures of these funds? How does the State anticipate allocating and expending these funds in accordance with the settlement agreement, specifically with the noted restitution program? What is the timeline for establishing the restitution program? How and when will applicants be allowed to make a claim for restitution? When does the department anticipate disbursing settlement amounts to eligible investors?**

Pursuant to the October 25, 2022 Administrative Consent Order, Credit Suisse paid the Settlement Amount of $495,000,000, which was ordered to be allocated as follows:

- $300,000,000 as restitution pursuant to N.J.S.A. 49:3-69(a);
- $100,000,000 as a civil monetary penalty of which $10,000,000 was ordered to be used by the Department of Law and Public Safety for further investigation and enforcement actions pursuant to the Securities Law, as well as other efforts to prevent securities fraud and to protect the investing public; and
- $95,000,000 to pay investigation, litigation, and restitution costs and fees, including for the claims administration process. Any remainder after costs and fees are paid shall revert to the Bureau and be used in the Bureau Chief's discretion.

The State received $421,362,917.50, representing the Judgment amount net of litigation costs and counsel fees, via several wire transfers between October 28th and November 22nd.

The restitution will be distributed to investors through a claims process that will include a notice and claim form that will be sent to investors and will be administered by a third party claims administrator. Potential claims administrators are currently being vetted. Once a claims administrator has been procured, the claims process is estimated to take 18-24 months.

Office of Homeland Security and Preparedness: Threat Assessment

24. In January of 2023, an individual threw a Molotov cocktail in an arson attempt at a Bloomfield New Jersey synagogue and school. According to the New Jersey Office of Homeland Security and Preparedness 2022 Threat Assessment report, homegrown violent extremists and

Discussion Points (Cont'd)

white racially motivated extremists remain the most prominent threats to New Jersey in 2022. Specifically, the Office of Homeland Security and Preparedness stated in the annual report:

> "Anarchist, anti-abortion, anti-government, black racially motivated, militia and sovereign citizen extremists comprise domestic moderate threats. Domestic extremists are expected to return to pre-pandemic operating norms, shifting their focus to local expansion, participating in demonstrations and engaging in low-level criminal activity."

The report indicated that in 2021 there were 14 domestic extremists' related incidents in the U.S. as compared to 46 incidents in 2018 and 50 incidents in 2017. The Anti-defamation League stated that throughout 2021, at least 38 white supremacist groups distributed propaganda, but three groups (Patriot Front, New Jersey European Heritage Association, and Folkish Resistance Movement (formerly known as Folksfront) were responsible for 91 percent of the activity.

- ***Question:*** **What are the indicators leading to the expectation that domestic extremists will return to the pre-pandemic operating norm? What strategies are being implemented by the State to track domestic extremism in New Jersey and deter it before it resumes? Please explain how the office is helping State, county, and municipal governments as well as high-risk populations increase awareness and implement protective action strategies to deter domestic extremists in addition to the three nonprofit security grant programs. What pressure does the increased threat level put on the budget?**

The New Jersey Office of Homeland Security and Preparedness releases a yearly threat assessment. In the 2022 New Jersey Threat Assessment, which was originally released in March of 2022, the office highlighted how domestic extremists were expected to return to pre-pandemic operating norms, shifting their focus to local expansion, participating in demonstrations, and engaging in low-level criminal activity. In the latest Threat Assessment, released in February of 2023, this statement was supported by the observed increase in domestic extremist incidents, from 14 in 2021 to 27 in 2022.

An NJOHSP nationwide review of domestic extremist incidents in 2022, including attacks, threats, plots, and incidences of weapons stockpiling, highlights the enduring threat of lone offenders who identify with varying ideologies. In the past year, lone offenders with differing ideologies have used their personal grievances against religious groups, minorities, and law enforcement as justification for violence and the spread of hateful rhetoric. Of note, racially motivated and homegrown violent extremists target and carry out attacks on New Jersey's Jewish community due to shared antisemitic beliefs among corresponding ideologies.

Domestic extremists increased their online operational presence during the pandemic when mass gatherings were limited, and social distancing was in effect. During this time, extremists shared grievances online, plotted and attempted to carry out attacks, and coordinated with like-minded individuals. NJOHSP assesses that this increase in online activity contributes to radicalization and motivates lone offenders to carry out attacks. Indicators in New Jersey of said activity rely on Suspicious Activity Reports reporting and comparisons to national threat trends.

Discussion Points (Cont'd)

NJOHSP strategy over the last year has been to expand social media capabilities by embedding a new social media intelligence analyst within the NJ Regional Operations and Intelligence Center's open-source intelligence unit. NJOHSP also introduced a disinformation portal as another resource to help the public with identifying intentionally false or misleading information.

NJOHSP chairs a domestic terrorism working group which brings intelligence analysts together from the NJ Division of Criminal Justice, NJ ROIC, NJ Transit, New York Police Department, FBI, and the Delaware Valley Intelligence Center to discuss and understand the threats domestic extremists present to our State and surrounding region. This proactive intelligence and information sharing approach provides a shared threat picture to allocate and streamline law enforcement and homeland security resources. NJOHSP meets with and educates our county counterterrorism coordinators and other law enforcement personnel and works in partnership with NJ SHIELD to better protect private sector and critical infrastructure partners. New Jersey Shield is a collaborative effort between the New Jersey Office of Homeland Security and Preparedness and the New Jersey Regional Operations and Intelligence Center. This private-public partnership program fosters information sharing and strengthens collaboration by enhancing communication between New Jersey State agencies, homeland security representatives, and law enforcement officials, as well as private- and public-sector managers of security, emergency management, and business continuity.

At this time, the evolving threat environment does not impact the office's ability to meet its intelligence mission.

Office of Homeland Security & Preparedness and Division of Consumer Affairs – Reproductive Health Security Grant Program and the OBGYN Clinical Training Program

25. According to the New Jersey Office of Homeland Security and Preparedness, abortion-related extremists rely on intimidation tactics that disrupt daily operations of abortion clinics, pregnancy centers, and religious institutions, use techniques to conceal their identities, and employ similar methods of attack such as arson and vandalism.

The FY 2023 budget appropriated $10 million to the Department of Law and Public Safety toward securing clinics, of which $5 million was allocated to the Office of Homeland Security and Preparedness for the Reproductive Health Security Grant program and $5 million was allocated to the Division of Consumer Affairs for the OBGYN Clinical Training Program to provide training to licensed members of the health care community. As of March 2023, no funds have been expended for either of these programs. The FY 2024 Governor's Budget recommends the continuation of the $5 million appropriations for both programs.

- ***Question:*** **Please explain why no funds have been expended for either of these programs to date.**

The Reproductive Healthcare Security Grant Program design was completed and approved at the end of Calendar 2022. The application submission period extended from January to the end of February 2023. A total of 27 applications were received requesting approximately $2.7 million dollars for eligible security enhancements. A second round of funding opportunity will be

Discussion Points (Cont'd)

announced shortly with an application period being the month of April 2023. All requested and approved security enhancement funding will be obligated by the end of June 2023 if not earlier. Awards are expected to be announced in the near future, likely within the next 60 days. The grant program reimburses subgrantees for eligible expenses and subgrantees have a two-year period of performance.

In December 2022, the New Jersey Division of Consumer Affairs posted a Notice of Availability of Funds (NOAF) announcing the availability and award of a non-competitive grant for this funding to Rutgers University in the amount of $5 million to implement the New Jersey Reproductive Training and Education Initiative. The Division has received Rutgers' application and is presently working with Rutgers to finalize the programmatic and budget details. It is anticipated that the award will be executed within the next thirty days.

- ***Question:*** **How will the policy resolve the underlying problem? Are there additional ways to not only protect but also deter violence against these clinics proactively?**

The goal of the Reproductive Training and Education Initiative funded by the Division of Consumer Affairs is to provide abortion training and education for all health professional students and all practicing professionals eligible to provide abortion care in New Jersey who want to become proficient in the provision of abortion care, including medication abortion, with a focus on the recently eligible health professions (Advanced Practice Nurses, Physician Assistants and Certified Midwives). This funding opportunity will allow for a significant workforce expansion of abortion providers and enhance New Jersey's ability to meet the increased demand for abortion and reproductive health services. All training provided through this initiative is required to be patient-centered, trauma-informed, and equity-based.

