PHILIP D. MURPHY
Governor

TAHESHA L. WAY
Lt. Governor

FRANCIS K. O'CONNOR
Acting Commissioner

May 21, 2024

Thomas Koenig
Legislative Finance and Budget Officer
Office of Legislative Services
State House Annex
P.O. Box 068
Trenton, New Jersey 08625-0068

Dear Mr. Koenig:

Please find the Department of Transportation's (NJDOT) written responses to the following questions raised by members during the Senate Budget and Appropriations Committee (Committee) hearing on April 11, 2024. On behalf of NJDOT, I thank you for your patience.

Senator Burzichelli

Question: The department received $50 million out of the Debt Defeasance and Prevention Fund for the rebuilding of the collapsed I-295 Direct Connect Wall 22. Because of financial participation by the Federal Highway Administration, only $18 million out of that appropriation was needed to reconstruct Wall 22. Could you please explain whether any actions are being taken by the State to recoup the cost of reconstructing Wall 22 from the firms involved in planning, engineering, and constructing Wall 22 that collapsed? Who is liable? Could the $18 million Debt Defeasance and Prevention Fund contribution to rebuilding the collapsed wall be reduced further as the firms involved in planning, engineering, and constructing the collapsed wall are held liable?

NJDOT Response: *There are currently no actions being taken by the State to recoup the cost of reconstructing Wall 22 because there have been no findings of liability at this time, with respect to the firms involved in planning, engineering, and constructing the Wall 22 that collapsed.*

As such, the Department is unable to speculate as to whether the $18 million Debt Defeasance and Prevention Fund contribution to rebuilding the collapsed wall could be reduced further if the firms involved in planning, engineering, and constructing the collapsed wall were held liable.

Senator Burzichelli

Question: Please provide the most recent number of in-state vs out-of-state drivers on the New Jersey Turnpike. What is the split of toll collections between in-state and out-of-state motorists?

NJDOT Response:
All of 2023

		Transaction Count	Toll Amount
NJT	Out-of-State (Away)	101,889,138	$ 756,168,043
	In-State (Home)	122,653,332	$ 761,109,560
GSP	Out-of-State (Away)	95,108,305	$ 156,519,284
	In-State (Home)	230,129,371	$ 349,924,075

1/1/2024 – 3/31/2024

		Transaction Count	Toll Amount
NJT	Out-of-State (Away)	22,864,687	$ 168,065,999
	In-State (Home)	29,336,790	$ 180,398,391
GSP	Out-of-State (Away)	20,165,057	$ 33,213,533
	In-State (Home)	53,026,448	$ 80,897,811

Provided by the New Jersey Turnpike Authority

Senator Johnson

Question: Could you please provide a status update on the major dedicated bicycle lane project at the U.S. Route 9W (Englewood Cliffs/Tenafly/Alpine)?

NJDOT Response: *The bicycle and pedestrian improvement project for Route 9W from Palisades Avenue to the NY State line is currently in the Concept Development (CD) phase. NJDOT's project management team anticipates that it will move to the next phase (Preliminary Engineering) as soon as these outstanding items are resolved:*

1. *Resolution of Palisades Interstate Park Commission right-of-way needs for road widening and for detention basin locations;*
2. *Public information center meetings; and*
3. *A Resolution of Support from Englewood Cliffs after the above two items are completed.*

Question: Please provide a status update on the Route 4/Jones Road overpass project in Englewood City.

NJDOT Response:
Rt 4. Grand Avenue Project *- the project is currently in the Final Design phase. Estimated construction award is scheduled for Spring 2026.*
Jones Road over Rt 4 Project *- the project is currently in Construction phase. Estimated construction completion is scheduled for Summer 2025.*

Senator Johnson

Question: Could you please provide an update on all transportation projects in Legislative District 37 covering the Bergen County municipalities of Bogota, Englewood, Englewood Cliffs, Fort Lee, Hackensack, Leonia, Palisades Park, Ridgefield Park, Teaneck and Tenafly?

NJDOT Response: *Attached are the individually programmed Capital Projects, Capital Program Management Projects, and Operations Projects located in Legislative District 37.*

Question: The Palisades Interstate Parkway has several miles of road. They have two gas stations, and they submit money to the TTF, but they are not allowed to get money from the TTF for repairs or maintenance. Could that be changed in some way?

NJDOT Response: *The Palisade Interstate Park Commission (PIPC) is eligible to receive Transportation Trust Fund (TTF) funding if the utilization of such funds is solely for the benefit of the State of New Jersey or for property located in the State of New Jersey. TTF funds may be used for certain maintenance of a public highway, which includes but is not limited to, parkways, bridges, tunnels, and overpasses. However, maintenance cannot be associated with the regular and/or routine maintenance of a public highway and its components.*

In the future, if the PIPC is to receive any TTF monies, it must be included in the TTF's annual capital plan and there must be an appropriation for such expenses in the annual appropriations act.

Senator O'Scanlon

Question: In your testimony, you stated that the Gateway Program would cost $16 billion with the federal government covering 73 percent ($11.7 billion) thereof and New Jersey contributing $308 million. How is the residual $4 billion financed? Who provides the residual $4 billion?

NJDOT Response:
The contribution amount for the total local support of $4.320 billion is reflected within the table below. The remaining $11.721 billion for the project will be from federal support.

Hudson Tunnel Project Funding Sources ($ millions)	
PANYNJ	$ 2,678
State of NJ	$ 308
State of New York	$ 1,335
Total Local Support	**$ 4,320**
Total Federal Support	**$ 11,721**

Rounded figures courtesy of the Gateway Development Commission.