Clinics will work with their local law enforcement agencies to coordinate on safety and deterrence functions. NJOHSP will conduct an evaluation of the program. The Reproductive Health Security Grant Program affords eligible facilities the opportunity to enhance existing security measures by hiring security personnel and/or installing target hardening equipment. The visibility of security personnel serves as a deterrent to those inclined to commit violence or other criminal activity. By installing target hardening equipment designed to deter, detect, and prevent facilities from criminal activity, workers and patrons will feel and be safer from the criminal element.

NJOHSP will conduct a survey of all subgrantees after they hire security personnel and/or install target hardening equipment with these grant funds.

Discussion Points (Cont'd)

- *Question:* **What is the Office of Homeland Security and Preparedness's plan to secure the clinics? How will the funding be allocated among the program elements: security personnel, target hardening, and physical location assessments? If the office intends to distribute grants to secure physical locations, which entities would be best qualified to implement the program and how long would it take to get the program up and running given that violence against the clinics is currently taking place.**

NJOHSP's plan is to distribute these appropriated dollars to those facilities facing the highest risk of violence or other unlawful activity. Applicants were required to conduct and submit a Site Vulnerability Assessment (SVA) that identifies areas to enhance their security profile and guide their investment strategy. Clinics, based upon their unique situations and self-understanding, have been afforded the opportunity to determine what funding allocation strategy works best for them. Each subgrantee is responsible for the implementation of security enhancements as approved within the submitted application. The pace at which subgrantees implement these security enhancements is self-determined.

- *Question:* **What is the Division of Consumer Affairs plan to train the health care community to protect clinics, centers, and institutions from attacks?**

As detailed above, DCA's Reproductive Training and Education Initiative will training students and professionals who are eligible to provide abortion care in New Jersey and who want to become proficient in the provision of abortion care; it does not provide funding for security training. The New Jersey Reproductive Training and Education Initiative will involve both in-classroom training and collaborative hands-on training provided by experts from Rutgers faculty and existing community partners to students and existing licensees

Division of Law: Outsourcing of Legal Cases and Assignments

26. The Department of Law and Public Safety annually outsources cases and assignments, retaining outside counsel for various reasons. The department also enters into client service agreements with other State departments to handle legal cases through outside counsel. During the FY 2023 budget review process, the department provided documentation that State agencies paid approximately $25 million to outside counsel in calendar year 2021. During the FY 2022 budget review process, the department provided documentation that State agencies paid approximately $34.4 million to outside counsel in calendar year 2020.

- *Question:* **What are the primary reasons for outsourcing cases and assignments? What was the total cost for outside counsel in calendar year 2022 compared to the total in-house cost?**

The Division of Law (DOL) retains outside counsel for a variety of reasons including, but not limited to, (1) conflicts, either under the Rules of Professional Conduct or other conflicts, (2) the need for highly specialized counsel in areas of the law in which DOL has insufficient in-house expertise, (3) in certain complex or large-scale affirmative matters, to provide additional attorney capacity, particularized expertise, and/or to outsource risk where outside counsel agrees to work on a contingency basis, (4) lack of sufficient attorney capacity due to a particularly high volume of

Discussion Points (Cont'd)

matters at a given time or during periods of unusually high DOL attorney attrition, or (5) when the State is sued in out-of-state jurisdictions.

DOL outside counsel spend for non-contingency matters in calendar year 2022 was $27,636,453.20. Contingency fee payments, including for the historic $495 million settlement with Credit Suisse, totaled $73,818,186.56. The Division of Law billed out roughly $95 million in legal services provided in-house to client agencies. Please note that DOL client services agreements are general agreements that address the provision of legal services to the Executive Branch as required under State law. These services may include outside counsel on as case by case basis as described above.

- *Question:* **Please provide a list of cases and assignments for which outside counsel was retained, including the amount paid per case for calendar years 2022 and 2023 to date. Please include the names of law firms used, the amount paid to each law firm, a description of the primary types of cases handled by each law firm, and department involved. What percentage of outside counsel costs represents legal fees paid on a contingency basis? Which specific cases involve outside counsel retained pursuant to a contingency fee arrangement?**

The requested lists, in Excel format, are attached. Please note that the relevant department is identifiable by the case name. Most firms handle a variety of matters, as is apparent from the spreadsheet. Please note that those matters are highlighted in the enclosed 2022 spreadsheet. Those matters are the following: (1) Grewal v. Credit Suisse Securities (USA) LLC et al.; (2) Statewide NRD litigation against DuPont; and (3) Statewide AFFF (Aqueous Film Forming Foam) litigation. To date, no contingency payments have been made in 2023.

- *Question:* **How does the State make the determination to hire outside council? What are the decision-making factors involved in that determination? What is the breakeven between hiring outside council expertise versus utilizing in-house State council? When contracting with outside council, does the State divide the casework between in-house and outside council? If so, how is the division of labor determined? At what point does the State determine it should develop a specific legal expertise in-house? What issues are evolving which may require the State to develop in-house expertise?**

In addition to the reasons noted above as to why DOL hires outside counsel, DOL generally selects which firm to hire on any given matter from a list of firms previously selected to serve in a particular area of law by way of DOL's Request for Qualifications in accordance with the provisions of Executive Order No. 157 (Corzine 2009). In 2022 and 2023, AG Platkin has taken significant steps to modernize DOL's outside counsel infrastructure. DOL's Outside Counsel Guidelines handbook has been updated to account for, for example, how modern videoconferencing technology affects how much the state should pay for travel costs. The application process has been streamlined by moving applications for qualification lists online compared to the previous paper-only process. The AG has also underscored the importance of diversity in this area by revising the diversity information required of applicants to reflect changes in the EEOC's ethnicity and racial categories, to cross-reference by race/ethnicity and gender, and to enable firms to report on nonbinary members and employees. And we have started issuing new Requests for Qualifications to update those lists, a process that was interrupted by the pandemic. To name the oldest example, our list

Discussion Points (Cont'd)

of firms to provide general litigation services had not been updated since 2015; it is now scheduled to be updated this spring.

In terms of which particular firm to hire in a given matter, there are a variety of factors DOL considers, and those factors vary based on the type of matters. In some areas of law, the DOL has set fee arrangements where all firms have agreed to the same rates. In those matters, our decision is based primarily on the capacity of the firm to handle a given matter—for example, their size may be determinative if the matter is expected to take the time of numerous attorneys—as well as previous experience with the firm. In other matters, specifically those that are highly complex, rates are negotiated.

The breakeven point differs by matter, by matter type (including the nature of the fee arrangement), and by the reason for retention. Furthermore, the bulk of the reasons we hire outside counsel—conflicts, insufficient in-house capacity in terms of time, and insufficient in-house expertise—do not permit for weighing of pros and cons; rather they render outside counsel retention necessary. That said, DOL prefers to use in-house attorneys when possible.

When working with outside counsel, DOL generally is involved in supervising outside counsel and performs substantive legal work as well. DOL maintains control and decision-making over all cases for which outside counsel has been hired, and reviews and revises outside counsel work product. Division of labor is determined by the needs of the individual case.

DOL is constantly monitoring the growth of legal needs in different areas of the law, and when a need for a certain type of legal expertise persists and continues to grow, we consider establishing that expertise in-house. Depending on the area of law, this may or may not be possible. However, there are areas where DOL is currently building out capacity. For example, over the past few years, DOL created and built out the highly successful Data Privacy and Cybersecurity Section to expand DOL's capacity and expertise to handle these matters. The establishment and expansion of DOL's capacity in this growing area may allow us to avoid or limit the need to retain outside counsel on such matters in the future.

Division of Consumer Affairs: Deceptive Mailing

27. Current law prohibits any mail soliciting the purchase of a product or service which could reasonably be interpreted as falsely implying any State government connection, approval, or endorsement through the use of a seal; insignia; citation to a State statute; name of a State agency, department, commission, or program; trade or brand name; or any other term or symbol.

- *Question:* **To the best of the department's knowledge, to what extent have residents of New Jersey paid for services or products demanded of them by a deceptive mailing? Since the law's enactment, how many complaints of deceptive mailings has the Division of Consumer Affairs received? What is the division's estimate of the annual revenue from fines and penalties imposed on and collected from violators? What is the division's estimate of the payments made by unsuspecting victims to deceptive mailing? Is a process in place for victims of financial mailings to recover payments made? Has the division taken action to inform the public and businesses of the new law? If the division**

Discussion Points (Cont'd)

has taken action to inform the public and businesses of the new law, please indicate the actions taken.

Since the enactment of N.J.S.A. 56:8-227 in December of 2021, the Division of Consumer Affairs has received 17 complaints regarding deceptive solicitations. In addition to receiving consumer complaints about deceptive mailings and solicitations, Division staff also receive referrals from sister agencies in other states about similar scams that may be prevalent in New Jersey.

There are ongoing investigations as a result of the referrals and complaints received. These matters remain under active investigation and the Division cannot provide further details or estimates of potential financial harm to consumers at this time. As these matters are ongoing, no enforcement action has been taken to date.

The law enacted in 2021 does not provide any specified, dedicated process for victims of financial mailings to recover payments made. As this law is part of the CFA, however, victims are encouraged to file complaints with the Division, and additionally, the law provides victims with a private right of action. In appropriate cases and following a thorough investigation, the Division can seek restitution, fines, and penalties from those who violate the CFA, including N.J.S.A. 56:8-227.

The Division has a consumer brief on its website that educates and informs consumers about government imposter scams accomplished through deceptive mailings. In addition, the Division has posted a warning on its website about a similar scam, alerting licensed professionals to the activities of impersonators purporting to be New Jersey Division of Consumer Affairs (DCA) investigators, Drug Enforcement Administration (DEA) agents, DEA investigators, New Jersey Drug Control Unit investigators, Federal Bureau of Investigation (FBI) investigators, and other law enforcement personnel, as part of an extortion scheme.

Division of Consumer Affairs: Professional Fee Waiver

28. The FY 2023 budget allocated $14.1 million toward the Division of Consumer Affairs to waive health care professions application and renewal fees. According to the New Jersey Office of Management and Budget, the following health care professions would receive these waivers for application and renewal fees due between July 1, 2022 and June 30, 2023:

Discussion Points (Cont'd)

Board			Fee	Total
Nursing - estimation as renewal begins May 1st.

	Application Fees	2,158	$180.00	$388,440.00
Rehabilitation Counselor				
	Renewal Fees	1	$75.00	$75.00
	Application Fees	67	$250.00	$16,750.00
		Board Total:		**$18,475,595.00**

In addition to the $14.1 million scored growth, there was a reduction in the Schedule 1 in the amount of $4.678 million. Together, the total provided for the fee waivers is $18.8 million, which is sufficient for the fiscal year 2023 applications and renewals for the professional boards listed above. As the Board of Nursing will begin their renewals on May 1, 2023, projected application and renewal counts have been provided. The Board of Respiratory Care and Home Health Aides will not renew their licenses until fiscal year 2024, so only applications received in fiscal year 2023 have been noted.

Division of Consumer Affairs: Professional Boards

29. The FY 2024 Governor's Budget language recommends an authorization up to $8.5 million and the FY 2023 budget language authorizes the appropriation of up to $38.5 million in unexpended balances of the State professional boards, advisory boards, and committees located in the Department of Law and Public Safety which are not otherwise required to be expended for the purposes of such professional boards, advisory boards, and committees to pay for the costs and expenses of the various divisions within the Department of Law and Public Safety. The boards and committees oversee and regulate more than 750,000 individuals and businesses in New Jersey.

Since FY 2015, the following professional boards have experienced transfers of $194.5 million in revenues, or an average of $24.3 million per year.

Discussion Points (Cont'd)

Account	Division of Consumer Affairs Board Name	Total Amount Anticipated to be Transferred From FY2015 to FY 2023
1320	Board of Accountancy	$ 1,475,000
1321	Board of Architects	$ 3,350,000
1341	Audiology and Speech Pathology Advisory Committee	$ 4,500,000

1329	Board of Veterinary Medicine	$ 1,500,000
1342	Real Estate Appraisers Board	$ 4,450,000
		$ 194,500,000

*Information provided in June 2022 by the New Jersey Department of Law and Public Safety.

- ***Question:*** **Please provide the justification for not lowering professional board licensee fees if the fees are not needed by certain professional boards.**

License fees support the administration of the Division of Consumer Affairs (DCA) and the ability to support the functioning of the professional boards. Funding is used to fill vacancies, maintain information technology infrastructure, and develop new electronic applications to improve efficiencies. In addition, recent laws, including the newly mandated National Practitioner Data

Discussion Points (Cont'd)

Bank (NPDB) continuous query requirements impose a significant cost to the division. For example, the NPDB is projected to cost $9.5 million per renewal cycle for all healthcare related boards. In addition, the Division is expected to fill approximately 30 staff vacancies in the professional boards in order to help facilitate application processing and complaint handling.

DCA has implemented a number of changes to improve customer service related to licensed entities. For example, DCA has enacted online applications for 49 boards/commissions, with the final group of seven entities set for electronic applications in the near future. DCA has enabled 99% of all licenses and certifications to be renewed online.

In 2022, the Professional Boards issued a total of 74,830 licenses, which reflects an increase of over 14% from 2021 when 65,500 licenses were issued. In addition, 277,316 licenses were renewed in 2022.

- ***Question:*** **Please provide the Department of Law and Public Safety's expenditures for technological enhancements, staff training, and enforcement for the Division of Consumer Affairs State professional boards, advisory boards, and committees to ensure the highest level of customer service for New Jersey's respective licensees since 2015. Please provide the amount of funds transferred from the boards since 2015 and the specific amount transferred from each board.**

The Professional Board technological enhancements from FY2015 to FY2022 were $4.94 million, which includes license hosting and maintenance of software. SharePoint expenses and maintenance costs shared by the Boards starting in FY 2019 to present are $14,138,470. In addition to in-house training opportunities made available to Professional Board staff, external training expenditures from FY 2015 through FY 2022 totaled approximately $14,000.

The Professional Board 2015 to 2022 expenses for Enforcement per year:

2015 - $5,446,081
2016 - $5,362,039
2017 - $5,238,512
2018 - $5,238,512
2019 - $5,067,482
2020 - $5,364,240
2021 - $5,181,324
2022 - $5,802,169

Below is year by year State assessment chart for all Professional Boards since the assessments began in FY 2015.

Due to the newly mandated National Practitioner Data Bank and the associated costs for the healthcare related boards, the boards project to provide a projected $30 million of the requested assessment. Any associated shortfall will be assessed through the revenues and settlements through other funding sources.

Discussion Points (Cont'd)

Regarding recent enhancements, please see the blow chart.

Initiative	Cost	Description
Online applications for remaining paper-based business licenses	$1,000,000	Implement P.L. 2017, c.298, which mandated each of DCA's professional and occupational licensing boards to provide online licensure.
Spanish language online applications	$1,000,000	Make available Spanish language application for all DCA Boards.
Demographic data collection	$300,000	Increase data collection on demographics to bolster enforcement on discrimination complaints to discover trends.
Record scanning/archiving	$600,000	Transition older paper-based records for increased efficiency.
Online appointment scheduler	$200,000	Online scheduling for consumer and licensees who need in-person visits to DCA offices.
National Practitioner Data Bank/Criminal History Lookup Implementation – Initial Renewal Cycle	$1,470,000	Implement/comply with P.L.2021, c.335, which requires health care professional licensing boards to utilize the National Practitioner Data Bank.
Total costs	**$4,570,000**

Discussion Points (Cont'd)

Department of Law and Public Safety: Division of Violence Intervention and Victim Assistance

30. In September of 2022, at the direction of the Attorney General (Administrative Executive Directive No. 2022-10) the Department of Law and Public Safety was tasked to create the Division of Violence Intervention and Victim Assistance. Directive 2022-10 states that the Administration has taken a different approach to violence, which has led to an unprecedented increase in funding for anti-violence initiatives and for victims." The vision for the new division is to build on the policy of taking a public health approach to public safety. This approach focuses on promoting strategies that contain violence and reduce risk factors associated with the cycle of repeat violence and victimization.

The division's mission is to be the lead entity in developing a community-based approach to public safety and support the department's efforts in reducing violence across the State. So far, the department has expended resources on programs designed to reduce violence and provide interventions for victims such as the Hospital Violence Intervention Program, the Community-Based Violence Intervention Program, Trauma Recovery Centers, and Youth Justice Hubs.

In addition, as part of this effort, the department has introduced a new policy initiative, the Alternative Response to Reduce Instances of Violence & Escalation Program, known as the ARRIVE Together Program, which pairs a New Jersey State Trooper or municipal law enforcement officer, trained in crisis intervention and de-escalation techniques, with a mental health professional, to respond to 911 calls involving individuals experiencing a mental health crisis.