Senator O'Scanlon

Question: Just before the legislative elections in November 2023, the Governor turned down the three-percent toll increase the New Jersey Turnpike Authority sought for calendar year 2025. Shortly after the elections, the Governor approved the three-percent toll increase. What changes were made to the authority's calendar year 2025 budget following the Governor's initial rejection of three-percent toll increase? Please provide details on why the three-percent toll increase was approved after being initially vetoed by the Governor.

NJDOT Response:
The budget had no material changes during the time period; however, the operating budget increased due to the addition of maintenance staff.

The Governor's initial rejection of the budget was to afford him additional time to carefully review the budget proposal. After conducting a thorough review of the budget and being satisfied with the investment in maintaining our state's roadways, the Governor approved the proposal.

Question: Please provide the department's plans to increase transportation project transparency as it pertains to project cost and explain why cost estimates might change.

NJDOT Response:
The Department recognizes the need for financial transparency and its role and responsibility as fiscal stewards of the funds entrusted to the Department, by the public.
The Department is reviewing P.L. 1944, c.112, which requires the Office of the State Auditor to annually publish a user friendly, plain language report that summarizes and analyzes the contents of the New Jersey Annual Comprehensive Financial Report.
A project's cost estimates may change because the project's initial construction cost estimates are prepared at the end of the Concept Development (CD) Phase for a Preliminary Preferred Alternative (PPA). These cost estimates are shared with the public through a combination of public outreach efforts; such as local officials' briefings and public information centers. In addition, these cost estimates are made public through the STIP development process with input from the municipal planning organizations. The design plans are developed and refined to incorporate suggestions from Subject Matter Experts (SME) as the project progresses from the CD phase to the Preliminary Engineering (PE) and Final Design (FD) phases. SME suggestions include safety, bicycle, and pedestrian accommodations to existing roadways and incorporation of these changes into the project drastically changes the cost estimates. New flood mitigation rules and FHWA's resiliency guidelines are currently being adopted by the Department. Consideration of these more up-to-date rules into existing plans essentially influences the cost. As a rule, designers are considering an 18 month bid history when preparing estimations. The cost of materials and labor for project construction will rise in an environment with high inflation and thus, bid costs arrive higher until the bid narratives better reflect the current economic situation. Additionally, in recent years, supply chain and other inflationary pressures have resulted in significant construction cost increases throughout the life of the projects.

Senator Steinhardt

Question: You quoted that 94% of our bridges are in good or fair condition. What data did you use to come up with that?

NJDOT Response: *All New Jersey roadway bridges with a span greater than 20 feet are inspected in accordance with the Code of Federal Regulations (23 CFR Part 650, Subpart C) National Bridge Inspection Standards (NBIS). The bridge condition report provided was based on the latest National Bridge Inventory (NBI) Data, collected in the year 2023, which was reported to the FHWA in March 2024.*

According to the CY2023 NBI Data, there are a total of 6,830 bridges in New Jersey, and 408 of those bridges are currently classified as "structurally deficient" (or "poor"), which is about 6.0% by count. The remaining 94% of the NBIS bridges in New Jersey are either classified as "good" or "fair."

Question: Could you please provide the Federal Bridge Inspection Program data that was provided to the Federal Highway Administration?

NJDOT Response: *The National Bridge Inventory (NBI) data is submitted to the FHWA before March 15th in a plain text file format as per federal guidance, which is not easy to share and/or navigate and would thus render the data useless. The Department has prepared a summary of the information that was provided to the FHWA and attached it hereto. Please note that 33 federally owned bridges are excluded from this list since the Department does not report them to National Bridge Inventory.*
Please be advised that the New Jersey CY 2023 collected NBI data will be reviewed and published on the FHWA website around June 15th of this year.

I hope that this information is helpful. If you or the members have any additional questions, please do not hesitate to contact my Chief of Staff, Christopher Scales, at (609) 963-1940.

Sincerely,

Francis K. O'Connor

Francis K. O'Connor
Acting Commissioner

Senator Johnson

Question: Could you please provide an update on all transportation projects in Legislative District 37 covering the Bergen County municipalities of Bogota, Englewood, Englewood Cliffs, Fort Lee, Hackensack, Leonia, Palisades Park, Ridgefield Park, Teaneck and Tenafly?

NJDOT Response:
Attached are the individually programmed Capital Projects, Capital Program Management Projects, and Operations Projects located in Legislative District 37.

FY 2025 DRAFT TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects
Legislative District - 37

Program/Project Name — *Project ID Numbers:* **N1801**

East Anderson Street Bridge (02C0023A) over the Hackensack River

The existing bridge is a twin six-span, simply supported structure with a total length of 302'-2". The total width of the bridge is 74'-0". The bridge was constructed in 1971 and carries four (4) 12-foot lanes between curbs bounded by 5-foot wide sidewalks on both sides. The bridge has a 10' wide medium which contains a 5' wide utility bank between the two structures providing for separate eastbound and westbound roadways. The bridge replaced an existing swing span structure. The superstructure consists of 11 adjacent prestressed concrete box beams overlaid with an asphalt wearing course. There is cracking in the grout joints between the adjacent units resulting in reflective cracks in the wearing surface, eventually causing corrosion of the non-prestressed and prestressed reinforcement. This is a bridge replacement project.

FY 2025 DRAFT TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects
Legislative District - 37

Program/Project Name — *Project ID Numbers:* **08410 / 084100**

Route 4, Grand Avenue Bridge

This project will replace the structurally deficient bridge built in 1931. The Westbound right through-lane through the intersection will be eliminated. The existing through lane will be used to provide a deceleration lane, an exclusive merge lane, and an acceleration lane that will introduce the right through-lane after the interchange to improve safety at the ramp terminus. A bus shelter will be constructed at the existing bus stop, along with ADA-compliant curb ramps and sidewalks. Gaps in existing sidewalk will be eliminated.