To that end, the FY 2024 Governor's Budget recommends an increase to the ARRIVE Together Program of $8 million. Finally, to further the objective, the department reorganized and moved the Victims of Crime Compensation Office, formerly the Victims of Crime Compensation Agency, into the newly created Division of Violence Intervention and Victim Assistance. The FY 2024 Governor's Budget recommends $1 million for the establishment of the Division of Violence Intervention and Victim Assistance.

- ***Question:*** **What "increase in unprecedented funding" has been provided to initiate the new policy approach to break the victim to violence, violence to victim cycle, and since when? Please discuss and describe how this has rolled-out overtime. What successes have been achieved and lessons learned that have led to this point in reaching the overall policy objective? What work still needs to be done and what level of funding will it require? How will the physical reorganization of the division, offices, and programs provide better administration, operation, and oversight of the overall effort and lead to the attainment of the end goal of reducing violence and victimization? How was the recommended appropriation of $1 million determined as the amount necessary to fund the new division and will that level of funding be sufficient for the program to meet its objectives? What other sources of funding are or will be available to help the program meet its objectives?**

Over the last several years, the Murphy Administration has committed an unprecedented $50 million in state and federal funds to the Department of Law and Public Safety's first ever violence intervention programming for Hospital-Based Violence Intervention Program (HVIP) providers and to Community-based Violence Intervention (CBVI) providers.

Discussion Points (Cont'd)

The recent awards announced in January 2023 of $10 million in HVIP funding extended funding from the original nine HVIP sites to an additional two, including an expansion to Cumberland County, which had previously not had a program of this type.

These programs, paired with the Department's $6 million investment in Trauma Recovery Centers throughout the State, support its public health approach to community safety by expanding strategies to both prevent and interrupt violence *and* trauma-informed strategies that help individuals and communities heal in the aftermath of victimization and violence.

The Department has strengthened these investments with the creation of the Division of Violence Intervention and Victim Assistance (VIVA), established in September 2022 by Attorney General Administrative Executive Directive No. 2022-10. VIVA supports the Department of Law and Public Safety's efforts in reducing violence across the state and providing services to victims and survivors of crime and violence. VIVA's mission is it to prevent future violence by better addressing the needs of survivors in the aftermath of crime and trauma, and by providing smarter and trauma-informed interventions to those more likely to commit violent acts. VIVA strengthens trust between law enforcement and organizations that take a restorative and healing approach in the communities most impacted by violence. Taken together these investments have laid the foundation of the State's support of a community-based system of public safety.

VIVA is comprised of four offices, the Victims of Crime Compensation Office, and three new offices: The Office of Violence Intervention and Prevention, the Office of Trial and Criminal Justice Processes, and the Office of Victim Support and Assistance. VIVA has been steadily building the Division since its creation in September.

Victims of Crime Compensation Office (VCCO), established by the Criminal Injury Compensation Act of 1971, assists certain individuals whose lives have been tragically altered as a result of victimization from violent crimes by providing compensation for some expenses they suffer as a result of the crime. In carrying out its mission, the VCCO is mindful of the special needs of those victimized by crime and their right to be treated with fairness, compassion and respect.

Office of Violence Intervention and Prevention (OVIP) leads DLPS's violence intervention and prevention efforts by: providing funding to community- and hospital-based violence intervention and prevention programs, and other innovative strategies; developing and recommending new community-based initiatives that will reduce violence; identifying best practices and evidence-based interventions; and coordinating and building partnerships with law enforcement in an effort to transform public safety. Through the provision of technical assistance to community-based violence intervention organizations and local and county entities, OVIP supports the groups providing critical services on the ground, and works across the State to build up a system of community-based public safety in the communities that are most impacted by violence.

Office of Trial and Criminal Justice Process (OTCJP) coordinates and sets policy for crime victims as they navigate the criminal justice process in order to enhance access to services, and to support the treatment of crime victims and survivors in a more trauma-informed and restorative manner.

Discussion Points (Cont'd)

Office of Victim Support and Assistance (OVSA) oversees the Department's victim-related services, making victim assistance a key strategy for a public health approach to public safety. OVSA leads in the creation and implementation of victim-centered policy and training, leading coordination across the Department. It is also is the programmatic hub of the Department's VOCA funding.

With the creation of VIVA, the Department has put community-based interventions and victim assistance at the center of its approach alongside traditional policing and prosecution—elevating victim-related and violence reduction efforts to a division-level lead, on par with the Division of Criminal Justice and the State Police. In working alongside traditional law enforcement, VIVA can help transform how law enforcement partners pursue public safety. This approach reinforces the Department's commitment to not just holding accountable those who have caused harm, but also in ensuring those who have been harmed are supported by a survivor-centered, trauma-informed approach.

On the victim services side of VIVA's work, survivors of domestic violence, sexual violence, and human trafficking have long shared reluctance to engage in the criminal justice system. The reasons for this reluctance include fear of not being believed, fear of being retraumatized, and fear of their offender not being held accountable. VIVA's mission is to listen to those who have been harmed, taking their feedback and identifying strategies to help the whole public safety system better support and uplift victims of violent crime.

On the violence intervention and prevention side, by building linkages and partnerships between law enforcement and VIVA staff and our funded providers, the Department can work together to advance strategies that recognize the humanity of victims, informing colleagues in law enforcement of the way in which trauma rewires brains, and the healing and empowering role we can, and should, play as public servants.

The $1M appropriation in the Governor's Recommended Budget is to fund salary expenses of seven additional positions within VIVA as well non-salary startup costs. We look forward to working with the Governor's Office and Legislature to fund VIVA's operations. In addition, VIVA will seek opportunities to expand its work by pursing Federal funding opportunities. This funding will support VIVA in helping develop community-based solutions across the State, supporting organizations in their delivery of services, serving as a hub of innovative policy, and in identifying needs and driving solutions that will reduce violence and improve communities' and individuals' ability to heal in the aftermath of crime and violence. Moreover, it will assist VIVA in supporting communities to bring their solutions forward, and empower them to lead.

- ***Question:*** **Please elaborate on how the program will meet its objectives of 1) providing victim aid; 2) investing money where it is needed most; 3) better equipping grass-root organizations and community solutions; and 4) supporting crime victims and trauma survivors? Does the department have evidence-based data that indicates whether a difference is being made in reducing State-wide violence?**

In the current fiscal year, the Victims of Crime Compensation Office anticipates awarding approximately $19 million in compensation awards to eligible crime victims. Of that amount, approximately 59% will be used to assist domestic violence victims with legal fees in order to obtain

Discussion Points (Cont'd)

protective orders, child custody and support issues, and other related matters; provide relocation assistance necessary to keep such victims safe; and award loss of support where the offender is no longer in the household, has ceased making support payments or is incarcerated due to the crime.

Through statutory reforms championed by the Murphy Administration and accompanying VCCO regulations, VCCO has reduced the barriers for victims in receiving assistance-especially victims from historically marginalized and underserved communities by no longer precluding victims with non-indictable warrants or active criminal charges from receiving support. It has also broadened the compelling health or safety reasons for which a victim may not cooperate with law enforcement--including traumatic stress, fear of retribution, fear of law enforcement, or a mental health crisis—increasing access to compensation. The culmination of these changes has resulted in greater parity in the processing of cases when determining claim eligibility. Ineligible claims are now mostly attributable to non-compensable crimes or outside jurisdiction issues.

The VCCO's online applications filed by the public and victim advocates have increased to 71%. With this increase, VCCO has improved application accessibility by enhancing online capabilities and offering phone assistance for the processing of applications.

In 2022, VCCO created a Victim Services Unit designed to connect victims with services, information and assistance. The Unit provides individuals with personal assistance to file a claim with VCCO, access to emergency food, clothing, and employment opportunities, as well as referrals to other social service agencies and agencies that provide legal advice and representation.

In addition, the Office created multiple service directories including a list of therapists who provide mental health counseling services in various languages, county domestic violence programs, non-profit legal services, grief and support groups for survivors of homicide as well as a hotel directory for relocation assistance.

In addition to the support offered directly to individuals through VCCO, VIVA's Office of Victim Support and Assistance (OVSA) will become the programmatic support for programs supported by Federal Victims of Crime Act (VOCA) and Violence Against Women Act (VAWA). This support comes through grants awarded to an array of social service organizations throughout the State, which provide direct services to victims and their families.

OVSA will also serve as the resource and referral arm of the Division, responding to constituent outreach, connecting with Division of Criminal Justice colleagues who support victims of crime, and creating/supporting multidisciplinary teams working at the intersections of victimization, trauma, pursuit of justice, and healing.

The Department's partnership with HVIP and CBVI programs reflects a strategic investment where funding is most needed, equipping community-based organizations to lead in the interruption of cycles of violence. The 13 counties that CBVI and HVIP programs operate encompass many of the communities that are most severely impacted by gun violence. CBVI and HVIP funding enable these organizations to hire critical staff, including credible messengers, violence interventionists, social workers and case managers, health navigators and community health workers, and to build their capacity through organizational and systems development. Additionally, funding for both

Discussion Points (Cont'd)

programs support aid to victims and high-risk participants. This aid helps individuals remove barriers to stability and opportunity often at critical junctures of vulnerability. The complement of strategic investments in staff and support for victims and participants are critical to interrupting cycles of violence.

The nascent work of violence intervention and VIVA's recent creation make it difficult to point to any hard data involving violence reduction. But recent data shows suggests that in 2022, gun violence victimization dropped by 25% over the year prior. This reduction may reflect a multipronged approach to address community safety – implementing stronger gun policies and expanding New Jersey's investment in community violence prevention and intervention programs.

Department of Law and Public Safety: Trenton Real Time Crime Center

31. In 2020, $4.5 million in State funds were spent to establish a Real Time Crime Center in Trenton, as a partnership containing the Division of State Police and the Trenton Police Department. The purpose was to create an intelligence hub for the coordinated efforts of State and local law enforcement to fight violent crime. Among the features to be included were technology that would improve gunfire detection, provide an increase in city surveillance, and allow better intelligence sharing between police units.

- ***Question:*** **Please discuss how the Real Time Center is collaborating with the State Police, local law enforcement, and other law enforcement agencies to address violent crime. What effect is this partnership having on deterring crime and is the department able to measure this effect on crime in Trenton since the program's inception?**

The mission of the Real Time Crime Center Central (RTCC – Central) is to develop a network with partner agencies, creating an information and intelligence capability that can gather, receive, analyze, and distribute real time tactical intelligence to support law enforcement practitioners operating within the City of Trenton and the surrounding region.

The RTCC-Central relies on the strength of partnerships, seeking to leverage the resources and collective expertise of the Trenton Police Department, Mercer County Prosecutor's Office, New Jersey State Police, and other law enforcement agencies in the Trenton / Mercer County region. The RTCC-Central utilizes this network of partner agencies to create an information and intelligence capability to collect, analyze, and disseminate tactical intelligence, while respecting the privacy interests of the citizens of the State.

The Real Time Crime Center began operations in April of 2021 and experienced the following effects on crime as a result of this collaboration. Although specific correlations may be difficult to draw, since that time there has been a profound reduction in violent crime in the City of Trenton and the surrounding area.

- **13%** reduction in Shooting Hit victims comparing 2021 to 2020.
- **3%** reduction in Shooting Murder victims comparing 2021 to 2020.

Discussion Points (Cont'd)

- **10**% reduction in total Shooting victims comparing 2021 to 2020.

The Real Time Crime Center maintains the lead role in the Gun Violence Reduction Task Force. (GVRTF) In October 2021, the Attorney General issued a directive establishing the Gun Violence Reduction Task Force to bridge the gap between law enforcement officers and county prosecutors and target those individuals that are most responsible for the violence in their communities. The goal of the GVRTF referral process is to build a statewide infrastructure for improved information sharing and provide county prosecutors with necessary information at bail hearings to keep violent, recidivist offenders incarcerated and out of these communities. As a result of this initiative and several other collaborations through the Real Time Crime Center, Trenton experienced the following reductions in violent crime:

- **50**% reduction in Shooting Murder victims comparing 2022 to 2021.
- **4** % reduction in Shooting Hit victims comparing 2022 to 2021.
- **16** % reduction in total shooting victims comparing 2022 to 2021.
- **47** % reduction in Shooting Murder incidents comparing 2022 to 2021.

Using various technological platforms, The Real Time Crime Center also plays an intricate role in assisting our law enforcement officers operating in the area remove firearms from the city of Trenton. Prior to the opening of the Real Time Crime Center, there were 283-gun recoveries in the city of Trenton in 2020. There were 354-gun recoveries (**25% increase**) in the city of Trenton in 2022.

Internet Crimes against Children

32. In response to the increasing number of children and teenagers using the Internet, the proliferation of child sexual abuse images available electronically, and heightened online activity by predators seeking unsupervised contact with potential underage victims, the federal Internet Crimes against Children Task Force Program was established.

The New Jersey Internet Crimes against Children Unit, in the Division of State Police, is responsible for conducting investigations of offenders that utilize computers and computer technology for the purpose of exploiting children.

According to the NJ Coalition Against Human Trafficking, at the start of the Covid-19 pandemic, as children in New Jersey stayed home and spent more time on devices, online exploitation by predators increased by over 200 percent.

In November of 2022, the United State Department of Justice announced grant awards totaling nearly $105 million to protect children from exploitation, trauma and abuse, and to fund improvements in the judicial system's ability to handle child abuse and neglect cases. To that end, the Justice Department's Office of Justice Program will award $31.2 million under the Internet Crimes against Children Task Force Program to conduct forensic examinations and to investigate and prosecute technology-facilitated child sexual exploitation throughout the United States

Discussion Points (Cont'd)

- ***Question:*** **To what extent does State law enforcement work with federal and local law enforcement to apprehend perpetrators of Internet crimes against children?**

The New Jersey Internet Crimes Against Children Task Force (NJ-ICAC-TF), coordinated and managed by the Internet Crimes Against Children Unit (ICACU) of the New Jersey State Police (NJSP), is a dedicated team of approximately 180 law enforcement professionals, from 75 separate affiliated law enforcement agencies, who work with parents, teachers and other professionals to protect children in the State of New Jersey from the ever-increasing dangers of the internet. The NJ-ICAC-TF affiliates consist of local, county, state law enforcement agencies, as well as Federal law enforcement government agencies like the U.S. Department of Homeland Security-Homeland Security Investigations and the United States Secret Service. The specific mission of the NJ-ICAC-TF is to increase the capacity of the New Jersey law enforcement community to effectively combat internet crimes against children within the Task Force service area and to continue the cooperative efforts nationwide with other established state and regional ICAC Task Forces. (https://www.icactaskforce.org/)

What are some of the challenges in finding and apprehending these Internet criminals?

Predators are becoming more devious and aware of the presence of law enforcement when it comes to the exploitation of children. The increasing number of mobile platforms, reliance on technology for both predators and children has created an environment where predators target children almost exclusively using technology. While old tactics, such as exploitation via webcams, cell phones, and digital photography continue to be used to lure children, new platforms such as social networking sites, Peer to Peer (P2P) file sharing, Internet cloud services, and The Tor Network are now also being utilized to target children. In the past three years, rapidly developing technology continues to offer challenges to law enforcement. As the number of children using the Internet continues to grow, predators of children have even greater opportunities to use the Internet as a tool to exploit them. New applications are created every day that are used both by predators and children, making it difficult for law enforcement to keep up. Covid-19, along with the associated pandemic, has exponentially increased screen time, smartphone usage, and the associated predators that target children. This trend has continued even after the pandemic has subsided.

How has the funding for this unit changed since 2019 and by how much has the program grown in terms of funding, workload, and staffing?

The operation of the NJ-ICAC-TF is funded annually by the Internet Crimes Against Children Federal Grant Program. In addition, thanks to the support of the Administration, the FY2022 budget permitted NJSP to use State Match funds to strengthen and expand the ICAC program. To date, NJSP has expended $320,000 in these efforts. The federal grant awards primarily fund training/presentations, equipment, overtime and investigative operations for Task Force members. The grant does not fund primary detective salaries or police vehicles, which are covered by member agencies. The NJ-ICAC-TF has received the following funding awards for the past three fiscal years:

- Federal Fiscal Year 2020: $530,000
- Federal Fiscal Year 2021: $547,000

Discussion Points (Cont'd)

- Federal Fiscal Year 2022: $600,400

With these funding sources, how successful has the program been in curtailing these crimes?

There has been a gradual escalation of grant funding awards as the workload of the Task Force has increased, attributed to the COVID-19 Pandemic and other factors listed above. The two primary metrics used to gauge the impact of the NJ-ICAC-TF are the number of National Center for Missing and Exploited Children (NCMEC) Cybertips received and investigated, as well as the number of criminal arrests by the NJ-ICAC-TF. The following are the measurable totals for the past three calendar years.

- 2020 NCMEC Cybertips: 7218 / 2020 NJ-ICAC-TF Arrests: 226
- 2021 NCMEC Cybertips: 8750 / 2021 NJ-ICAC-TF Arrests: 239
- 2022 NCMEC Cybertips: 13,800 / 2022 NJ-ICAC-TF Arrests: 232

The staffing of the NJ-ICAC-TF has also continued to incrementally increase as new affiliated agencies are recruited and added to the Task Force via MOU (Memorandums of Understanding). For FFY2020, there were 71 affiliated law enforcement agencies assigned to the Task Force. For the current year-to-date, the NJ-ICAC-TF has increased to 75 affiliated law enforcement agencies with coverage in all 21 counties in the State of New Jersey.

Additionally, the New Jersey State Police continues to stand behind the NJ-ICAC-TF by increasing the staffing of the Internet Crimes Against Children Unit (ICACU), from seven (7) enlisted personnel and one civilian in FY2020 to ten (10) enlisted personnel and five (5) civilians for FY2023. The additional civilians assigned to the unit between FY2020 and FY2023 have also maximized the unit's productivity by providing digital forensic support. ICACU's forensic analysts are being used to conduct forensic previews on scene and in the office. This affords Detectives the ability to put more of their focus on investigations and prevents Detectives from having to submit phones to the Regional Computer Forensics Lab (RCFL) for processing. When ICACU's forensic analysts complete all of their certification training, they will be able to conduct full forensic exams of computers and mobile devices, which will again help to curtail backlog at the RCFL. Finally, in the area of community outreach, the NJ-ICAC-TF continues to maintain its high-level commitment to educate not only parents and children, but prosecutors, law enforcement officials, and anyone who is charged with the protection of children in the State of New Jersey. The NJ-ICAC-TF's Internet Safety presentation program for parents and children is the gold standard for community outreach and prevention of child exploitation through training and awareness. The ICAC Unit's Internet Safety Presentations totals for the past three years are as follows: 36 for FY2020, 28 in FY2021 and 82 in FY2022. The COVID-19 Pandemic slowed down the Internet Safety Presentation Program, however, as a result of increased staffing and the Pandemic subsiding, the program's numbers have gradually begun to return to pre-pandemic levels.

The NJ-ICAC-TF has been very successful in investigating and bringing to justice predators who engage in child exploitation via the internet or other technological means in the State of New Jersey. However, it is difficult to measure the specific impact of the NJ-ICAC-TF since
there is no way to specifically measure anecdotally or objectively how many people are involved in child exploitation and similar criminal activity. New Jersey is the most densely populated state in the country, with a population of 9.2 million people. In 2021, the NJ-ICAC-TF received 8750

Discussion Points (Cont'd)

CyberTips from the National Center for Missing and Exploited Children. In 2022, the NJ-ICAC-TF received 13,800 CyberTips from the National Center for Missing and Exploited Children. These CyberTip complaints, who the NJ-ICAC-TF is mandated by the ICAC Task Force Program to investigate, were received in cases of child exploitation using the Internet or other technology. Overall, these tips have resulted in a substantial number of arrests. In 2021, the NJ ICAC Task Force arrested 239 individuals for the exploitation of children. In 2022, the NJ ICAC Task Force arrested 232 individuals for the exploitation of children. Investigations, arrests, and Cybertips have increased every year to almost epidemic numbers. These numbers have steadily increased as more individuals utilize technology such as smart devices, the "Dark Web"/TOR Network and anonymization of Internet communications to exploit and victimize children through cyberbullying, sextortion, child trafficking, and child sexual abuse material (CSAM). As these crimes continue to increase, the staffing and resources available to the 61 regional ICAC Task Forces, including the NJ-ICAC-TF, to combat this exponential growth in child exploitation remain at levels needed to battle this epidemic.

Has the State been able to access federal funding to supplement its efforts and does the State anticipate applying for grant funding under the newly announced $105 million program to protect children from exploitation, trauma, and abuse?

The State of New Jersey has greatly benefited from the ICAC Task Force Grant Program, which has been in existence since 1998, and the resulting creation of the NJ-ICAC-TF. The activities of the NJ-ICAC-TF is funded annually by the Internet Crimes Against Children Federal Grant Program run by The Department of Justice's Office of Justice Programs (OJP), Office of Juvenile Justice Delinquency Prevention (OJJDP). The grant awards primarily fund training/presentations, equipment, overtime and investigative operations for Task Force members. The grant does not fund primary detective salaries or vehicles, which are covered by member agencies. The NJ-ICAC-TF has received the following funding awards for the past three fiscal years:

- Federal Fiscal Year 2020: $530,000.00
- Federal Fiscal Year 2021: $547,000.00
- Federal Fiscal Year 2022: $600,400.00

In regard to the $105 million program announced to protect children from exploitation, trauma, and abuse, part of $105 million will go directly to fund the ICAC Task Force Program, which the NJ-ICAC-TF already participates in and receives funding to support the NJ-ICAC-TF. Noted from the November 1, 2022 announcement, "OJJDP will award $31.2 million under the Internet Crimes Against Children Task Force Program to conduct forensic examinations and to investigate and prosecute technology-facilitated child sexual exploitation throughout the United States. An additional $3.6 million under the Internet Crimes Against Children Task Force National Training Program will support training to Internet Crimes Against Children task forces and affiliated federal, state and local law enforcement and prosecutorial agencies in the areas of investigation, forensics, prosecution, community outreach, officer wellness and capacity building. Additionally, $3 million under the Strengthening ICAC Technological Investigative Capacity Program will help increase the technological investigative capacity and associated training of law enforcement, prosecutors and other professionals nationwide to combat child sexual abuse material and online child sexual exploitation, including cases of child sex trafficking." Discussion Points (Cont'd)

- ***Question:*** **What are the online sites, including social media, that attract those at risk, and to which parents should be cautious of permitting their children's access in hopes of decreasing the reach of online predators?**

It is important to note that the Child Online Privacy Protection Act (COPPA) states children under 13 years old should not have any access to social media apps, sites, etc., so parents should adhere to the Act's suggestion as that would significantly decrease the number of children under 13 years old falling prey to online predators.

Parents are advised to be mindful of their children's activity on popular social media sites like Instagram, Snapchat, Discord, Kik, Yubo, TikTok, and WhatsApp.

Other sites to be aware of include Omegle.com, which is a free video chat site that doesn't require an account (or any other identifiable information) and pairs random users identified as "You" and "Stranger" To communicate via text, video or both in moderated or unmoderated chats. As

In addition, parents should also monitor their children's online gaming activity, including on popular gaming websites such as Roblox, Minecraft, Apex Legends, Call of Duty (COD) and Player Unknown's Battleground (PUBG).

The New Jersey Internet Crimes against Children Unit is available to provide internet safety lectures for more detailed information on the above. https://nj.gov/njsp/division/investigations/internet-crimes-against-children.shtml#request

Human Trafficking

33. The FBI reported in August of 2022 that more than 200 human trafficking victims and missing people, 121 of which were children, were found by law enforcement in a nationwide operation called "Operation Cross Country. Officials said the average age of the children was 15-years of age, and the youngest victim was age 11. Of all human trafficking criminal cases filed last year, 92 percent were for the purposes of sex trafficking.

In 2020, there were 146 reported cases to the National Human Trafficking Hotline in New Jersey. Of these cases, 120 were attributed to sex trafficking, 18 cases were attributed to labor trafficking, and in eight cases the type of trafficking was not specified.

The FBI has indicated that New Jersey is considered to be a "hub" for this type of activity partly due to the State's proximity to several major metropolitan areas including New York, Baltimore, and Philadelphia.

In July of 2022, the Division of State Police reported that eight individuals were arrested, foiling a human trafficking ring that forced victims into prostitution after being smuggled into the United States with the promise of legal jobs.

Discussion Points (Cont'd)

In October of 2022, the United States Department of Justice's Office of Justice Programs announced over $90 million in funding to empower communities to respond to human trafficking and offer essential services to survivors of human trafficking.

- ***Question:*** **How does the State partner with federal, local, and other law enforcement agencies to find and apprehend human traffickers? How has this program expanded in response to the growth in human trafficking in terms of funding, workload, and staffing? Are law enforcement efforts making any headway, or is the problem growing faster than existing resources can handle? What are the most significant challenges to fighting human trafficking and what barriers does law enforcement encounter when trying to do its job? Please elaborate on the success, if any, of prosecutions of individuals arrested for human trafficking.**

  State, federal, and local law enforcement are all actively investigating and responding to human trafficking cases. Law enforcement agencies share intelligence by deconflicting investigation targets, jointly working operations, and attending interdepartmental trainings together. Additionally, the Division of Criminal Justice has continued to partner with state, federal, and local agencies on outreach efforts to combat and prevent human trafficking. This issue is a top priority for Attorney General Platkin, and he announced a new unit within DCJ to focus exclusively on investigating and prosecuting human trafficking crimes in New Jersey. The unit is led by Deputy Director and Assistant Attorney General Theresa Hilton, whom AG Platkin brought in to the office last September to oversee sexual and domestic violence prevention policy and criminal enforcement work. In addition, on January 26, 2023, the Division held its annual human trafficking event that focused on "Human Trafficking and Persons with Disabilities." Numerous Federal, State, and local law enforcement partners were invited to participate in the event as both attendees and exhibitors, to facilitate networking and bring awareness to the resources and services they can provide. The event had over 200 registered attendees. Additionally, throughout the year, the Division's Human Trafficking Program (HT Program) conducts virtual and in-person trainings on the identification and investigation of human trafficking. The HT Program regularly conducts trainings at state and local police academies, and in October of 2022, conducted an advanced training on Strategies for Prosecutors. Additionally, in January of 2023, the HT Program conducted a training for 200 employees of New Jersey Transit, and conducted a Train the Trainer for New Jersey Transit police in March 2023.

  Determining how much human trafficking has increased is difficult because reliable and comprehensive data on the extent of human trafficking in New Jersey does not exist. Victims of human trafficking often do not report their victimization for a variety of reasons, including fear of the criminal justice system, fear of deportation, shame, and trauma-bonding to an abuser. As a result, many human trafficking victims may never be identified. The two biggest barriers in combatting human trafficking in this State are quantifying the problem and identifying the victims.

  The Division of Criminal Justice currently has 11 open human trafficking cases, including 25 defendants, and four active investigations. AG Platkin's new HT Unit consists of experienced detective staff to proactively investigate these crimes, and the Division is onboarding

Discussion Points (Cont'd)

experienced attorneys to prosecute cases investigated by Division detectives, the New Jersey State Police, and local law enforcement.

To better address the problems of quantifying and identifying human trafficking, the Division of Criminal Justice is applying for a grant to fund the creation of a data-collection portal where law enforcement will report cases and victims of human trafficking to document the extent of human trafficking in New Jersey. With grant funding, the Division would seek to pilot a program in select communities where law enforcement officers in contact with juveniles would be taught, and then implement, a short screening tool so that minors and youths at risk of human trafficking can be referred to a human trafficking victim-services provider for a more thorough screening and the provision of necessary services. The goal of the screening tool is to help law enforcement identify victims of human trafficking who may otherwise not be known to law enforcement.

Two significant cases that were indicted by the Division of Criminal Justice this year were the matters of State v. Ogawa, et al., and State v. Macolas-Aguirre, et al.

On October 27, 2021, the New Jersey State Police Missing Persons and Human Trafficking Unit opened an investigation into a missing juvenile, identified as A.H. Although A.H. returned home safely on October 28, 2021, NJSP learned that A.H. had been a victim of human trafficking. In February of 2022, Marquise Ogawa, Jazmin Scott, and Chyaire Lee, were indicted on multiple counts of first-degree conspiracy to commit human trafficking, first-degree human trafficking, second-degree facilitating human trafficking, first-degree promoting prostitution of a child, and third-degree endangering the welfare of a child (sexual conduct). Lee pled guilty to conspiracy to facilitate human trafficking in exchange for five years in New Jersey State Prison. The remaining defendants are pending trial.

Additionally, the Division of Criminal Justice led an investigation that resulted in a 20-count indictment, which included charges for first-degree racketeering and first-degree human trafficking, in August of 2022 regarding a sex trafficking operation in Trenton.

Juvenile Justice Commission: Facilities

34. In 2018, it was announced that the State would be closing two of its three youth prisons: the New Jersey Training School for Boys in Monroe, also known as Jamesburg, and the Female Secure Care and Intake Facility in Bordentown, also known as Hayes.

In May of 2022, the media reported that The Task Force for the Continued Transformation of Youth Justice in New Jersey issued a report recommending that the State build three new smaller youth prisons to replace three older, existing facilities, including Jamesburg and Hayes, which were previously identified for closure in 2018. The three existing facilities can house 370 juveniles, but as of May 2022 there were only 102 youths living in the facilities. The media reported that the State spends approximately $608,095, per incarcerated youth annually, or $1,666 per day.

In 2018, the Economic Development Authority issued $160.3 million in State Lease Revenue Bonds to finance the Juvenile Justice Commission Facilities Project with the intention of building two new

Discussion Points (Cont'd)

facilities. The bonds maturing on or after June 15, 2028 are subject to optional redemption. Total annual debt service on the bonds is approximately $24.5 million.

- ***Question:*** **Has any decision been made regarding the construction of the juvenile facilities?**

The JJC anticipates beginning construction on the south and central sites in CY 2024. In late 2022, the Department of Treasury (Treasury), on behalf of the JJC, issued Requests for Proposals (RFPs) for both a design consultant firm and a construction manager firm for this project.

The design consultant RFP process is complete. In January 2023, JJC awarded the contract to USA Architects, in collaboration with CGL Companies and DLR Group Architecture & Engineering. On March 16, 2023, the JJC received a Notice to Proceed (NTP) for design of the two new buildings. That NTP has a start date of March 29, 2023. The design consultant firm has approximately nine months from that date to complete the design work.

The construction management RFP process is close to completion. The JJC anticipates that an NTP will be issued in the coming weeks. Once selected, the construction management firm will work closely with the design consultant firm during the 9-month design period. Construction is expected to begin soon thereafter.

As to the northern site, the JJC continues to work with Treasury to identify a suitable property. Once identified, the JJC has the option to add the northern site to the awards for the design consultant and construction firm, per the terms of the RFPs.

What are the trade-offs between building three new facilities and investing in community-based programs?

The bond funding for the new facilities cannot be repurposed for community-based programs. That said, building three new facilities will not require the JJC to compromise its goal of investing in community-based programs. These two goals are not mutually exclusive; both are critical to the ongoing reform of the youth justice system in New Jersey.

The Juvenile Detention Alternatives Initiative (JDAI) has served as the springboard for that ongoing youth justice reform and has resulted in a remarkable and sustained decrease in reliance on both pre-trial detention and incarceration as a disposition for New Jersey's youth. However, while far fewer youth are committed to JJC as a result of the extraordinary work of JDAI, the young people in the JJC population are now older; have committed more serious community harm and therefore face longer terms of commitment, including youth convicted and sentenced as adults; are more heavily gang involved; and are more often dealing with complex service needs, including complex trauma. The JJC sincerely believes most youth can and should be served at home through community-based programs. However, recognizing that there remains a need for secure placement for a small number of young people who have committed very serious and repetitive harm, the JJC also believes that when placement in a youth justice facility is necessary as a matter of community safety, those facilities must promote relationships, healing, rehabilitation, and opportunity for youth. Replacing existing large, antiquated, expensive, secure institutions with smaller, state-of-the-art, therapeutic regional facilities that are in close proximity to the residents'

Discussion Points (Cont'd)

homes is paramount to achieving that goal, and maximizes opportunities for family and community participation in the rehabilitative process.

And the Murphy Administration is simultaneously increasing funding for community-based programs, thus far by $12.6 million. Specifically, the JJC has already received a $4.2 million increase in FY 2023 State Community Partnership funding that is awarded to County Youth Services Commissions who address the needs of justice-impacted youth locally. The JJC also received an additional $8.4 million for the two-year Restorative and Transformative Justice for Youths and Communities Pilot Program that will provide enhanced community-based diversion and reentry wraparound services at "hubs" in four cities (Camden, Newark, Paterson, and Trenton). And, with the support of the Administration, the JJC will continue to recommend the reinvestment of cost-savings achieved through replacing the old facilities with smaller and more efficient facilities into community-based programs.

What are the financial consequences of not constructing the facilities using the proceeds from the 2018 bond issuance? What does a cost/benefit analysis of housing a declining number of juveniles in new verses old facilities reveal?

As part of its plan to construct the new facilities, the JJC intends to close the New Jersey Training School (NJTS) in Monroe Township and the Juvenile Female Secure Care and Intake Facility (JFSCIF@Hayes) in Bordentown. While the construction of the new facilities requires a significant upfront investment, operating these smaller, more efficient facilities on an ongoing basis is estimated to create a savings of approximately $20 million a year. These cost savings are achieved through reduced staffing levels, overtime, maintenance and energy costs, and capital improvement projects required for new, smaller, more efficient facilities. These cost savings will not be realized if the plan for closing and replacing the old facilities does not proceed.

In addition, please note that much of the costs to operate the current JJC facilities are fixed, including staffing levels that must be met for safety needs. A reduction in youth population at the facilities therefore may therefore not represent an increase in overall costs, but has the perverse effect of displaying an increase in the per capita costs for the residents who remain.

Dear Mr. Troutman:

Thank you for the opportunity to provide a reply to the follow-up reviews that took place on January 18th, 2023 and January 23rd, 2023.

The responses of the Division of Gaming Enforcement (DGE) to the non-compliance findings are as follows:

Transactional Waivers:

The initial development of the in-house transactional waiver system is expected to be completed within the next few weeks. Once the system is fully operational, we expect that transactional waivers will be tracked and updated in a timely manner.

Gambling Addiction Reports:

The demographic information that DGE provides the vendor to conduct gambling addiction reports is limited to data collected as part of the "Know Your Customer" (KYC) identify verification process. This information includes date of birth and other fields. DGE will provide all relevant KYC data to the vendor as for the purpose of completing gambling addition reports.

Please note that the gender data field is not a required KYC dataset because it is not necessary for establishing identity. All gender information is collected, however, is provided to the vendor. In

addition, some operators that do collect gender information have an option such as "choose not to respond" for players, which results in unusable data.

The DGE's responses to the observations are as follows:

Gambling Addiction Treatment Funding:

While DGE is aware of the differences in amounts of collections versus funding provided, it is outside the scope of DGE's authority to distribute funding, or direct other agencies to modify their distribution methods.

As of the date of this letter, there is no update to this observation.

Dormant Internet Accounts:

DGE has previously recommended harmonizing the statutes governing casinos and online gaming regarding dormant internet accounts to be consistent with the Unclaimed Property Act. DGE lacks authority to act without an amendment to the law.

As of the date of this letter, there is no update to this observation.

Sincerely,

David Rebuck
Assistant Attorney General

November 30, 2022

Dear Mr. Troutman:

On behalf of the Attorney General, thank you for the opportunity to provide an update as to the corrective actions taken by the Department of Law and Public Safety ("the Department") in response to the audit report ("the report"), **Department of Law and Public Safety, Division of Gaming Enforcement, which was issued on June 14, 2022.**

Our updates to the audit recommendations are as follows:

Recommendations

Backlogs:

The division needs to improve procedures to monitor and track backlogs.

Recommendation:

We recommend the division implement processes to properly address the volume of casino service industry enterprise new licensee and renewal applications, as well as the casino key employee licenses. In addition, the division should develop written procedures for monitoring, tracking and reporting of backlogs.

Response:

The audit highlighted a total of 240 casino key employee license resubmissions as of November 2020 that had not been completed within a six-month period. After the volume of initial casino key employee license applications was investigated and processed, DGE was able to redirect resources to key resubmissions and the backlog has been reduced considerably. Specifically, of the 240 cases identified above, 184 cases, or over 75%, have been completed as of May 16, 2022, leaving 56 cases in the inventory.

Update November 2022:

Regarding the Casino Licensing Bureau (CLB) Key Resubmission backlog, since the audit was issued, another 28 cases have been completed leaving only 28 in inventory. In total, as of October 12, 2022, 212 of the 240 cases identified in the audit have been completed, or almost 90%. Additionally, the Casino Licensing Bureau is finalizing updated and enhanced Key Resubmission guidelines to ensure that the bureau has clear procedures going forward.

As far as the Servicing Industry Licensing Bureau (SILB) backlog, which is responsible for investigating Casino Service Industry Enterprise (CSIE) licenses, vendors, and ancillary businesses, the division reviewed the backlog of 1,198 cases referred to in the audit report. As of this update, 118 of the 148 cases open from fiscal years 2007 through 2015, and 160 of the 269 cases identified from fiscal years 2016 through 2018 have been closed or completed. In addition, 277 of the balance of 781 cases from fiscal years 2018 through 2020 have also been closed or completed. In total, 555 of the outstanding cases identified in the audit report have been closed or completed, or 46%. DGE continues to investigate cases in order to further reduce the backlog.

Transactional Waivers:

The division needs to strengthen controls over transactional waivers.

Recommendation:

We recommend the division track transactional waivers and monitor for timeliness to ensure compliance with the administrative code. We also recommend the division review the six companies that were not in either the active vendor or backlog report and determine their status.

Response:

Transactional waivers are tracked through manual processes due to an outdated existing software tracking system, which is unable to produce reports. The Division is in the process of implementing a new software system which we expect will consolidate all of the existing antiquated systems in the Division. The new system is expected to greatly improve the tracking of transactional waivers and provide reporting capabilities. At this time, we do not have an implementation date for the new system, however, in the interim we will discuss ways to improve our current manual tracking system. In addition, we will review the companies that were on neither the active vendor nor backlog reports, to determine their status.

Update November 2022:

At this time, the expected system implementation to track transactional waivers (TWs) has not come to fruition. As a result we are developing, with IT, a tracking system that can be utilized to track TWs. It is anticipated we will have a working system in place by the end of the year.

Dormant Accounts:

The division should monitor for compliance with dormant accounts regulations.

Recommendation:

The division should monitor casinos for statutory compliance to ensure patrons were contacted prior to closing dormant accounts and the withdrawal of funds.

Response:

As a point of clarification, under N.J.S.A 5:12-95.25, casinos are required to attempt to contact an account holder by mail, phone, and electronically. The Casino Control Act places this statutory requirement on casinos and not DGE.

Should DGE receive a patron complaint on a matter pertaining to dormant accounts, the Division will assign an investigator from the Regulatory Enforcement Bureau to investigate the issue and the Division would take regulatory action if the notice requirements were violated.

Update November 2022:

The Division's Revenue Certification Unit held a conference call with representatives of the nine licensees' internal audit and financial management departments. During this call the Division reminded them of their statutory responsibility for dormant accounts. Going forward, the

Division will also require the licensees to include verification that they are in compliance with this statutory requirement prior to dormant account funds being forfeited.

Gambling Addiction Reports:

Gambling addiction reports are not completed in accordance with the statute and written agreement.

Recommendation:

We recommend the division enforce the agreement, which requires the vendor to provide annual gaming study reports timely and submit quarterly expenditure reports. In addition, the division should ensure the data received from the casinos is complete.

Response:

Prior to the beginning of the audit, DGE was aware that there were no detailed cost statements and work was underway to obtain documentation. The Division disclosed this to the audit team during field work. The Technical Services Bureau (TSB) has been working with casino partners to ensure the availability and delivery of full data to the vendor. Since the conclusion of the audit, the 2018 report has been published. The vendor is fully funded by the casino industry to perform this research. The Division will address the need to complete its studies in a more timely manner going forward.

Update November 2022:

Regarding the responsible gaming reports, the calendar year reports for both 2019 and 2020 have been published. In addition, Rutgers has been instructed that quarterly meetings will be held with the Division to ensure timely completion of upcoming reports.

Observations

Gambling Addiction Treatment Funding:

More than half of gambling addiction treatment funding was not disbursed.

Comments**:**

While DGE is aware of the differences in the funding, DGE lacks authority to correct this disparity. We thank the State Auditor for including this observation in the audit report, in hopes that there can be a positive change to the funding for addiction treatment.

As of the date of this letter, there is no update to this observation.

Dormant Internet Accounts:

The statutes governing the casinos and online gaming are not consistent with the Uniform Unclaimed Property Act

Comments**:**

DGE has previously recommended harmonizing the statutes governing casinos and online gaming regarding dormant internet accounts to be consistent with the Unclaimed Property Act. Amending the law is outside of DGE's authority.

As of the date of this letter, there is no update to this observation.

Please feel free to contact me if you have any questions.

Very truly yours,

David L. Rebuck
Assistant Attorney General
Director, Division of Gaming Enforcement
